Declaration of Conformity

Compliance ID: 200
Product Name: Sun Ultra 5 Family (applies only to systems bearing an E-Z label marked with the letter D)

EMC

USA—FCC Class B
This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:
1. This device may not cause harmful interference.
2. This device must accept any interference received, including interference that may cause undesired operation.

European Union—EC
This equipment complies with the following requirements of the EMC Directive 89/336/EEC:

<table>
<thead>
<tr>
<th>Standard</th>

Sun Ultra 5 and Ultra 10
Product Notes

The following product notes contain information about changes to the Sun Ultra™ 5 and Sun Ultra 10 system hardware, software, and product documentation. These product notes are a summary of the changes that became known after the product documentation set was published.

This product note contains information on the following topics:

- Preinstalled Software
- Restoring the Preinstalled Software
- New Power Supply
- New 20 Gigabyte Hard Disk Drive
- New 48x CD-ROM Drive

Preinstalled Software

Your Sun Ultra 5 or Ultra 10 system has two versions of the Solaris™ operating environment software already installed on its new hard disk: Solaris 7 11/99 (instead of Solaris 7 3/99) and Solaris 8 software. In the Sun Ultra 5 With Preinstalled Software Getting Started Guide, 806-0162, or the Sun Ultra 10 With Preinstalled Software Getting Started Guide, 806-0163, the information pertaining to the operating environment is also true of the current preinstalled software, including the information about initial configuration in the sections “Using the System as a Desktop Workstation” and “Using the System as a Server”.
Summary of Preinstalled Software Suites

The Solaris 8 preinstalled software suite has the latest versions of the software. However, the Solaris 7 11/99 preinstalled software suite is also supplied for the convenience of those using the older software versions on existing systems. Table 1 summarizes the software suites. This table replaces Table 2 in the Sun Ultra 5 With Preinstalled Software Getting Started Guide, 806-0162, and in the Sun Ultra 10 With Preinstalled Software Getting Started Guide, 806-0163. Note the new version numbers.

**Note** – To start Netscape Communicator, click on the globe/clock icon on the CDE desktop task bar. Netscape Communicator has built-in help files for more information.
Restoring the Preinstalled Software

You might want to make and keep a full backup of the operating system, which can be used to restore your system. Instructions for backing up your operating system are included in the preinstalled Solaris System Administration Guide AnswerBook2.

The following table summarizes the default disk configurations and partitioning for both the Solaris 7 11/99 and the Solaris 8 preinstalled software, after the user has completed initial configuration. The table replaces Table 4 in the Sun Ultra 5 With Preinstalled Software Getting Started Guide, 806-0162, and in the Sun Ultra 10 With Preinstalled Software Getting Started Guide, 806-0163.

TABLE 2 Default Preinstalled Disk Configurations

<tr>
<td>3</td>
<td>space</td>
<td>remainder</td>
<td>/space</td>
</tr>
</tbody>
</table>

New Power Supply

The new power supply automatically detects and adjusts for the AC line voltage. Therefore, the voltage select switch has been eliminated.
This information updates the following documentation:

**Note** – If your system contains the new power supply, the label bearing the serial number is marked with the letter D. This label, also known as the E-Z label, is on the back bezel. The information on the E-Z label helps service support identify the original system configuration when users call for assistance, support, and parts.

---

**New 20 Gigabyte Hard Disk Drive**

The Sun Ultra 5 and Ultra 10 systems are equipped with a 20 Gigabyte hard drive. The hard drive operates at 7,200 RPM. The procedures in the Sun Ultra 5 and Sun Ultra 10 Getting Started Guides and Service Manuals describe how to remove and replace the hard drive.

**Note** – Prior to installing a hard disk drive, verify that the back panel mode-select jumper is set to CS.

---

**New 48x CD-ROM Drive**

The new CD-ROM drive runs at 48x speed. The procedures in the Sun Ultra 5 and Sun Ultra 10 Getting Started Guides and Service Manuals describe how to remove and replace the CD-ROM drive.

**Note** – Prior to installing a CD-ROM drive, verify that the back panel mode-select jumper is set to MA.
