

# RS/6000 Developer Education

The following classes are available FREE to commercial developers who are members of the RS/6000 POWER Team Partners in Development. If you are not currently a member, use this opportunity to register and take advantage of the many benefits the program has to offer.

To become a member of the RS/6000 POWER Team, register for the IBM Solution Developer Program and select the RS/6000 POWER Team option; then complete a development plan. If you are already a member of the IBM Solution Developer Program developing on another platform, update your registration by selecting the RS/6000 POWER Team option; then submit or update a development plan.

## Applied Java Application Engineering One-Day Workshop

Java isn't just for applets anymore. The appeal of a universal client is well understood, but Java also has several potential uses on the server side. This seminar will explore the value, implications, and trade-offs for using Java in the various components of a 2-tier or 3-tier client/server architecture. See how the RS/6000 server offerings and IBM Java-enabled middleware can make a difference in your distributed applications.

## RS/6000 Technology Update

The RS/6000 Technology Update provides the latest plans and directions for both RS/6000 hardware and AIX software products, as well as providing emphasis on such topics as linking and loading, AIX 4.3 migration, and performance tuning. Attendees are required to sign a non-disclosure agreement to attend class.

Class	Date	Location
RS/6000 Technology Update	9/15/97	Waltham, MA
RS/6000 Technology Update	9/15/97	Milan, Italy
RS/6000 Technology Update	9/22/97	San Mateo, CA
RS/6000 Technology Update	9/23/97	Toronto, Canada
Java Applied Application Engineering	9/24/97	Toronto, Canada

To register for these classes or to become a POWER Team member, visit our Web site at <http://www.spc.ibm.com/events> and click on the class you are interested in.

*Learning  
doesn't stop here...*
