## **About This Section**

This section contains information about the user input devices. Use the contents list on the preceding page to find information about your input device.

Pages in this section contain a 3-digit product code in the page number to make future updating easier.

## Keyboard

The keyboard connects to the rear of the system unit. The keyboard also contains the system speaker.

The Keyboard is a single field-replaceable unit and cannot be serviced in the field.

### **Specifications**

Number of keys U.S., 101

WT, 102

Connector 6-Pin keyed

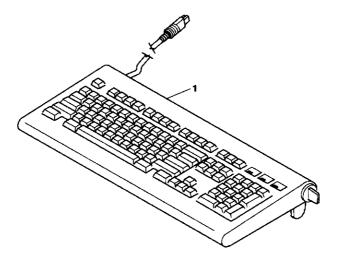

Power From the system unit

#### Removal Procedure

1. Do the Rear Cover Removal. If needed, see Section 4.

2. Pull the keyboard cable connector out from the keyboard connector on the system unit.

- 1. Push the keyboard cable connector into the keyboard connector on the system unit.
- 2. Do the Rear Cover Replacement. If needed, see Section 4.

1	1392373	Keyboard, Canadian-French

#### Mouse

The Mouse is a locator device used to control the system. The function controlled by the Mouse is determined by the program.

The Mouse is a single field-replaceable unit.

See the IBM RT PC Guide to Operations for the cleaning procedure.

## **Specifications**

Number of buttons 2

Connector

6-Pin keyed

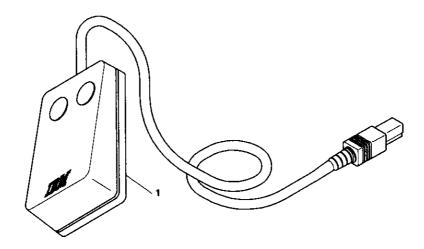

Power

From the system unit

#### Removal Procedure

- 1. Do the Rear Cover Removal. If needed, see Section 4.
- 2. Pull the mouse cable connector out from the mouse connector on the system unit.

- 1. Push the mouse cable connector into the mouse connector on the system unit.
- 2. Do the Rear Cover Replacement. If needed, see Section 4.

#### IBM 5083 Tablet

The IBM 5083 Tablet is a thin flat-surfaced unit used to input pointing instructions to the system. Either the *Cursor* or the *Stylus* attaches to the Tablet.

The Cursor is a mouse-like device with four buttons. The Stylus is a pen-like device. When the Cursor or the Stylus is moved on the surface of the Tablet, the Tablet provides their location to the software. When the buttons on the Cursor are pressed, or when the Stylus is pressed, the Tablet provides an identifying code to the software.

On models 1, 11, and 12 of the IBM 5083 Tablet, the RT PC 5083 Tablet Cable Kit is required to attach the IBM 5083 Tablet to the IBM RT PC System Unit. The cable from the RT PC 5083 Tablet Cable Kit attaches the IBM 5083 to the M connector on the rear of the system unit. The RT PC 5083 Tablet Cable Kit also includes a clamping device that encloses the connectors.

On models 11A and 12A of the IBM 5083 Tablet, a single cable attaches the tablet to the M connector on the IBM RT PC System Unit.

See the IBM RT PC Guide to Operations for the Tablet cleaning procedure.

## **Specifications**

Number of buttons Cursor, 4

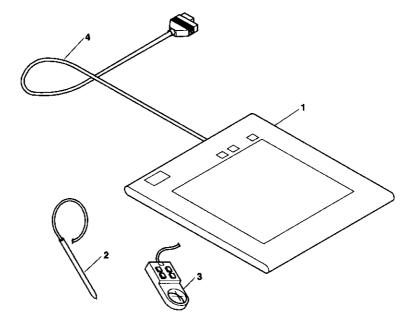

Stylus, 1 (built-in)

Power From the system unit

#### Removal Procedure

- 1. Set the power switch on the system unit to Off.
- 2. Do the Rear Cover Removal procedure.
- 3. Disconnect the cable from the M connector on the rear of the system unit.
- 4. If present, remove the clamping device and disconnect the IBM 5083 Tablet cable.
- 5. Disconnect the Stylus or Cursor from the front of the IBM 5083.

- 1. Connect the Cursor or Stylus into the connector on the front of the IBM 5083.
- 2. If present, connect the IBM 5083 cable connector to the cable included in the Tablet Cable Kit and install the clamping device.
- 3. Connect that cable to the M connector on the rear of the system unit.
- 4. Do the Rear Cover Replacement procedure.
- 5. Set the power switch on the system unit to On.

#### IBM 5085 Dials Feature

The IBM 5085 Dials Feature is a desktop unit with eight dials arranged in two rows of four dials. The Dials Feature is used to input analog positional information. The dials can turn completely around without any stops. The software uses the information provided by the Dials Feature.

The RT PC 5080 Peripheral Cable Kit is required to attach the Dials Feature to the IBM RT PC System Unit. The cable from the Peripheral Cable Kit attaches to the end of the Dials Feature cable. The Peripheral Cable Kit also includes a clamping device that encloses the connectors.

## **Specifications**

Number of dials

Power

8

From the adapter

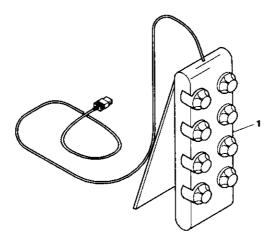

Adapter

RT PC 5080 Peripheral Adapter

#### Removal Procedure

- 1. Set the power switch on the system unit to Off.
- 2. Do the Rear Cover Removal. If needed, see Section 4.
- 3. Disconnect the cable to the IBM 5085 Dials Feature from the RT PC 5080 Peripheral Adapter.
- 4. Remove the clamping device and disconnect the Dials Feature cable.

- 1. Connect the Dials Feature cable connector to the cable from Peripheral Cable Kit and install the clamping device.
- 2. Connect the cable to the RT PC 5080 Peripheral Adapter.
- 3. Do the Rear Cover Replacement. If needed, see Section 4.
- 4. Set the power switch on the system unit to On.

## IBM 5085 Lighted Program Function Keyboard Feature

The IBM 5085 Lighted Program Function Keyboard (LPFK) Feature provides additional function keys. The LPFK Feature keys can be lighted individually by the software to indicate which keys are active. The function of each key is determined by the program using the LPFK.

The RT PC 5080 Peripheral Cable Kit is required to attach the LPFK Feature to the IBM RT PC System Unit. The cable from the Peripheral Cable Kit attaches to the end of the LPFK Feature cable. The Peripheral Cable Kit also includes a clamping device that encloses the connectors.

## **Specifications**

Number of keys

Power

32

From the adapter

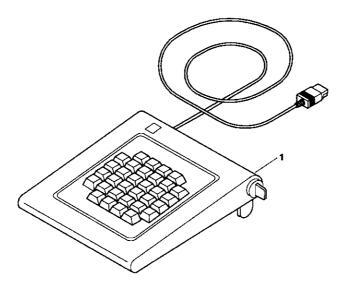

Adapter

IBM 5080 Peripheral Adapter

#### Removal Procedure

- 1. Set the power switch on the system unit to Off.
- 2. Do the Rear Cover Removal. If needed, see Section 4.
- 3. Disconnect the cable to the IBM 5085 LPFK Feature from the RT PC 5080 Peripheral Adapter.
- 4. Remove the clamping device and disconnect the LPFK Feature Cable.

- 1. Connect the LPFK Feature cable connector to the cable from Peripheral Cable Kit and install the clamping device.
- 2. Connect the cable to the RT PC 5080 Peripheral Adapter.
- 3. Do the Rear Cover Replacement. If needed, see Section 4.
- 4. Set the power switch on the system unit to On.
