

P-A* DIE

*Precision alignment die for bottleneck rifle cartridges.

Here is a bullet seating and crimping die uniquely designed for maximum alignment of bullets. Illustration shows how the cartridge neck and bullet are immediately centered by the sliding inner sleeve. As the case is pushed further into the die, the sleeve moves upwards, holding the bullet and case neck in alignment.

These dies can be adjusted to crimp the bullet in place, if desired. P-A Dies are available for most all bottleneck rifle cartridges. Specify cartridge and bullet style when ordering.

DIE SETS FOR HANDGUN CARTRIDGES

STANDARD THREE-DIE PISTOL SET

Available in all pistol calibers, this set can be used with either cast or jacketed bullets. The set contains a full-length resizing and decapping die. A 2-step neck expanding die which conditions the case neck for receiving the bullet and insures precise bullet pull. The third die, a bullet seating die, has the capability of crimping if desired. Specify cartridge and bullet style when ordering.

only **\$13.50**

T-C* PISTOL DIE

*Tungsten Carbide Resizing and Decapping Die for handgun cartridges.

A lifetime of reloads, some 200,000 rounds can be pushed through this Full-length Resizing and Decapping Die without a sign of wear. With the new Lyman T-C Die, cases need not be lubricated. Even dirty cases emerge from the die with a polished, burnished appearance. T-C Dies are available for the following pistol cartridges: 38 S & W (also fits 38 ACP and 38 SUPER), 38 SPECIAL (also fits 357 MAGNUM), 41 MAGNUM, 44 SPECIAL (also fits 44 MAGNUM), 45 ACP, 45 COLT.
