Virtual I/O Server Version 1.4

Release Notes
Before using this information and the product it supports, read the information in "Notices," on page 11.
Chapter 1. Version 1.4 enhancements

There are a number of enhancements in this release of the Virtual I/O Server (VIOS).

Virtual I/O Server enhancements

VIOS V1.4 delivers improvements in usability, simplification, security, connectivity, maintenance, and user management. As part of an IBM® System p / Tivoli collaboration effort, a number of core Tivoli® products have been enabled to provide leading-edge virtualization monitoring capabilities for Virtual I/O Server. In addition, new POWER™ platform enablement and new storage solutions and interconnects are enabled with VIOS V1.4.

Virtual I/O Server (VIOS)

- POWER6
  - VIOS enablement for POWER6™ System p
- Lightweight Directory Access Protocol (LDAP)
  - Centralized user management
- Simple Network Management Protocol (SNMP)
  - Standard interface used for monitoring and management
- New storage subsystems: nSeries and NetApp subsystems, iSCSI and Fiber Channel attachments, and new interconnects: SAS (for disk attach), SATA (optical controller)
- System planning and deployment upgrades
  - The system planning and deployment tool helps simplify the process of planning and deploying System p and virtual I/O. The tool also supports the planning and deployment of the virtual I/O partitions. Additional information can be found at the following Web site:
- Integrated Virtual Ethernet (also referred to as HEA or Host Ethernet Adapter)
  - VIOS’s Shared Ethernet Adapter (SEA) supports bridging virtual Ethernet to HEA
- GVRP (GARP VLAN Registration Protocol)
  - Automatic registration of VLANs to external switches
- VIOS CLI improvements: security, maintenance, user management, usability
- Integrated Virtualization Manager (IVM) adds support for System Plan Management
  - Web UI and command line support was added for System Plan Management
- Tivoli Storage Manager (TSM) client
  - Automated backup/restore of VIOS customized data. For more information about this product, see the following Web site:
- IBM Tivoli Usage and Accounting Management (ITUAM) agent
  - Accounting/usage metric collection/analysis. For more information about this product, see the following Web site:
- IBM Tivoli Application Dependency Discovery Manager (TADDM)
  - System p and VIOS resource discovery. For more information about this product, see the following Web site:
• IBM Tivoli Monitoring V6.1 (ITM) enhancements
  – Additional performance and throughput monitoring for the Virtual I/O Server beyond what was previously provided by the IBM Tivoli Monitoring System Edition for System p V6.1 product that is available at no charge to System p customers. Customers interested in these enhancements can purchase IBM Tivoli Monitoring V6.1 at the following Web site:

Chapter 2. Installation, Migration, Upgrade, and Configuration Information

The following information applies to Virtual I/O Server.

Note: This software might contain errors that could result in critical business impact. Install the latest available update packages prior to using this software. Update packages can be obtained from the following Web site:

To view the most current version of the Virtual I/O Server release notes, go to the online release notes at the following Web site:

All users of the Virtual I/O Server should subscribe to the Virtual I/O Server subscription service. Subscribing to this service allows users to stay current on Virtual I/O Server news and critical product updates. To subscribe, go to the following Web site:

and click the Subscribe/Setup tab.
Chapter 3. Software License Agreements

There are instances where the software license agreements might not be displayed correctly. In this event, the License Agreements can be viewed in all languages at the following Web site:

Chapter 4. Online documentation for Virtual I/O Server

For online documentation, see Using the Virtual I/O Server at the following Web site:

http://publib.boulder.ibm.com/infocenter/eserver/v1r3s/topic/iphb1/iphb1kickoff.htm

For additional documentation, including Redbooks™, refer to this Web site:

Customers in Japanese locales should use the `chlang` command to force messages on the left to appear in English. Without this option, messages during the boot sequence are corrupted.

To change the Virtual I/O Server’s locale to Japanese, the user needs to issue the following command:

```
chlang -msg C01ft -lang ja_JP
```
Appendix. Notices

This information was developed for products and services offered in the U.S.A.

IBM may not offer the products, services, or features discussed in this document in other countries. Consult your local IBM representative for information on the products and services currently available in your area. Any reference to an IBM product, program, or service is not intended to state or imply that only that IBM product, program, or service may be used. Any functionally equivalent product, program, or service that does not infringe any IBM intellectual property right may be used instead. However, it is the user’s responsibility to evaluate and verify the operation of any non-IBM product, program, or service.

IBM may have patents or pending patent applications covering subject matter described in this document. The furnishing of this document does not give you any license to these patents. You can send license inquiries, in writing, to:

IBM Director of Licensing
IBM Corporation
North Castle Drive
Armonk, NY 10504-1785

Tokyo 106, Japan

IBM may use or distribute any of the information you supply in any way it believes appropriate without incurring any obligation to you.

Information concerning non-IBM products was obtained from the suppliers of those products, their published announcements or other publicly available sources. IBM has not tested those products and cannot confirm the accuracy of performance, compatibility or any other claims related to non-IBM products. Questions on the capabilities of non-IBM products should be addressed to the suppliers of those products.

Any references in this information to non-IBM Web sites are provided for convenience only and do not in any manner serve as an endorsement of those Web sites. The materials at those Web sites are not part of the materials for this IBM product and use of those Web sites is at your own risk.

This information contains examples of data and reports used in daily business operations. To illustrate them as completely as possible, the examples include the names of individuals, companies, brands, and products. All of these names are fictitious and any similarity to the names and addresses used by an actual business enterprise is entirely coincidental.
