XGrabServer, XUngrabServer – grab the server

XGrabServer(display)
    Display *display;
XUngrabServer(display)
    Display *display;

display Specifies the connection to the X server.

The XGrabServer function disables processing of requests and close downs on all other connections than
the one this request arrived on. You should not grab the X server any more than is absolutely necessary.
The XUngrabServer function restarts processing of requests and close downs on other connections. You
should avoid grabbing the X server as much as possible.

XGrabButton(3X11), XGrabKey(3X11), XGrabKeyboard(3X11), XGrabPointer(3X11)
