

XtCallAcceptFocus – call a widget's `accept_focus` procedure

Boolean XtCallAcceptFocus(*w*, *time*)

Widget *w*;

Time **time*;

time Specifies the X time of the event that is causing the accept focus.

w Specifies the widget.

The XtCallAcceptFocus function calls the specified widget's `accept_focus` procedure, passing it the specified widget and time, and returns what the `accept_focus` procedure returns. If `accept_focus` is `NULL`, **XtCallAcceptFocus** returns **False**.
