Initial Setup Instructions

For more detailed information, press the ThinkVantage button.

1. Unpack:
   - ThinkPad(R) computer
   - Battery pack
   - Power cord
   - AC adapter
   - 2 TrackPoint(R) caps
   - Books

   * See reverse for notes about unlisted, missing, or damaged items and recovery CD.
   
   Note: Read the safety notices in the Service and Troubleshooting Guide before you use the computer.

2. Install battery pack:
   Your battery is ready to use.

3. Connect to power:

4. Turn on the power:

5. Point and click with UltraNav(TM) Multi-pointing Navigation System:
   Press the TrackPoint cap or move across the touch pad in the direction you want to move the pointer. The left and right buttons below the space bar and touch pad function like mouse buttons. Some models may have only a TrackPoint.

6. Configure the Operating System following on-screen instructions:
   This process takes several minutes, and your computer may restart multiple times.

7. To learn more, press the ThinkVantage button:

ThinkVantage Design

Installing Optional memory

You can increase the amount of memory in your computer.

Note: Only use memory types supported by your computer. If you incorrectly install the optional memory or install an unsupported memory type, a warning beep will sound when you try to start the computer.

1. Touch a grounded metal object to reduce any static electricity in your body that could damage the SO-DIMM. Avoid touching the contact edge of the SO-DIMM.

2. Turn off the computer.

3. Disconnect the ac adapter and all cables from the computer.

4. Close the computer display and turn the computer over.

5. Remove the battery.

6. Remove the 4 screws.

7. Turn the computer over again and remove the palmrest. It is not necessary to disconnect the cable trackpad cable.

8. If a SO-DIMM is already installed, remove it as shown. Save the SO-DIMM for future use.

9. Align the notch in the contact edge of the SO-DIMM with the divider in the socket. Firmly insert the SO-DIMM into the socket at an angle of 20 degrees and then pivot it downward until it snaps into place.

10. Replace the palmrest.

11. Turn the computer over and replace the 4 screws.

12. Replace the battery.

Verify proper installation of the optional SO-DIMM:

1. Turn on the computer.

2. Press the ThinkVantage button when prompted during startup.

3. Open the BIOS Setup Utility by clicking "Access BIOS" under the "Configure" category.

4. Verify that the "Installed memory" item shows the total amount of memory installed in your computer. For example, if your computer had 256 MB of standard memory and you install an additional 512 MB SO-DIMM, the quantity shown in "Installed memory" should be 768 MB.
