

XtAppAddWorkProc, XtRemoveWorkProc – Add and remove background processing procedures

XtWorkProcId XtAppAddWorkProc(*app_context*, *proc*, *client_data*)

XtAppContext *app_context*;

XtWorkProc *proc*;

XtPointer *client_data*;

void **XtRemoveWorkProc**(*id*)

XtWorkProcId *id*;

app_context Specifies the application context that identifies the application.

client_data Specifies the argument that is to be passed to the specified procedure when it is called.

proc Specifies the procedure that is.

id Specifies which work procedure to remove.

The **XtAppAddWorkProc** function adds the specified work procedure for the application identified by *app_context*.

The **XtRemoveWorkProc** function explicitly removes the specified background work procedure.
