Performance Aide and Performance Toolbox for AIX Version 3.1

The following information applies to Performance Aide Version 3.1 for AIX® or later.

**Note:** This software may contain errors that could result in critical business impact. It is highly recommended that you install the latest available fixes prior to using this software. Fixes can be obtained from IBM® E Server pSeries® Support at the following Web site:

Performance Aide agent version compatibility

The following table describes the version of Performance Aide agent `perfagent` and `perfmgr` you will need to use if you are running the following versions of AIX:

<table>
<thead>
<tr>
<th>AIX Version</th>
<th>Performance Aide agent perfagent and perfmgr</th>
</tr>
</thead>
<tbody>
<tr>
<td>AIX 5L for POWER Version 5.1</td>
<td>• perfagent.tools 5.1.0.50 (base media)</td>
</tr>
<tr>
<td></td>
<td>• bos.perf.tools 5.1.0.50 (base media)</td>
</tr>
<tr>
<td></td>
<td>• bos.perf.perfstat 5.1.0.50 (base media)</td>
</tr>
<tr>
<td></td>
<td>• perfagent.server 3.1.0.0 + APAR IY50634</td>
</tr>
<tr>
<td>AIX 5L Version 5.2</td>
<td>• perfagent.tools 5.2.0.10 (base media)</td>
</tr>
<tr>
<td></td>
<td>• bos.perf.tools 5.2.0.10 (base media)</td>
</tr>
<tr>
<td></td>
<td>• bos.perf.perfstat 5.2.0.10 (base media)</td>
</tr>
<tr>
<td></td>
<td>• perfagent.server 3.1.0.0 + APAR IY50634</td>
</tr>
<tr>
<td>AIX 5L Version 5.3</td>
<td>• perfagent.tools 5.3.0.0 (base media)</td>
</tr>
<tr>
<td></td>
<td>• bos.perf.tools 5.3.0.0 (base media)</td>
</tr>
<tr>
<td></td>
<td>• bos.perf.perfstat 5.3.0.0 (base media)</td>
</tr>
<tr>
<td></td>
<td>• perfagent.server 3.1.0.0 + APAR IY50634</td>
</tr>
</tbody>
</table>

**Notes:**

1. Version 3.1 of the Performance Aide agent supports AIX 5.1, AIX 5.2, and AIX 5.3.
2. The Performance Toolbox clients (xmperf and 3dmon) can monitor legacy Performance Aide agents installed at the Version 3.0 level.
3. In AIX 5L™ for POWER Version 5.1, the iostat performance flag is disabled in a standard installation. This can affect the reporting of performance metrics by the Performance Aide agent. To reset this flag, enter the following command:
   
   chdev -lsys0 -a iostat=true

4. To check the setting of iostat, enter the following command:
   
   lsattr -Elsys0 -a iostat

The `perfmgr`* levels specified in the compatibility chart above are currently included with the latest versions of the Performance Manager media.

Installing Performance Toolbox for AIX filesets

Performance Toolbox for AIX contains two components:

- Manager (client)
- Aide (agent) - this function should be installed on every system to be monitored, including the managing client.
These components ship as separate filesets. For AIX 5.1 and later, the filesets must be installed in the following sequence:

1. `perfagent.tools, bos.perf.tools, bos.perf.perfstat` (from the AIX base installation media)
2. `Java14.sdk` (available on the AIX 5.2 and AIX 5.3 media and the Bonus Pack or download for AIX 5.1)
3. `perfagent.server` (from the Performance Aide Version 3.1 media)
4. `perfmgr.*` filesets (from the Performance Toolbox Version 3.1 media)

Performance Toolbox and Performance Aide use Java™ 1.4. This might require an additional 30 MB of disk space for installation.

**Configuration instructions for preinstallation customers**

Performance Aide can be ordered preinstalled on customer systems. The preinstalled version is configured so that it does not automatically update the `/etc/inittab` file to execute services that support the `jtopas` client. To use this function, preinstallation customers need to do one of the following:

- Manually update the `/etc/inittab` file with the following entries:
  ```
  ptxnameserv:2:respawn:/usr/java14/jre/bin/tnameserv -ORBInitialPort 2279 2>&1 >/dev/null
  ptxfeed:2:respawn:/usr/perfagent/codebase/jtopasServer/feed 2>&1 >/dev/null
  ptxtrend:2:once:/usr/bin/xmtrend -f /etc/perf/jtopas.cf -d /etc/perf/Top -n jtopas 2>&1 >/dev/null
  
  Use the `/usr/lpp/perfagent/config_jtopas` script to update the `/etc/inittab` file. This utility is available with APAR IY47932.
  ```

The preinstalled version of Performance Aide is configured differently than the version that is not preinstalled. This is because of anticipated usage differences in customers who use the full-time Performance Toolbox `jtopas` monitoring and recording function. This function imposes some overhead on the system that preinstallation customers will not need if `jtopas` is not being used.

The CD Media version of Performance Aide is 3.1.0.0, and will automatically update the `/etc/inittab` file entries for 24-hour monitoring and recording. The preinstalled version of the Performance Aide is 3.1.0.10.

**Migrating Performance Toolbox for AIX from Version 3.0 using SMIT**

If you choose to migrate your Performance Toolbox and Performance Aide for AIX from Version 3.0 to Version 3.1 using SMIT, you must use the `smit install_latest` fastpath instead of the `smit update_all` fastpath. If the `smit update_all` fastpath is used, errors will occur because of Performance Toolbox for AIX name changes.

**Online documentation for Performance Toolbox**

**Installing and viewing the online documentation**

The documentation fileset will be installed in the following path:

```
/usr/man/info/en_US/a_doc_lib/perftool/prfusrgd/prfusrgd.htm
```

**Searching the online documentation**

If you download and install the HTML version of the documentation and are viewing the documentation from a AIX 5.1 system, you cannot search the Performance Toolbox documentation through the search links. The documentation search facilities that these search links call are available in AIX 5.2 or later.
Printing the online documentation
Each file of the online documentation may be printed from your Web browser by doing the following:
1. Ensure that your Web browser is set up to print.
2. From any chapter, place your cursor inside the wide frame to the right of your screen, and click to select the frame.
3. From within Netscape Navigator, select the File menu, and then select Print Frame.

Note: If you use a different browser, the menus may differ, but the process is similar to the one described above.

Electronic fix distribution instructions
You can order and download available fixes. For more information, see the following Web site:
http://service.software.ibm.com
Appendix. Notices

This information was developed for products and services offered in the U.S.A.

IBM may not offer the products, services, or features discussed in this document in other countries. Consult your local IBM representative for information on the products and services currently available in your area. Any reference to an IBM product, program, or service is not intended to state or imply that only that IBM product, program, or service may be used. Any functionally equivalent product, program, or service that does not infringe any IBM intellectual property right may be used instead.
