

Verbatim DataLife 8MM & 4MM Data Cartridges

- Ultra High Capacities up to 24GB
- Compatible with 8mm & 4mm Drives & Libraries
- Computer Grade Tape Ensures Data Reliability
- Dust-Proof Cartridge Protects Data
- Full Lifetime Warranty

DataLife® 8mm Cartridges Offer The Most Capacity You Can Buy

Whether you back up on a mainframe, workstation, LAN or mini-computer, count on Verbatim DL 160M and DL 112M data cartridges, the high capacity cartridges engineered for exceptional, trouble-free performance and reliability.

8mm DL 160M — The DL 160M data cartridge delivers 14GB of compressed storage capacity (7 uncompressed). It is intended for use in 8mm drives with extended length capacity using a special media recognition system. This system utilizes a unique stripe pattern on the tape leader which is recognized by XL drives as a computer grade tape. This identification is similar to the DDS media recognition system used on 4mm DDS products.

8mm DL 112M — The DL 112M data cartridge is compatible with all 8mm drives and libraries. Its uncompressed 2.5GB capacity (5GB compressed) delivers exceptional storage capacity for a wide variety of applications. As with all Verbatim 8mm and 4mm cartridges, these 8mm products contain a specially coated computer-grade magnetic tape. This high quality coating ensures optimum recording capability and data preservation.

Super High Density 4mm Cartridge Sets New Standard For DDS3 Drives

The newest addition to Verbatim's family of 4mm data cartridges is the DataLife 125M, a super high density cartridge with a native storage capacity of 12GB (24GB compressed). Designed for DDS3 drives, which are backward compatible with DDS2 and standard DDS cartridges, the new DL 125M data cartridge is ideal for backups, archival storage, multimedia activities and image processing. Other cartridges in Verbatim's 4mm line include the DL 120M (4/8GB), the DL 90M (2/4GB) and the DL 60M (1.3/2.6GB). Verbatim 4mm data cartridges feature a high quality media formulation that helps ensure data integrity. The magnetic tape is protected by a precision-built, heat- and shock-resistant shell that stays hermetically sealed when not in use. DataLife 4mm cartridges have been proven in day-to-day computer applications in the most demanding environments. So insist on DataLife data cartridges from Verbatim — the innovative leader in data storage technology.

Verbatim DataLife 8mm & 4mm Data Cartridges

Technical Specifications

| Description | Part Number | Min. Tape Length | Capacity* Uncompressed/Compressed | Tape Width | Nominal Coercivity (Oersteds) | Bit Error Rate |
|------------------------------|-------------|------------------|-----------------------------------|------------|-------------------------------|------------------------------|
| 8mm DL 160M | 91337 | 160 meters | 7GB/14GB | 8mm | 1500 | < 1 in 10 ¹³ bits |
| 8mm DL 112M | 87698 | 112 meters | 2.5GB/5GB | 8mm | 1500 | < 1 in 10 ¹³ bits |
| 4mm DL 125M (DDS3 Certified) | 91688 | 125 meters | 12GB/24GB | 3.81mm | 1850 | < 1 in 10 ¹⁵ bits |
| 4mm DL 120M (DDS2 Certified) | 89547 | 120 meters | 4GB/8GB | 3.81mm | 1700 | < 1 in 10 ¹⁵ bits |
| 4mm DL 90M (DDS Certified) | 88195 | 90 meters | 2GB/4GB | 3.81mm | 1500 | < 1 in 10 ¹⁵ bits |
| 4mm DL 60M (DDS Certified) | 88038 | 60 meters | 1.3GB/2.6GB | 3.81mm | 1500 | < 1 in 10 ¹⁵ bits |

Operating Environment

Storage Environment

| Temperature | Relative Humidity | Max. Wet Bulb | Temperature | Relative Humidity | Max. Wet Bulb |
|----------------------------------|-------------------------------|------------------|---------------------------------|-------------------------------|------------------|
| 41° F - 104° F (5° C - 40° C) | 20% - 80% (Non-Condensing) | 77° F (25° C) | 41° F - 90° F (5° C - 32° C) | 40% - 60% (Non-Condensing) | 77° F (25° C) |

* Storage capacities are data and drive dependent.

Verbatim Tape Cleaning Kits

Verbatim 4mm and 8mm tape cleaning kits clean the read/write heads of tape drives allowing them to function at peak performance. It's an easy, cost-effective way to prevent potentially disastrous problems. Forty cleanings per 4mm cartridge; 12 cleanings per 8mm cartridge.

| Description | Approximate Number of Cleanings | Order No. |
|-----------------------|---------------------------------|-----------|
| 4mm Tape Cleaning Kit | 40 | 89615 |
| 8mm Tape Cleaning Kit | 12 | 89616 |
