

**XtLastEventProcessed, XtLastTimestampProcessed** – last event, last timestamp processed

**XEvent\*** **XtLastEventProcessed**(*display*)

**Display\*** *display*;

Time **XtLastTimestampProcessed**(*display*)

**Display\*** *display*;

*display*            Specifies the open display connection.

**XtLastEventProcessed** returns the last event passed to **XtDispatchEvent** for the specified display and NULL if there has been no event. The client must not modify the contents of the returned event.

**XtLastTimestampProcessed** returns the timestamp of the last **KeyPress**, **KeyRelease**, **ButtonPress**, **ButtonRelease**, **MotionNotify**, **EnterNotify**, **LeaveNotify**, **PropertyNotify**, or **SelectionClear** event that has been passed to **XtDispatchEvent** for the specified display and zero if there has been no such event.
