ThinkPad® R60 Series
Service and Troubleshooting Guide

Includes:

• Introduction to other sources of information
• Important tips for taking care of your computer
• Diagnostics and troubleshooting
• Recovery options
• Help and service
• Warranty information for your computer
Before using this information and the product it supports, be sure to read the following:

- Safety and Warranty Guide included in the package with this publication.
- ThinkPad Regulatory Notice included in the package with this publication.

Basic tips for preventing problems

To prevent damage to the hard disk and subsequent data loss, before moving your ThinkPad computer, press Fn+F4 to put it in standby mode or turn it off. Make sure that the standby status indicator is on (is green) before moving the computer.

Use a quality carrying case that provides adequate cushion and protection. Do not pack your computer in a tightly packed suitcase or bag.

Do not drop, bump, scratch, twist, hit, vibrate, push or place heavy objects on your computer, display, or external devices.

Place liquids away from your computer to avoid spills, and keep your computer away from water to avoid the danger of electrical shock.

Avoid leaving the base of your computer in contact with your lap or any part of your body for an extended period when the computer is turned on or when the battery is charging.
Basic tips for preventing problems
Chapter 1. Finding information

This guide and other publications

Setup Instructions
helps you to unpack your ThinkPad computer and get started. It includes a few tips for first-time users, and introduces software preinstalled by Lenovo.

This Service and Troubleshooting Guide
provides information about caring for your ThinkPad computer, basic troubleshooting information, some recovery procedures, and help and service information. The troubleshooting information in this Guide applies only to problems that might prevent you from accessing the comprehensive help and information portal, called ThinkVantage Productivity Center, preloaded on your ThinkPad computer.

Access Help
is a comprehensive online manual that provides answers to most of your questions about your computer, helps you to configure preloaded features and tools, or solve problems. To open Access Help, move the pointer to All Programs (in Windows other than Windows XP, Programs); then to ThinkVantage. Click Access Help.

ThinkVantage Productivity Center
provides an easy access to software tools and key Lenovo sites, eliminating the need to carry other reference manuals around. To open ThinkVantage Productivity Center, press the ThinkVantage button on your keyboard. For more information about using the ThinkVantage button, see “Finding information with the ThinkVantage button” on page 2.

Safety and Warranty Guide
includes general safety instructions and complete Lenovo Statement of Limited Warranty.

Regulatory Notice
supplements this Guide. Read it before you use the wireless features of your ThinkPad computer. The ThinkPad R60 Series computer complies with the radio frequency and safety standards of any country or region in which it has been approved for wireless use. You are requested to install and use your ThinkPad computer in strict accordance with the local RF regulations.
Finding information with the ThinkVantage button

The blue ThinkVantage button can help you in many situations when your computer is working normally, and even when it is not. Press the ThinkVantage button to open the ThinkVantage Productivity Center and get access to informative illustrations and easy-to-follow instructions for getting started and staying productive.

You can also use the ThinkVantage button to interrupt the startup sequence of your computer and start the ThinkVantage Rescue and Recovery workspace, which runs independently of the Windows operating system and is hidden from it.
Chapter 2. Caring for your ThinkPad computer

Caring for your ThinkPad computer

Though your computer is designed to function reliably in normal work environments, you need to use common sense in handling it. By following these important tips, you will get the most use and enjoyment out of your computer.

Important tips:

Be careful about where and how you work

- Do not leave the base of your computer in contact with your lap or any part of your body for an extended period when the computer is functioning or when the battery is charging. Your computer dissipates some heat during normal operation. This heat is a function of the level of system activity and battery charge level. Extended contact with your body, even through clothing, could cause discomfort or, eventually, a skin burn.
- Place liquids away from your computer to avoid spills, and keep your computer away from water (to avoid the danger of electrical shock).
- Store packing materials safely out of the reach of children to prevent the risk of suffocation from plastic bags.
- Keep your computer away from magnets, activated cellular phones, electrical appliances, or speakers (within 13 cm/5 in).
- Avoid subjecting your computer to extreme temperatures (below 5°C/41°F or above 35°C/95°F).

Be gentle with your computer

- Avoid placing any objects (including paper) between the display and the keyboard or under the keyboard.
- Do not drop, bump, scratch, twist, hit, vibrate, push or place heavy objects on your computer, display, or external devices.
- Your computer display is designed to be opened and used at an angle slightly greater than 90 degrees. Do not open the display beyond 180 degrees, as this might damage the computer hinge.

Carry your computer properly

- Before moving your computer, be sure to remove any media, turn off attached devices, and disconnect cords and cables.
Caring for your ThinkPad computer

- Be sure your computer is in standby or hibernation mode, or turned off, before moving it. This will prevent damage to the hard disk drive and data loss.
- When picking up your open computer, hold it by the bottom. Do not pick up or hold your computer by the display.
- Use a quality carrying case that provides adequate cushion and protection. Do not pack your computer in a tightly packed suitcase or bag.

Handle storage media and drives properly
- Avoid inserting diskettes at an angle and attaching multiple or loose diskette labels, as these can lodge in the drive.
- If your computer comes with an optical drive such as CD, DVD, or CD-RW/DVD drive, do not touch the surface of a disc or the lens on the tray.
- Wait until you hear the CD or DVD click into the center pivot of an optical drive such as CD, DVD, or CD-RW/DVD drive before closing the tray.
- When installing your hard disk, diskette, CD, DVD, or CD-RW/DVD drive, follow the instructions shipped with your hardware, and apply pressure only where needed on the device. See Access Help, your on-board help system, for information on replacing your hard disk drive.

Take care in setting passwords
- Remember your passwords. If you forget a supervisor or hard disk password, Lenovo authorized service provider will not reset it, and you might have to replace your system board or hard disk drive.

Other important tips
- Your computer modem might use only an analog telephone network, or public-switched telephone network (PSTN). Do not connect the modem to a PBX (private branch exchange) or any other digital telephone extension line because this could damage your modem. Analog phone lines are often used in homes, while digital phone lines are often used in hotels or office buildings. If you are not sure which kind of phone line you are using, contact your telephone company.
- Your computer might have both an Ethernet connector and a modem connector. If so, be sure to connect your communication cable to the correct one, so your connector is not damaged. See Access Help, your on-board help system, for information on the location of these connectors.
- Register your ThinkPad products with Lenovo (refer to the Web page: www.lenovo.com/register/). This can help authorities return your computer to you if it is lost or stolen. Registering your computer also enables Lenovo to notify you about possible technical information and upgrades.
Caring for your ThinkPad computer

- Only an authorized ThinkPad repair technician should disassemble and repair your computer.
- Do not modify or tape the latches to keep the display open or closed.
- Take care not to turn your computer over while the ac adapter is plugged in. This could break the adapter plug.
- Turn off your computer if you are replacing a device in a device bay, or else verify that the device is warm-or hot-swappable.
- If you exchange drives in your computer, reinstall the plastic bezel faces (if supplied).
- Store your external and removable hard disk, diskette, CD, DVD, and CD-RW/DVD drives in the appropriate containers or packaging when they are not being used.
- Before you install any of the following devices, touch a metal table or a grounded metal object. This action reduces any static electricity from your body. The static electricity could damage the device.
  - PC Card
  - Smart Card
  - Memory Card, such as xD-Picture Card, SD Card, Memory Stick, and MultiMediaCard
  - Memory module
  - PCI Express Mini Card
  - Communication Daughter Card
- When transferring data to or from a Flash Media Card, such as an SD card, do not put your computer in standby or hibernation mode before the data transfer is complete. To do so might cause damage to your data.

Cleaning the cover of your computer

Occasionally clean your computer as follows:
1. Prepare a mixture of a gentle kitchen-use detergent (one that does not contain abrasive powder or strong chemicals such as acid or alkaline). Use 5 parts water to 1 part detergent.
2. Absorb the diluted detergent into a sponge.
3. Squeeze excess liquid from the sponge.
4. Wipe the cover with the sponge, using a circular motion and taking care not to let any excess liquid drip.
5. Wipe the surface to remove the detergent.
6. Rinse the sponge with clean running water.
7. Wipe the cover with the clean sponge.
8. Wipe the surface again with a dry, soft lint-free cloth.
Caring for your ThinkPad computer

9. Wait for the surface to dry completely and remove any cloth fibers from the computer surface.

Cleaning your computer keyboard
1. Absorb some isopropyl rubbing alcohol on a soft, dust-free cloth.
2. Wipe each keytop surface with the cloth. Wipe the keys one by one; if you wipe several keys at a time, the cloth may hook onto an adjacent key and possibly damage it. Make sure that no liquid drips onto or between the keys.
3. Allow to dry.
4. To remove any crumbs and dust from beneath the keys, you can use a camera blower with a brush or cool air from a hair dryer.

Note: Avoid spraying cleaner directly on the display or the keyboard.

Cleaning your computer display
1. Gently wipe the display with a dry, soft lint-free cloth. If you see a scratchlike mark on your display, it might be a stain transferred from the keyboard or the TrackPoint pointing stick when the cover was pressed from the outside.
2. Wipe or dust the stain gently with a soft, dry cloth.
3. If the stain remains, moisten a soft, lint-free cloth with water or a 50-50 mixture of isopropyl alcohol and water that does not contain impurities.
4. Wring out as much of the liquid as you can.
5. Wipe the display again; do not let any liquid drip into the computer.
6. Be sure to dry the display before closing it.

Care for the fingerprint reader

The following actions could damage the fingerprint reader or cause it not to work properly:
• Scratching the surface of the reader with a hard, pointed object.
• Scrapping the surface of the reader with your nail or anything hard.
• Using or touching the reader with a dirty finger.

If you notice any of the following conditions, gently clean the surface of the reader with a dry, soft, lint-free cloth:
• The surface of the reader is dirty or stained.
• The surface of the reader is wet.
• The reader often fails to enroll or authenticate your fingerprint.

Frequently asked questions

This section lists frequently asked questions and tells where you can find detailed answers. For details about each publication included in the package with the ThinkPad computer, see “This guide and other publications” on page 1.

What safety precautions should I follow when using my ThinkPad computer?
See the separate Safety and Warranty Guide for detailed information about safety.

How can I prevent problems with my ThinkPad computer?
See “Basic tips for preventing problems” on page vi and also the Chapter 2, “Caring for your ThinkPad computer,” on page 3 of this Guide. More tips can be found in the following sections of the Access Help:
• Preventing problems
• Spills on the keyboard

What are the main hardware features of my new ThinkPad computer?
See the “ThinkPad tour” section of the Access Help.

Where can I find the detailed specifications for my machine?
See www.lenovo.com/think/support

I need to upgrade a device or I need to replace one of the following: the hard disk drive, the PCI Express Mini Card, the Modem Daughter Card, memory, the keyboard, or the palm rest.
Refer to Appendix B, “Customer Replaceable Units (CRUs),” on page 63 of this Guide for the list of Customer Replaceable Units and the location of the instructions for removing or replacing components.
My computer is not operating properly.
Study the “Problem solving” section of the Access Help. This Guide describes only problems that might prevent you from getting access to the online help system.

Where are the recovery CDs?
No recovery CD or a Windows CD is provided with your computer originally. For explanation of the alternative recovery methods offered by Lenovo, see “Restoring factory contents” on page 39 of this Guide.

How can I contact the Customer Support Center?
See the Chapter 8, “Getting help and service,” on page 51 section of this Guide. For the phone numbers of the Customer Support Center nearest to you, see “Worldwide telephone list” on page 58.

Where can I find warranty information?
See the separate Safety and Warranty Guide for detailed warranty information. For the warranty applicable to your Machine, including the warranty period and type of warranty service, see “Warranty Information” on page 55.

**Diagnosing problems**

If you have a problem with your computer, you can test it by using PC-Doctor® for Windows. To run PC-Doctor for Windows, do as follows:

1. Click **Start**.
2. Move the pointer to **All Programs** (in Windows other than Windows XP, Programs) and then to **PC-Doctor for Windows**.
3. Click **PC-Doctor**.

For more information about PC-Doctor for Windows, see the Help for the program.

**Attention**

Running any tests may take up to several minutes or longer. Make sure you have time to run the entire test; do not interrupt the test while it is running.

If you are preparing to contact the Customer Support Center, be sure to print the test log so that you can rapidly provide information to the help technician.
Solving computer problems

Troubleshooting

If you do not find your problem here, refer to Access Help, your on-board help system. The following section only describes problems that might prevent you from accessing the help system.

Error messages

Notes:
1. In the charts, x can be any character.
2. The version of PC-Doctor referred to here is PC-Doctor for Windows.

| 1810: Hard disk partition layout error | A problem in recognizing the layout of the partition on the hard disk has halted computer startup. Either the Predesktop Area has been deleted, or the hard disk contains corrupt data. To try to restart your computer, complete one of the following:  
• If the Predesktop Area has been deleted  
  1. Press F1 to open the BIOS Setup Utility.  
  2. Select **Security->Predesktop Area-> Access Predesktop Area**.  
  3. Set this item to **Disabled**.  
  4. Save and exit.  
• If the above fails  
  1. Press Enter.  
  2. Double-click **RECOVER TO FACTORY CONTENTS** and follow on-screen instructions.  
Note: This will permanently erase the entire contents of the hard disk, and then restore software preinstalled by Lenovo.  
Press F1 to open BIOS Setup, or Enter to start the Predesktop Area.  
If the computer still does not start, call the Support Center. Telephone numbers are on page “**Worldwide telephone list**” on page 58. |
| 2010: Warning: Your internal hard disk drive (HDD) may not function correctly on this system. Ensure that your HDD is supported on this system and that the latest HDD firmware is installed. | If in the primary drive bay you are using a non-IBM or non-Lenovo hard disk drive (HDD) or an old generation IBM HDD that is not supported by this system, with the risk in mind, you can still use it by pressing ESC. If in the primary drive bay you are using a supported IBM / Lenovo HDD with old firmware, you need to update its firmware to the latest version, available at www.lenovo.com/think/support/ |
| The power-on password prompt | A power-on password or a supervisor password is set. Type the password and press Enter to use the computer. If the power-on password is not accepted, a supervisor password might have been set. Type the supervisor password and press Enter. If you still see the same error message, have the computer serviced. |
| The hard disk password prompt | A hard disk password is set. Type the password and press Enter to use the computer.  
If you still see the same error message, have the computer serviced. |
| Hibernation error | The system configuration changed between the time your computer entered hibernation mode and the time it left this mode, and your computer cannot resume normal operation.  
• Restore the system configuration to what it was before your computer entered hibernation mode.  
• If the memory size has been changed, re-create the hibernation file. |

### Errors without messages

**Problem:**
When I turn on the machine, nothing appears on the screen and the machine does not beep while starting up.

**Note:** If you are not sure whether you heard any beeps, turn off the computer; then turn it on again, and listen again. If you are using an external monitor, refer to “Computer screen problems” on page 20.

**Solution:**
If a power-on password is set, press any key to display the power-on password prompt, and then type the correct password and press Enter.
If the power-on password prompt does not appear, the brightness level might be set to minimum brightness. Adjust the brightness level by pressing the Fn+Home.
If the screen still remains blank, make sure that:
• The battery is installed correctly.
Solving computer problems

- The ac adapter is connected to the computer and the power cord is plugged into a working electrical outlet.
- The computer power is on. (Turn on the power switch again for confirmation.)

If these items are properly set, and the screen remains blank, have the computer serviced.

Problem:
When I turn on the machine, nothing appears on the screen, but I hear two or more beeps.

Solution:
Make sure that the memory card is installed correctly. If it is, but the screen is still blank, and you hear five beeps, have the computer serviced.

If you hear 4 cycles of 4 beeps each, the Security Chip has a problem. Have the computer serviced.

Problem:
When I turn on the machine, only a white pointer appears on a blank screen.

Solution:
Reinstall your operating system, and turn on the computer. If you still see only the pointer on the screen, have the computer serviced.

Problem:
My screen goes blank while the computer is on.

Solution
Your screen saver or power management may be enabled. Move the TrackPoint or press a key to exit the screen saver, or press the power switch to resume from standby or hibernation.

Problem:
The DOS full-screen looks smaller.

Solution:
If you use a DOS application that supports only 640×480 resolution (VGA mode), the screen image might look slightly distorted or appear smaller than the display size. This is to maintain compatibility with other DOS applications. To expand the screen image to the same size as the actual screen, start the ThinkPad Configuration Program and click **LCD**; then enable the Screen expansion function. (The image might still look slightly distorted.)

A password problem

Problem:
I forgot my password.
Solving computer problems

Solution:
If you have registered your computer for Password Reset Service, and you forgot your power-on or hard disk password, you can reset it by pressing the ThinkVantage button at the password prompt.

• If you cannot reset your power-on password, you must take your computer to a Lenovo authorized servicer or a marketing representative to have the password canceled.

• If you cannot reset your hard disk password, Lenovo authorized servicer cannot reset your password or recover data from the hard disk. You must take your computer to a Lenovo authorized servicer or a marketing representative to have the hard disk drive replaced. Proof of purchase is required, and a fee will be charged for parts and service.

If you forgot your supervisor password, Lenovo authorized servicer cannot reset your password. You must take your computer to a Lenovo authorized servicer or a marketing representative to have the system board replaced. Proof of purchase is required, and a fee will be charged for parts and service.

A power switch problem

Problem:
The system does not respond, and you cannot turn off the computer.

Solution:
Turn off the computer by pressing and holding the power switch for 4 seconds or more. If the computer is still not reset, remove the ac adapter and the battery.

Keyboard problems

Problem:
All or some of the keys on the keyboard do not work.

Solution:
If an external numeric keypad or a mouse is connected:
1. Turn off the computer.
2. Remove the external numeric keypad or the mouse.
3. Turn on the computer and try using the keyboard again.

If the keyboard problem is resolved, carefully reconnect the external numeric keypad, external keyboard, or mouse, making sure that you have seated the connectors properly.

If keys on the keyboard still do not work, have the computer serviced.

If the problem occurred immediately after the computer returned from standby mode, enter the power-on password if one has been set.
If an external PS/2® keyboard is connected, the numeric keypad on your computer does not work. Use the numeric keypad on the external keyboard.

Problem:
A number appears when you type a letter.

Solution
The numeric lock function is on. To disable it, press and hold Shift or Fn and then press NmLk (ScrLk).

Problem
Some or all of the keys on the external PS/2 keyboard do not work.

Solution
If you are using the ThinkPad Advanced Dock, the ThinkPad Advanced Mini Dock, or the ThinkPad Essential Port Replicator, make sure that the keyboard cable is correctly connected to the keyboard/mouse Y-connector, and the keyboard/mouse Y-connector is connected to the ThinkPad Advanced Dock, the ThinkPad Advanced Mini Dock, or the ThinkPad Essential Port Replicator.

If the connection is correct, disconnect the cable and make sure that the built-in keyboard operates properly. If the built-in keyboard works, there is a problem with the external PS/2 keyboard. Try using a different external PS/2 keyboard.

UltraNav and TrackPoint problems

Problem:
The pointer drifts when the computer is turned on or after it resumes normal operation.

Solution:
The pointer might drift when you are not using the TrackPoint during normal operation. This is a normal characteristic of the TrackPoint and is not a defect. The pointer drifts for several seconds under the following conditions:
• When the computer is turned on.
• When the computer resumes normal operation.
• When the TrackPoint is pressed for a long time.
• When the temperature changes.

Problem:
The mouse or the pointing device does not work.

Solution:
Make sure that the TrackPoint is enabled in the ThinkPad Configuration Program, and then try using the TrackPoint. If the TrackPoint works, the error might be due to the mouse.
Solving computer problems

Make sure that the mouse or pointing-device cable is securely connected to the ThinkPad Advanced Dock, the ThinkPad Advanced Mini Dock, or the ThinkPad Essential Port Replicator.

If your mouse is incompatible with the PS/2 mouse, disable the TrackPoint, using the ThinkPad Configuration Program.

Note: For more information, see the manual supplied with the mouse.

Standby and hibernation problems

Problem:
The computer enters standby mode unexpectedly.

Solution:
If the processor overheats, the computer automatically enters standby mode to allow the computer to cool and to protect the processor and other internal components. Also, check the settings for standby mode, using Power Manager.

Problem:
The computer enters standby mode immediately after Power-on self-test (POST) (the standby indicator light turns on).

Solution:
Make sure that:
• The battery is charged.
• The operating temperature is within the acceptable range. Refer to “Specifications” on page 69.

If these items are correct, have the computer serviced.

Problem:
The critical low-battery error message is displayed, and the computer immediately turns off.

Solution:
The battery power is getting low. Connect the ac adapter to the computer, or replace the battery with a fully charged one.

Problem:
When you take action to return from standby mode, the computer display remains blank.

Solution:
Check whether an external monitor was disconnected while the computer was in standby mode. Do not disconnect the external monitor while the computer is in standby mode or hibernation mode. If no external monitor is attached when the computer resumes, the computer display remains blank and output is not displayed. This restriction does not depend on the resolution value. Press Fn+F7 to bring up the computer display.
Solving computer problems

Note: If you use the Fn+F7 key combination to apply a presentation scheme, press Fn+F7 at least three times in three seconds, and the image is displayed on the computer screen.

Problem: The computer does not return from standby mode, or the standby indicator stays on and the computer does not work.

Solution: If the system does not return from standby mode, it may have entered standby or hibernation mode automatically because the battery is depleted. Check the standby indicator.
• If the standby indicator is on, your computer is in standby mode. Connect the ac adapter to the computer; then press Fn.
• If the standby indicator is off, your computer is in hibernation mode or power-off state. Connect the ac adapter to the computer; then press power button to resume operation.

If the system still does not return from standby mode, your system may stop responding and you cannot turn off the computer. In this case, you need to reset the computer. If you have not saved your data, it may be lost. To reset the computer, press and hold the power button for 4 seconds or more. If the system is still not reset, remove the ac adapter and the battery.

Problem: Your computer does not enter standby or hibernation mode.

Solution: Check whether any option has been selected that would disable your computer from entering standby or hibernation mode.

Problem: The system does not wake up at the time set on the timer, if the computer is not connected to an ac power source,

–or–

The system does not enter hibernation mode from suspend mode if the computer is not connected to an ac power source.

Solution: The timer-wake-with-battery-operation is disabled by default. If you enable this function, the computer could wake up and begin running while it is being carried; this could lead to damage to the hard disk drive.

With this risk in mind, you can enable the timer-wake-with-battery-operation.

1. Turn your computer off and then on again; then, while the message, “To interrupt normal startup, press the blue ThinkVantage button” is
displayed at the lower left of the screen, press the ThinkVantage button. Rescue and Recovery screen opens.

2. Click **Access BIOS**. The System Restart Required window is displayed.

3. Click **Yes**. The computer restarts, and the BIOS Setup Utility menu appears.

4. With the cursor key, select **Config**; then press Enter. The **Power** submenu is displayed.

5. Select **Timer Wake with Battery Operation** by pressing Enter.

6. With the F5 or F6 key, select **Enabled**; then press Enter.

7. Press F10 and Enter to save this setting and exit this utility.

For information about the BIOS Setup Utility, see “BIOS Setup Utility” in Access Help, your on-board help system.

**Problem:**
The Fn+F12 key combination does not cause the computer to enter hibernation mode.

**Solution:**
The computer cannot enter hibernation mode:

- If you are using one of the communication PC Cards. To enter hibernation mode, stop the communication program, and then remove the PC Card or disable the PC Card slot. Click the **Safely Remove Hardware** icon in the taskbar (for Windows XP) or the **Unplug or Eject Hardware** icon in the taskbar (for Windows 2000).

- If the hibernation mode is not enabled. To enable it, do as follows:
  1. Start the ThinkPad Configuration Program.
  2. Click **Power Management**.
  3. Click the **Hibernate** tab.
  4. Select the hibernate support checkbox.
  5. Click OK.

**Note:** You can enter hibernation mode by pressing Fn+F12 only if the PM driver for Windows 2000 or Windows XP has been installed.

**Computer screen problems**

**Problem:**
The screen is blank.

**Solution:**

- Press Fn+F7 to bring up the image.

**Note:** If you use the Fn+F7 key combination to apply a presentation scheme, press Fn+F7 at least three times in three seconds, and the image is displayed on the computer screen.
If you are using the ac adapter, or using the battery, and the battery status indicator is on (is green), press Fn+Home to make the screen brighter.

If the standby status indicator is on (is green), press Fn to resume from the standby mode.

If you still have the problem, do the Solution in the problem below.

**Problem:**
The screen is unreadable or distorted.

**Solution:**
Make sure that:
- The display device driver is installed correctly.
- The screen resolution and color quality are correctly set.
- The monitor type is correct.

To check these settings, do as follows:
1. Right-click on the desktop, click Properties, then click the Settings tab.
2. Check whether the screen resolution and color quality are correctly set.
3. Click Advanced.
4. Click the Adapter tab.
5. Make sure "Mobile Intel(R) 945GM Express Chipset Family", "ATI Mobility Radeon X1300", or "ATI Mobility Radeon X1400" is shown in the adapter information window.
6. Click the Properties button. Check the "Device status" box and make sure the device is working properly. If not, click the Troubleshooter button.
7. Click the Monitor tab.
8. Make sure the information is correct.
9. Click the Properties button. Check the "Device status" box and make sure the device is working properly. If not, click the Troubleshooter button.

**Problem:**
The screen stays on even after you turn off your computer.

**Solution:**
Press and hold the power switch for 4 seconds or more to turn off your computer; then turn it on again.

**Problem:**
Missing, discolored, or bright dots appear on the screen every time you turn on your computer.

**Solution:**
This is an intrinsic characteristic of the TFT technology. Your computer’s display contains multiple thin-film transistors (TFTs). A small number of missing, discolored, or bright dots on the screen might exist all the time.
Solving computer problems

Battery problems

Problem:
The battery cannot be fully charged by the power-off method in the standard charge time for your computer.

Solution:
The battery might be over-discharged. Do the following:
1. Turn off the computer.
2. Make sure that the over-discharged battery is in the computer.
3. Connect the ac adapter to the computer and let it charge.

If the battery cannot be fully charged in 24 hours, use a new battery.

If the optional Quick Charger is available, use it to charge the over-discharged battery.

Problem:
Your computer shuts down before the battery status indicator shows empty, -or- Your computer operates after the battery status indicator shows empty.

Solution:
Discharge and recharge the battery.

Problem:
The operating time for a fully charged battery is short.

Solution:
Discharge and recharge the battery. If your battery’s operating time is still short, use a new battery.

Problem:
The computer does not operate with a fully charged battery.

Solution:
The surge protector in the battery might be active. Turn off the computer for one minute to reset the protector; then turn on the computer again.

Problem
The battery does not charge.

Solution
You cannot charge the battery when it is too hot. If the battery feels hot, remove it from the computer and allow it to cool to room temperature. After it cools, reinstall it and recharge the battery. If it still cannot be charged, have it serviced.

Hard disk drive problems

Problem:
The hard disk drive makes a rattling noise intermittently.
Solution:
The rattling noise might be heard when:
• The hard disk drive starts accessing the data or when it stops.
• You are carrying the hard disk drive.
• You are carrying your computer.

This is a normal characteristic of a hard disk drive and is not a defect.

Problem:
The hard disk drive does not work.

Solution:
In the startup menu in BIOS Setup Utility, make sure that the hard disk drive is in the "Boot priority order". If it is in the device list of "Excluded from boot order", the hard disk drive is disabled. Move it into the "Boot priority order".

A startup problem

Problem:
The Microsoft® Windows® operating system will not start.

Solution:
Use the Rescue and Recovery workspace to help solve or identify your problem. To open Rescue and Recovery, do the following:
1. Turn off your PC, then turn it on again.
2. Watch the screen carefully while your PC starts. When "To interrupt normal startup, press the blue ThinkVantage button" message is displayed at the lower left of the screen, press the blue ThinkVantage button. The Rescue and Recovery workspace opens.
3. After the Rescue and Recovery workspace opens, you can do the following:
   • **Rescue and Restore** your files, folders, or backups.
   • **Configure** your system settings and passwords.
   • **Communicate** by using the internet and link to the ThinkPad support site.
   • **Troubleshoot** and diagnose problems using diagnostics.

In the top panel of the Rescue and Recovery workspace, you can click the following to open other pages or exit the utility:

**Event Viewer** enables you to view a log that contains information about events, or tasks, associated with Rescue and Recovery operations.

**System Information** enables you to see key hardware and software information about your computer. This information might be valuable when trying to diagnose problems.

**Warranty Status** enables you to see when your warranty expires, the terms of service for your computer, or a list of replacement parts.
Help provides information about the various pages in the Rescue and Recovery workspace.

Restart closes the Rescue and Recovery workspace, and resumes the startup sequence that was interrupted.

Fingerprint authentication problems
If your finger(s) have any of the following conditions, you may not be able to register or authenticate it:
• Your finger is wrinkled.
• Your finger is rough, dry or injured.
• Your finger is very dry.
• Your finger is stained with dirt, mud, or oil.
• The surface of your finger is very different from when you registered your fingerprint.
• Your finger is wet.
• A finger is used that has not been enrolled.

To improve the situation, try the following:
• Clean or wipe your hands to remove any excess dirt or moisture from the fingers.
• Enroll and use a different finger for authentication.
• If your hands are too dry, apply lotion to them.

Other problems
Problem: The computer locks or does not accept any input.

Solution: Your computer might lock when it enters standby mode during a communication operation. Disable the standby timer when you are working on the network.

To turn off the computer, press and hold the power switch for 4 seconds or more.

Problem: The computer does not start from a device you want.

Solution: Refer to the Startup menu of the BIOS Setup Utility. Make sure that the startup sequence in the BIOS Setup Utility is set so that the computer starts from the device you want.

Also make sure that the device from which the computer starts is enabled. In the startup menu in the BIOS Setup Utility, make sure that the device is included in the "Boot priority order" list. If it is included in the "Excluded
from boot order” list, it is disabled. Select the entry for it in the list and press the x key. This moves the entry to the “Boot priority order” list.

**Problem:**
The computer does not respond.

**Solution:**
- IRQs for the PCI are all set as 11. The computer does not respond because it cannot share the IRQ with other devices. Refer to the ThinkPad Configuration Program.

**Problem:**
The computer can not play a CD, or the sound quality is not good.

**Solution:**
- Be sure that the disk meets the standards for your country. Usually, a disk that meets the local standards is marked with a CD logo on the label. If you use a disc that does not meet these standards, we cannot guarantee that it will play, or that, if it does play, the sound quality will be good.

**Problem:**
Playback of DVD is not smooth in Windows 2000.

**Solution:**
- If you select the Maximum Battery mode for the Intel SpeedStep™ technology, this problem may occur. This mode is designed to achieve maximum battery life by switching the processor speed between the regular low speed and half of that speed, depending on how much the processor is used. If the use increases, Intel SpeedStep switches the processor speed to the lower speed. Operation in this mode can severely degrade the performance of the processor, and thus cause the playback of a DVD to be jerky.

To avoid or reduce this problem, you can choose any of three other modes of operation, as follows:

- **Maximum Performance:** Keeps the processor speed high at all times.
- **Automatic:** Switches the processor speed between high and low, depending on how much the processor is used. If the use increases, Intel SpeedStep switches the processor speed to high.
- **Battery Optimized Performance:** Keeps the processor speed low at all times.

To choose a mode, do the following:
1. Start the ThinkPad Configuration Program.
2. Click **Power Management**.
Solving computer problems

3. Click the Intel SpeedStep technology tab.
4. From the list, select the mode you want.
5. Click OK.

Problem:
The computer cannot connect to the local network, shared devices or network printers, but can connect to the Internet.

Solution:
On your desktop, click the Symantec Client Security icon, then click the Symantec Home and Office Networking Wizard icon and follow the instructions.

Problem:
If your operating system is Windows 2000 and you are using a USB 1.x device, then when your computer returns from standby or hibernation mode to normal operation, the “Unsafe Removal of Device” message may appear.

Solution:
You can safely close this message. It is displayed because of the USB 2.0 driver problem on Windows 2000. You can get detailed information in the More Information section of the Microsoft Knowledge Base 328580 and 323754. Visit the Microsoft Knowledge Base homepage at http://support.microsoft.com/, type the number of the knowledge base article you need in the search field, and click the Search button.

Problem:
An application does not run correctly.

Solution:
Make sure that the problem is not being caused by the application.

Check that your computer has the minimum required memory to run the application. Refer to the manuals supplied with the application.

Check the following:
• The application is designed to operate with your operating system.
• Other applications run correctly on your computer.
• The necessary device drivers are installed.
• The application works when it is run on some other computer.

If an error message appears while you are using the application program, refer to the manuals supplied with the application.
Chapter 4. Starting BIOS Setup Utility

Starting BIOS Setup Utility

Your computer provides a program, called BIOS Setup Utility, that enables you to select various setup parameters.

- Config: Set the configuration of your computer.
- Date/Time: Set the date and time.
- Security: Set security features.
- Startup: Set the startup device.
- Restart: Restart the system.

Note: You can set many of these parameters more easily by using the ThinkPad Configuration Program.

To start BIOS Setup Utility, do as follows:

1. To protect yourself against accidental loss of data, back up your data and computer registry. For details see “Data backup-and-restore tools” in Access Help, your on-board help.
2. Remove any diskette from the diskette drive, and then turn off the computer.
3. Turn on the computer; then, while the “To interrupt normal startup, press the blue ThinkVantage button” message is displayed at the lower-left of the screen, press the ThinkVantage button. The Rescue and Recovery workspace opens.
4. Click Access BIOS. The System Restart Required window is displayed.
5. Click Yes. The computer restarts, and BIOS Setup Utility screen appears.

   If you have set a supervisor password, the BIOS Setup Utility menu appears after you enter the password. You can start the utility by pressing Enter instead of entering the supervisor password; however, you cannot change the parameters that are protected by the supervisor password. For more information, refer to the on-board help.
6. Using the cursor keys, move to an item you want to change. When the item you want is highlighted, press Enter. A submenu is displayed.
7. Change the items you wish to change. To change the value of an item, use the F5 or F6 key. If the item has a submenu, you can display it by pressing Enter.
8. Press F3 or Esc to exit from the submenu. If you are in a nested submenu, press Esc repeatedly until you reach the BIOS Setup Utility menu.
Starting BIOS Setup Utility

**Note:** If you need to restore the settings to their original state as of the time of purchase, press F9 key to load the default settings. You can also select an option in the Restart submenu to load the default settings or discard the changes.

9. Select Restart; then press Enter. Move the cursor to the option you want for restarting your computer; then press Enter. Your computer restarts.
Chapter 5. Installing a new operating system

Before you install the operating system see the "Installing a new operating system" section of Access Help, and make sure that you do the following:

• Print the sections of Access Help you will be using. Go to the section for the operating system you are using.
• Copy all the subdirectories and files in the C:\IBMTOOLS or the C:\SWTOOLS directory to a removable storage device, because you will need them during the installation.

Installing Windows XP

If you are installing Windows XP Service Pack 1 on a computer with a dual-core processor, disable Core Multi-Processing before starting the installation as follows:

1. Start the BIOS Setup Utility.
2. Select Config. The Config submenu opens.
3. Select CPU. The CPU submenu opens.
4. For Core Multi-Processing, select Disabled.
5. Press F10.

To install Windows XP and its related software on your computer, do as follows:

Before installing the operating system, install Intel® Matrix Storage Manager Driver, as follows:

Note

Be sure to install Intel Matrix Storage Manager Driver before installing the operating system. Otherwise your computer will not respond; it will only display a blue screen.

1. Attach a diskette drive to your computer.
2. Copy Intel Matrix Storage Manager Driver from C:\IBMTOOLS\DRIVERS\IMSM or C:\SWTOOLS\DRIVERS\IMSM to a diskette.
3. To make sure that SATA AHCI is enabled, start the BIOS Setup Utility menu.
4. Select Config.
Installing a new operating system

5. Select Serial ATA (SATA). Select AHCI.
6. Select AHCI.
7. Change the startup sequence of your computer. Following the instructions on the Startup menu in the BIOS Setup Utility, set the CD-ROM drive to start first.
8. Insert the CD for Windows XP into the CD or DVD drive, and restart the computer.
9. To install a third-party SCSI or RAID driver first, press F6.
10. When prompted, select S for Specify Additional Device.
11. When prompted, insert the diskette that you created in step 2 on page 29 and press Enter.
12. Select Intel 82801 GBM SATA AHCI Controller (Mobile ICH7M), and press Enter.
13. To continue the installation, press Enter again. Leave the diskette in the drive until the next reboot; the software may need to be copied from the diskette again when the files are copied during setup.
14. If you have not yet installed Windows XP Service Pack 2, visit the Microsoft Web site at http://www.microsoft.com/windowsxp/downloads/
15. Download Windows XP Service Pack 2 from the Web site. To install it, follow the instructions in the readme file.
16. In the device listing on the Device Manager window, a yellow mark may appear at the left side of the Universal Serial Bus (USB) controller. If it does appear, open its properties and click the Reinstall driver button to install the USB2.0 driver.
17. Restore C:\IBMTOOLS or C:\SWTOOLS from the backup copy you made before starting the installation.
18. Run the Intel Chipset Support 5 for Windows 2000/XP. To do this, run infinst_auto1.exe in either C:\IBMTOOLS\OSFIXES\INTELINF\ or C:\SWTOOLS\OSFIXES\INTELINF\.
19. Apply the PCMCIA Power Policy Registry Patch. To do this, go to either C:\IBMTOOLS\OSFIXES\PCMCIAPW\ or C:\SWTOOLS\OSFIXES\PCMCIAPW\, double-click install.bat. Then follow the instructions that appear on the screen.
20. Install device drivers. They are provided in either the C:\IBMTOOLS\DRIVERS or the C:\SWTOOLS\DRIVERS directory on your hard disk drive. To see how to install them, refer to Installing device drivers. You will also need to install application software, which is provided in either the C:\IBMTOOLS\APPS or the C:\SWTOOLS\APPS directory on your hard disk drive.
Installing a new operating system

**Note:** If you cannot find the Supplement files, device drivers, and application software you need on your hard disk drive, or if you want to receive updates and the latest information about them, refer to the ThinkPad Web site, http://www.lenovo.com/think/support/site.wss/TPAD-MATRIX.html

If you do not have a diskette drive, you can install Intel Matrix Storage Manager Driver by the following alternative procedure:

**Note**
If you select AHCI for Serial ATA (SATA) in the BIOS Setup Utility before installing Intel Matrix Storage Manager Driver, your computer will not respond; it will only display a blue screen.

1. Start the BIOS Setup Utility menu.
2. Select Config.
4. Select Compatibility.
5. Change the startup sequence of your computer. Following the instructions on the Startup menu in the BIOS Setup Utility, set the CD-ROM drive to start first.
6. Insert the CD for Windows XP into the CD or DVD drive, and restart the computer.
7. If you have not yet installed Windows XP Service Pack 2, visit the Microsoft Web site at http://www.microsoft.com/windowsxp/downloads/
8. Download Windows XP Service Pack 2 from the Web site. To install it, follow the instructions in the readme file.
10. Download Intel Matrix Storage Manager Driver from the Web site. To install it, follow the instructions for clean installation in the readme file.
11. Run Intel Matrix Storage Manager Driver. To do this, go to C:\DRIVERS\WIN\SATA\PREPARE, and double-click install.cmd.
12. Turn the computer off and then on again.
13. Start the BIOS Setup Utility menu.
15. Select Serial ATA (SATA).
16. Select AHCI.
Installing a new operating system

18. Click No, not this time, and then click Next.
19. Select Install from a list or specific location (Advanced), and then click Next.
20. Select Search for the best driver in these locations. Then select Include this location in the search:, specify the path, C:\DRIVERS\WIN\SATA, and click Next. The Completing the Found New Hardware Wizard appears.
21. Click Finish.
22. When the System Settings Change window appears, click Yes. The computer restarts.
23. In the device listing on the Device Manager window, a yellow mark may appear at the left side of the Universal Serial Bus (USB) controller. If it does appear, open its properties and click the Reinstall driver button to install the USB2.0 driver.
24. Restore C:\IBMTOOLS or C:\SWTOOLS from the backup copy you made before starting the installation.
25. Run the Intel Chipset Support 5 for Windows 2000/XP. To do this, run infinst_autol.exe in either C:\IBMTOOLS\OSFIXES\INTELINF\ or C:\SWTOOLS\OSFIXES\INTELINF\.
26. Apply the PCMCIA Power Policy Registry Patch. To do this, go to either C:\IBMTOOLS\OSFIXES\PCMCIAPW\ or C:\SWTOOLS\OSFIXES\PCMCIAPW\, double-click install.bat, and then follow the instructions that appear on the screen.
27. Install device drivers. They are provided in either the C:\IBMTOOLS\DRIVERS or the C:\SWTOOLS\DRIVERS directory on your hard disk drive. To see how to install them, refer to Installing device drivers. You will also need to install application software, which is provided in either the C:\IBMTOOLS\APPS or the C:\SWTOOLS\APPS directory on your hard disk drive.

Note: If you cannot find the Supplement files, device drivers, and application software you need on your hard disk drive, or if you want to receive updates and the latest information about them, refer to the ThinkPad Web site, http://www.lenovo.com/think/support/site.wss/TPAD-MATRIX.html

Installing the Windows XP Update Module Package

The Windows XP Update Modules are in one of the following directories:
C:\IBMTOOLS\OSFIXES\WXPUP
or
The name of each subfolder is the number of a fix module. For information about each fix module, visit the Microsoft Knowledge Base homepage at http://support.microsoft.com/, type the number of the fix module you need in the search field, and click the Search button.

**Note:** The Web site address might change without notice. If the homepage is not displayed, search for it from the Microsoft top page.

To install a fix module, run the .exe file in a subfolder and follow the instructions on the screen.

**Note:** If you remove the hard disk drive from the computer with a single-core processor and install it on a computer with a dual-core processor, you can get access to the hard disk drive. The opposite, however, is not true: If you remove the hard disk drive from a computer with a dual-core processor and install it on a computer with a single-core processor, you cannot get access to the hard disk drive.

---

**Installing Windows 2000**

If you are installing Windows 2000 on a computer with a dual-core processor, disable Core Multi-Processing before starting the installation as follows:

1. Start the BIOS Setup Utility.
2. Select Config. The Config submenu opens.
3. Select CPU. The CPU submenu opens.
4. For Core Multi-Processing, select Disabled.
5. Press F10.

To install Windows 2000 and its related software on your computer, do as follows:

Before installing the operating system, install Intel Matrix Storage Manager Driver, as follows:
Installing a new operating system

**Note**
Be sure to install Intel Matrix Storage Manager Driver before installing the operating system. Otherwise your computer will not respond; it will only display a blue screen.

1. Attach a diskette drive to your computer.
2. Copy Intel Matrix Storage Manager Driver from C:\IBMTOOLS\DRIVERS\IMSM or C:\SWTOOLS\DRIVERS\IMSM to a diskette.
3. To make sure that SATA AHCI is enabled, start the BIOS Setup Utility menu.
4. Select Config.
5. Select Serial ATA (SATA).
6. Select AHCI.
7. Change the startup sequence of your computer. Following the instructions on the Startup menu in the BIOS Setup Utility, set the CD-ROM drive to start first.
8. Insert the CD for Windows 2000 into the CD or DVD drive, and restart the computer. Follow the instructions on the screen.
9. To install a third-party SCSI or RAID driver first, press F6.
10. When prompted, select S for Specify Additional Device.
11. When prompted, insert the diskette that you created in step 2 and press Enter.
12. Select Intel 82801 GBM SATA AHCI Controller (Mobile ICH7M), and press Enter.
13. To continue the installation, press Enter again. Leave the diskette in the drive until the next reboot; the software may need to be copied from the diskette again when the files are copied during setup.

**Note:** If you install any anti-virus application before installing the service pack, uninstall the anti-virus application. After installing the service pack, re-install the anti-virus application.
16. In the device listing on the Device Manager window, a yellow mark may appear at the left side of the Universal Serial Bus (USB) controller. If it does appear, open its properties and click the Reinstall driver button to install the USB2.0 driver.

17. Restore C:\IBMTOOLS or C:\SWTOOLS from the backup copy you made before starting the installation.

18. Run the Intel Chipset Support 5 for Windows 2000/XP. To do this, run infinst_autol.exe in either C:\IBMTOOLS\OSFIXES\INTELINF\ or C:\SWTOOLS\OSFIXES\INTELINF\.

**Note:** If you cannot find this directory on your hard disk drive, download the Intel Chipset Support 5 for Windows 2000/XP from the ThinkPad Web site at http://www.lenovo.com/think/support/site.wss/TPAD-MATRIX.html

19. Follow the instructions for the Install shield program.

20. Install Windows 2000 device drivers and application software by referring to its procedure.

**Note:** If you cannot find the Supplement files, device drivers, and application software you need on your hard disk drive, or if you want to receive updates and the latest information about them, refer to the ThinkPad Web site at http://www.lenovo.com/think/support/site.wss/TPAD-MATRIX.html

If you do not have a diskette drive, you can install Intel Matrix Storage Manager Driver by the following alternative procedure:

**Note**

If you select AHCI for Serial ATA (SATA) in the BIOS Setup Utility before installing Intel Matrix Storage Manager Driver, your computer will not respond; it will only display a blue screen.

**Note:**

1. Start the BIOS Setup Utility menu.
2. Select Config.
4. Select Compatibility.
5. Change the startup sequence of your computer. Following the instructions on the Startup menu in the BIOS Setup Utility, set the CD-ROM drive to start first.
6. Insert the CD for Windows 2000 into the CD or DVD drive, and restart the computer. Follow the instructions on the screen.

**Note:** If you install any anti-virus application before installing the service pack, uninstall the anti-virus application. After installing the service pack, re-install the anti-virus application.

10. Download Intel Matrix Storage Manager Driver from the Web site. To install it, follow the instructions for clean installation in the readme file.

11. Run Intel Matrix Storage Manager Driver. To do this, go to C:\DRIVERS\WIN\SATA\PREPARE, and double-click install.cmd.

12. Turn the computer off and then on again.

13. Start the BIOS Setup Utility menu.

15. Select Serial ATA (SATA).

16. Select AHCI.

18. Click Next.

19. Select Search for a suitable driver for my device (recommended), and then click Next.

20. Select Specify a location, and then click Next.

21. Specify the path, C:\DRIVERS\WIN\SATA, and click OK. The Driver Files Search Results window appears.

22. Click Next. The Completing the Found New Hardware Wizard appears.

23. Click Finish.

24. When the System Settings Change window appears, click Yes. The computer restarts.

25. In the device listing on the Device Manager window, a yellow mark may appear at the left side of the Universal Serial Bus (USB) controller. If it does appear, open its properties and click the Reinstall driver button to install the USB2.0 driver.

26. Restore C:\IBMTOOLS or C:\SWTOOLS from the backup copy you made before starting the installation.
Installing a new operating system

27. Run the Intel Chipset Support 5 for Windows 2000/XP. To do this, run infinst_autol.exe in either C:\IBMTOOLS\OSFIXES\INTELINF\ or C:\SWTOOLS\OSFIXES\INTELINF\.

   **Note:** If you cannot find this directory on your hard disk drive, download the Intel Chipset Support 5 for Windows 2000/XP from the ThinkPad Web site at http://www.lenovo.com/think/support/site.wss/TPAD-MATRIX.html

28. Follow the instructions for the Install shield program.

29. Install Windows 2000 device drivers and application software by referring to its procedure.

After you install Windows 2000 Service Pack 4, you will need to install device drivers; they are provided in either the C:\IBMTOOLS\DRIVERS or the C:\SWTOOLS\DRIVERS directory on your hard disk drive. To see how to install them, refer to Installing device drivers. You will also need to install application software which is provided in either the C:\IBMTOOLS\APPS or the C:\SWTOOLS\APPS directory on your hard disk drive.

If you cannot find the Supplement files, device drivers, and application software you need on your hard disk drive, or if you want to receive updates and the latest information about them, refer to the ThinkPad Web site at http://www.lenovo.com/think/support/site.wss/TPAD-MATRIX.html

**TI CardBus Controller Support**

If your computer does not have a 1394 port, follow the instructions.

1. Open the System Properties window.
2. Click the Hardware tab.
3. Click the Device Manager button. The Device Manager window opens.
4. Double-click the PCMCIA adapter. If "Generic CardBus Controller" is listed, go to the next step. If it is not listed, you do not need to install TI CardBus Controller Support. Stop this procedure.

   **Note:** To download it, visit this Web site and follow the instructions on the screen. http://www.lenovo.com/think/support/site.wss/TPAD-MATRIX.html

**Installing the Windows 2000 Update Module Package**

The Windows 2000 Update Modules are in one of the following directories:

C:\IBMTOOLS\OSFIXES\W2KUP

or
Installing a new operating system

C:\SWTOOLS\OSFIXES\W2KUP

The name of each subfolder is the number of a fix module. For information about each fix module, visit the Microsoft Knowledge Base homepage at http://support.microsoft.com/, type the number of the fix module you need in the search field, and click the Search button.

Note: The Web site address might change without notice. If the homepage is not displayed, search for it from the Microsoft top page.

To install a fix module, run the .exe file in a subfolder and follow the instructions on the screen.
Chapter 6. Recovery options

Introducing Rescue and Recovery

If Windows is not running properly, you may need to do the following:

- Get the current system information.
- Diagnose and troubleshoot a problem.
- Rescue a file from your Windows environment or restore backed-up files, provided you have made backups by use of the Rescue and Recovery program.
- Configure your computer or start the BIOS Setup Utility.

All this can be achieved from the ThinkVantage Rescue and Recovery workspace. Turn on your computer, and, when the following message is displayed, press the ThinkVantage button: “To interrupt normal startup, press the blue ThinkVantage button.” The ThinkVantage Rescue and Recovery workspace opens. For more information about using Rescue and Recovery features, see the “Recovery overview” section of the Access Help.

Restoring factory contents

Instead of providing a recovery CD or a Windows® CD with your computer, Lenovo provides simpler methods of accomplishing the tasks typically associated with these CDs. The files and programs for these alternative methods are on your hard disk, which eliminates having to locate misplaced CDs and problems associated with using an incorrect CD version.

The complete backup of all the files and programs that Lenovo preinstalled on your computer resides in a hidden protected area, or partition, of the hard disk. Although hidden, the backups in the partition consume hard disk space. Therefore, when checking the capacity of your hard disk according to Windows, you might note that the total capacity of the disk appears to be smaller than anticipated. This discrepancy is explained by the contents of the hidden partition.

The Product Recovery Program contained within this area enables you to restore the complete contents of your hard disk to the same state as it was when originally shipped from the factory.

To recover the hard disk to its original contents, do the following:
Recovery options

Notes:
1. If the optical drive is not attached to your ThinkPad computer during recovery, DVD software and CD-recording software will not be installed. To ensure that they will be installed correctly, install the optical drive in the Ultrabay Enhanced before performing a recovery operation.
2. The recovery process might take up to 2 hours.

Attention: All of the files on the primary hard disk partition (usually drive C) will be lost in the recovery process. However, before any data is overwritten, you will be given the opportunity to save one or more files to other media.
1. If possible, save all your files and shut down your operating system.
2. Turn off your computer for at least 5 seconds.
3. Turn on your computer. Watch the display carefully. While the message, “To interrupt normal startup, press the blue ThinkVantage button” is displayed, press the ThinkVantage button. The ThinkVantage Rescue and Recovery workspace opens.
4. Click Restore your system and follow the instructions on the screen.

Recovering data

If you performed a backup operation using the Rescue and Recovery program, you also have one or more backups stored that reflect the contents of the hard disk as it existed at various points in time. These backups might be stored on your hard disk, or a network drive, or on removable media, depending on the options you selected during the backup operation.

You can use either the Rescue and Recovery program or the Rescue and Recovery workspace to restore the contents of the hard disk to an earlier state using any of the stored backups. The Rescue and Recovery workspace runs independently of the Windows operating system. Therefore, you can start it by pressing the blue ThinkVantage button when prompted during startup.

After the Rescue and Recovery workspace opens you can perform a recovery operation, even if you are unable to start Windows.
Chapter 7. Upgrading and replacing devices

Replacing the battery

Important
Read Safety and Warranty Guide before replacing the battery.

1. Turn off the computer, or enter hibernation mode. Then disconnect the ac adapter and all cables from the computer.

   Note: If you are using a PC Card or Secure Digital Card, the computer might not be able to enter hibernation mode. If this happens, turn off the computer.

2. Close the computer display, and turn the computer over.
3. Slide and hold the battery latch 1; then remove the battery 2.

4. Align the front of a fully charged spare battery with the front side of the battery space in the computer; then gently push the battery into the space.
Replacing the battery

5. Slide the battery latch to the lock position.

6. Turn the computer over again. Connect the ac adapter and the cables to the computer.

Upgrading the hard disk drive

You can increase the storage capacity of your computer by replacing the hard disk drive with one of greater capacity. You can purchase a new hard disk drive from your reseller or Lenovo marketing representative.

Notes:
1. Replace the hard disk drive only if you upgrade it or have it repaired. The connectors and bay of the hard disk drive were not designed for frequent changes, or drive swapping.
2. The Rescue and Recovery workspace and the Product Recovery program are not included in the optional hard disk drive.
Attention

Handling a hard disk drive

- Do not drop the drive or subject it to physical shocks. Put the drive on a material, such as soft cloth, that absorbs the physical shock.
- Do not apply pressure to the cover of the drive.
- Do not touch the connector.

The drive is very sensitive. Incorrect handling can cause damage and permanent loss of data on the hard disk. Before removing the hard disk drive, make a backup copy of all the information on the hard disk, and then turn the computer off. Never remove the drive while the system is operating, in standby mode, or in hibernation mode.

Important

Read Safety and Warranty Guide before replacing the hard disk drive.

To replace the hard disk drive, do the following.

1. **Turn off the computer;** then disconnect the ac adapter and all cables from the computer.
2. Close the computer display, and turn the computer over.
3. Remove the battery.
4. Remove the screw that secures the hard disk drive 1 and remove the cover 2.

For models with 14.1-inch LCD:
Upgrading the hard disk drive

For models with 15.0-inch LCD:

5. Remove the hard disk by pulling out the tab.

For models with 14.1-inch LCD:
For models with 15.0-inch LCD:

6. Detach the side rubber rails from the hard disk drive.

7. Attach the side rubber rails to a new hard disk drive.
8. Insert the hard disk drive into the hard disk drive bay; then firmly slide it into place.
9. Reinstall the cover of the bay, and reinstall the screw.
10. Reinstall the battery.
11. Turn the computer over again. Connect the ac adapter and the cables to the computer.
Replacing memory

Increasing memory capacity is an effective way to make programs run faster. You can increase the amount of memory in your computer by installing a double data rate 2 (DDR2) synchronous dynamic random access memory (DRAM) unbuffered small outline dual inline memory module (SO-DIMM), available as an option, in the memory slot of your computer. SO-DIMMs with different capacities are available.

Note: Use only the memory types supported by your computer. If you incorrectly install the optional memory or install an unsupported memory type, a warning beep will sound when you try to start the computer.

Important
Read Safety and Warranty Guide before replacing the memory.

To install an SO-DIMM, do the following:
1. Touch a metal table or a grounded metal object. This action reduces any static electricity in your body, that could damage the SO-DIMM. Do not touch the contact edge of the SO-DIMM.
2. Turn off the computer; then disconnect the ac adapter and all cables from the computer.
3. Close the computer display, and turn the computer over.
4. Remove the battery.
5. Remove the screws that secure the palm rest.
6. Turn the computer over and gently flip out the palm rest.

   **Note:** If your computer is one of the ThinkPad R60 Series, take care not to damage the touch pad cable.

7. Remove the memory cover.
Replacing memory

8. If two SO-DIMMs are already installed in the memory slot, remove one of them to make room for the new one by pressing out on the latches on both edges of the socket at the same time 1. Be sure to save it for future use 2.

9. With the notched end of the SO-DIMM toward the contact edge side of the socket, firmly insert the SO-DIMM into the socket at an angle of about 20 degrees 1; then pivot it downward until it snaps into place 2.

10. Reinstall the memory cover and palm rest.
11. Close the computer display, and turn the computer over; then replace the screws that secure the palm rest.
12. Reinstall the battery.
13. Turn the computer over again, and re-connect the ac adapter and the cables to the computer.

To make sure that the SO-DIMM is installed correctly, do as follows:
1. Turn the computer on.
2. While the “To interrupt normal startup, press the blue ThinkVantage button” message is displayed at the lower-left of the screen, press the ThinkVantage button. ThinkVantage Rescue and Recovery screen opens.
3. Click Access BIOS. The System Restart Required window is displayed.
4. Click Yes. The computer restarts, and the BIOS Setup Utility screen opens. The “Installed memory” item shows the total amount of memory installed in your computer. For example, if your computer has 256 MB of memory and you install a 256-MB SO-DIMM in it, the quantity shown in “Installed memory” should be 512 MB.
Replacing memory
Chapter 8. Getting help and service

Getting help and service

If you need help, service, technical assistance, or just want more information about ThinkPad computers, you will find a wide variety of sources available from Lenovo to assist you. This section contains information about where to go for additional information about ThinkPad computers, what to do if you experience a problem with your computer, and whom to call for service should it be necessary.

Microsoft Service Packs are the latest software source for Windows product updates. They are available via Web download (connection charges may apply) or via CD-ROM. For more specific information and links, go to support.microsoft.com/directory/. For technical assistance with installation of, or questions related to, Service Packs for your preloaded Microsoft Windows product, refer to the Microsoft Product Support Services Web site at http://support.microsoft.com/directory/, or you can contact Customer Support Center at the phone number(s) listed in “Worldwide telephone list” on page 58. Some fees might apply.

Getting help on the Web

The Lenovo Web site on the World Wide Web has up-to-date information about ThinkPad computers and support. The address for the Personal Computing home page is www.lenovo.com/think/

You can find support information for your ThinkPad computer at www.lenovo.com/think/support/. Research this Web site to learn how to solve problems, find new ways to use your computer, and learn about options that can make working with your ThinkPad computer even easier.

Calling the Customer Support Center

If you have tried to correct the problem yourself and still need help, during the warranty period, you can get help and information by telephone through the Customer Support Center. The following services are available during the warranty period:

- Problem determination - Trained personnel are available to assist you with determining if you have a hardware problem and deciding what action is necessary to fix the problem.
**Getting help and service**

- Lenovo hardware repair - If the problem is determined to be caused by Lenovo hardware under warranty, trained service personnel are available to provide the applicable level of service.

- Engineering change management - Occasionally, there might be changes that are required after a product has been sold. Lenovo or your reseller, if authorized by Lenovo, will make selected Engineering Changes (ECs) available that apply to your hardware.

The following items are not covered:
- Replacement or use of parts not manufactured for or by Lenovo or nonwarranted parts

**Note:** All warranted parts contain a 7-character identification in the format FRU XXXXXXX
- Identification of software problem sources
- Configuration of BIOS as part of an installation or upgrade
- Changes, modifications, or upgrades to device drivers
- Installation and maintenance of network operating systems (NOS)
- Installation and maintenance of application programs

To determine if your machine is in warranty and when the warranty expires, go to www.lenovo.com/think/support/, and click **Warranty**, then follow the instructions on the screen.

Refer to your Lenovo hardware warranty for a full explanation of Lenovo warranty terms. Be sure to retain your proof of purchase to obtain warranty service.

If possible, be near your computer when you make your call in case the technical assistance representative needs to help you resolve a computer problem. Please ensure that you have downloaded the most current drivers and system updates, run diagnostics, and recorded information before you call. When calling for technical assistance, please have the following information available:
- Machine Type and Model
- Serial numbers of your computer, monitor, and other components, or your proof of purchase
- Description of the problem
- Exact wording of any error messages
- Hardware and software configuration information for your system

The telephone numbers for your Customer Support Center location are located in the **Worldwide telephone list** section of this guide.

**Note:** Telephone numbers are subject to change without notice. For the latest list of Customer Support Center telephone numbers and hours of
operation, visit the Support Web site at www.lenovo.com/think/support/. If the number for your country or region is not listed, contact your Lenovo reseller or Lenovo marketing representative.

Getting help around the world

If you travel with your computer or relocate it to a country where your ThinkPad machine type is sold, your computer might be eligible for International Warranty Service, which automatically entitles you to obtain warranty service throughout the warranty period. Service will be performed by service providers authorized to perform warranty service.

Service methods and procedures vary by country, and some services might not be available in all countries. International Warranty Service is delivered through the method of service (such as depot, carry-in, or on-site service) that is provided in the servicing country. Service centers in certain countries might not be able to service all models of a particular machine type. In some countries, fees and restrictions might apply at the time of service.

To determine whether your computer is eligible for International Warranty Service and to view a list of the countries where service is available, go to www.lenovo.com/think/support/, click Warranty, and follow the instructions on the screen.
Getting help and service
Appendix A. Warranty information

Warranty Information

This Appendix provides information regarding the warranty period and type of warranty service applicable to your Machine in your country or region. For the terms and conditions of the Statement of Limited Warranty that applies to your Machine, refer to Chapter 2, Warranty Information in the Safety and Warranty Guide included with your Machine.

Warranty Period

The warranty period may vary by country or region and is specified in the table below. NOTE: "Region" means either Hong Kong or Macau Special Administrative Region of China.

A warranty period of 3 years on parts and 1 year on labor means that Lenovo provides warranty service without charge for:

a. parts and labor during the first year of the warranty period; and

b. parts only, on an exchange basis, in the second and third years of the warranty period. Your Service Provider will charge you for any labor provided in performance of the repair or replacement(s) in the second and third year of warranty period.

**Types of Warranty Service**

If required, your Service Provider will provide repair or exchange service depending on the type of warranty service specified for your Machine in the above table and as described below. Scheduling of service will depend upon the time of your call and is subject to parts availability. Service levels are response time objectives and are not guaranteed. The specified level of warranty service may not be available in all worldwide locations, additional charges may apply outside your Service Provider’s normal service area, contact your local Service Provider representative or your reseller for country and location specific information.

1. **Customer Replaceable Unit ("CRU") Service**

   Lenovo will ship CRUs to you for you to install, Tier 1 CRUs are easy to install whereas Tier 2 CRUs require some technical skill and tools. CRU information and replacement instructions are shipped with your Machine and are available from Lenovo at any time on your request. You may request that a Service Provider install CRUs, at no additional charge, under the type of warranty service designated for your Machine. Lenovo specifies in the materials shipped with a replacement CRU whether a
defective CRU must be returned. When return is required, 1) return instructions and a container are shipped with the replacement CRU, and 2) you may be charged for the replacement CRU if Lenovo does not receive the defective CRU within 30 days of your receipt of the replacement.

2. **On-site Service**
   Your Service Provider will either repair or exchange the failing Machine at your location and verify its operation. You must provide suitable working area to allow disassembly and reassembly of the Lenovo Machine. The area must be clean, well lit and suitable for the purpose. For some Machines, certain repairs may require sending the Machine to a designated service center.

3. **Courier or Depot Service** *
   You will disconnect the failing Machine for collection arranged by your Service Provider. A shipping container will be provided to you for you to return your Machine to a designated service center. A courier will pick up your Machine and deliver it to the designated service center. Following its repair or exchange, the service center will arrange the return delivery of the Machine to your location. You are responsible for its installation and verification.

4. **Customer Carry-In or Mail-In Service**
   You will deliver or mail as your Service Provider specifies (prepaid unless specified otherwise) the failing Machine suitably packaged to a designated location. After the Machine has been repaired or exchanged, it will be made available for your collection or, for Mail-in Service, the Machine will be returned to you at Lenovo’s expense, unless your Service Provider specifies otherwise. You are responsible for the subsequent installation and verification of the Machine.

5. **CRU and On-site Service**
   This type of Warranty Service is a combination of Type 1 and Type 2 (see above).

6. **CRU and Courier or Depot Service**
   This type of Warranty Service is a combination of Type 1 and Type 3 (see above).

7. **CRU and Customer Carry-In or Mail-In Service**
   This type of Warranty Service is a combination of Type 1 and Type 4 (see above).

When a 5, 6 or 7 type of warranty service is listed, your Service Provider will determine which type of warranty service is appropriate for the repair.

* This type of service is called ThinkPad EasyServ or EasyServ in some countries.
To obtain warranty service, contact a Service Provider. In Canada or the United States, call 1-800-IBM-SERV (426-7378). In other countries, see the telephone numbers below.

**Worldwide telephone list**

Phone numbers are subject to change without notice. For the most current phone numbers, go to [http://www.lenovo.com/think/support](http://www.lenovo.com/think/support) and click **Support phone list**.

You can find instructions for replacing CRUs in Access Help. To open Access Help, click **Start**, move the pointer to **All Programs** (in Windows other than Windows XP, **Programs**); then to **ThinkVantage**. Click Access Help.
If you are unable to access these instructions or if you have difficulty replacing a CRU, you can use either of the following additional resources:

- The Online Hardware Maintenance Manual and Online Videos available on the Support Web site

- The Customer Support Center. For the telephone number of the Support Center for your country or region, see “Worldwide telephone list” on page 58.
Appendix C. Overview of your ThinkPad computer

Your ThinkPad at a glance

Front view

- System-status indicators
- ThinkVantage button
- TrackPoint
- Touch pad
- Fingerprint reader
- Ultrabay Enhanced
- USB connectors
- Power-status indicators
- TV-out connector
- Computer display
Your ThinkPad at a glance

Rear view

- ExpressCard/PC Card slot
- USB connector
- Headphone jack
- Microphone jack
- Ethernet connector
- Modem connector
- External monitor connector
- IEEE 1394 connector

Power jack
Features

Processor
• See the system properties of your computer. You can do this as follows: right-click My Computer on your desktop, and select Properties from the pull down menu.

Memory
• PC2-5300 double data rate II (DDR2) synchronous dynamic random access memory (DRAM)

Storage device
• 2.5-inch Serial ATA hard disk drive

Display
The color display uses TFT technology:
• Size: 14.1 inch
• Resolution:
  – LCD: 1024-by-768 or 1400-by-1050
  – External monitor: Up to 2048-by-1536
• Size: 15.0 inch
• Resolution:
  – LCD: 1024-by-768 or 1400-by-1050
  – External monitor: Up to 2048-by-1536
• Brightness control

Keyboard
• Fingerprint reader (on some models)
• 89-key, 90-key, or 93-key
• Forward and Backward keys
• TrackPoint®
• UltraNav® (on some models)
• Fn key function
• ThinkVantage button
• Volume control buttons
• ThinkLight®

External interface
• External-monitor connector
• ExpressCard/PC Card slots (the upper slot: ExpressCard, the lower slot: Type I or Type II PC Card) (on some models)
• IEEE 1394 connector (on some models)
• Stereo headphone jack
• Microphone jack
• 3 Universal Serial Bus (USB) connectors
• Video-out connector (S-Video) (on some models)
Features

- RJ11 telephone connector
- RJ45 Ethernet connector
- Docking connector (on some models)
- Ultrabay™ Enhanced (on some models)
- Integrated wireless LAN feature (on some models)
- Integrated Bluetooth feature (on some models)
- Integrated wireless WAN feature (on some models)
Specifications

Size
- 14.1 inch
  - Width: 314 mm (12.36 in.)
  - Depth: 260 mm (10.24 in.)
  - Height: 34.3 mm – 37.2 mm (1.35 in. – 1.46 in.)
- 15.0 inch
  - Width: 332 mm (13.07 in.)
  - Depth: 269 mm (10.59 in.)
  - Height: 37.3 mm – 40.2 mm (1.47 in. – 1.58 in.)

Environment
- Maximum altitude without pressurization: 3048 m (10,000 ft)
- Temperature
  - At altitudes up to 2438 m (8000 ft)
    - 5° to 35°C (41° to 95°F)
  - At altitudes above 2438 m (8000 ft)
    - Maximum operating temperature, 31.3°C (88°F)

Note: When you charge the battery pack, its temperature must be at least 10°C (50°F).
- Relative humidity:
  - Operating with no optical disk drive (or DVD drive) in the drive: 5% to 95%
  - Operating with an optical disk drive (or DVD drive) in the drive: 8% to 80%

Heat output
- 90 W (307 Btu/hr) maximum
  —or—
- 65 W (222 Btu/hr) maximum
  (depending on the model)

Power source (ac adapter)
- Sine-wave input at 50 to 60 Hz
- Input rating of the ac adapter: 100-240 V ac, 50 to 60 Hz

Battery pack
- ThinkPad R60 Series 6 Cell Lithium-ion (Li-Ion) battery pack
  - Nominal voltage: 10.8 V dc
  - Capacity: 5.2 AH
- ThinkPad R60 Series 9 Cell Li-Ion battery pack
  - Nominal voltage: 10.8 V dc
  - Capacity: 7.8 AH
Specifications
Appendix D. Wireless related information

Wireless Interoperability

Wireless LAN PCI Express Mini Card is designed to be interoperable with any wireless LAN product that is based on Direct Sequence Spread Spectrum (DSSS) radio technology and/or Orthogonal Frequency Division Multiplexing (OFDM) radio technology, and is compliant to:

- The IEEE 802.11a/b/g Standard on Wireless LANs, as defined and approved by the Institute of Electrical and Electronics Engineers.
- The Wireless Fidelity (WiFi) certification as defined by the Wi-Fi Alliance.

*Bluetooth* Daughter Card is designed to be interoperable with any *Bluetooth* product that is compliant to *Bluetooth* Specification 2.0 + EDR as defined by the *Bluetooth* SIG. Following profiles are supported by *Bluetooth* Daughter Card:

- Generic Access
- Service Discovery
- Serial Port
- Dialup Networking
- FAX
- LAN Access using PPP
- Personal Area Network
- Generic Object Exchange
- Generic Object Push
- File Transfer
- Synchronization
- Audio Gateway
- Headset
- Printer
- Human Interface Device (Keyboard/Mouse)
- Basic Image
- Handsfree
- AV Profile
Usage environment and your Health

Wireless LAN PCI Express Mini Card and Bluetooth Daughter Card emit radio frequency electromagnetic energy like other radio devices. However, the level of energy emitted is far much less than the electromagnetic energy emitted by wireless devices like for example mobile phones.

Because Wireless LAN PCI Express Mini Card and Bluetooth Daughter Card operate within the guidelines found in radio frequency safety standards and recommendations, Lenovo believes the integrated wireless cards are safe for use by consumers. These standards and recommendations reflect the consensus of the scientific community and result from deliberations of panels and committees of scientists who continually review and interpret the extensive research literature.

In some situation or environment, the use of Wireless LAN PCI Express Mini Card and Bluetooth Daughter Card may be restricted by the proprietor of the building or responsible representatives of the organization. These situations may for example include:

- Using the integrated wireless cards on board of airplanes, or in hospitals
- In any other environment where the risk of interference to other devices or services is perceived or identified as harmful.

If you are uncertain of the policy that applies on the use of wireless devices in a specific organization (e.g. airport or hospital), you are encouraged to ask for authorization to use Wireless LAN PCI Express Mini Card and Bluetooth Daughter Card prior to turning on your ThinkPad computer.
Appendix E. Notices

Notices

Lenovo may not offer the products, services, or features discussed in this document in all countries. Consult your local Lenovo representative for information on the products and services currently available in your area. Any reference to a Lenovo product, program, or service is not intended to state or imply that only that Lenovo product, program, or service may be used. Any functionally equivalent product, program, or service that does not infringe any Lenovo intellectual property right may be used instead. However, it is the user’s responsibility to evaluate and verify the operation of any other product, program, or service.

Lenovo may have patents or pending patent applications covering subject matter described in this document. The furnishing of this document does not give you any license to these patents. You can send license inquiries, in writing, to:

Lenovo (United States), Inc.
500 Park Offices Drive, Hwy. 54
Research Triangle Park, NC 27709
U.S.A.
Attention: Lenovo Director of Licensing

LENOVO GROUP LTD. PROVIDES THIS PUBLICATION “AS IS” WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESS OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF NON-INFRINGEMENT, MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE. Some jurisdictions do not allow disclaimer of express or implied warranties in certain transactions, therefore, this statement may not apply to you.

This information could include technical inaccuracies or typographical errors. Changes are periodically made to the information herein; these changes will be incorporated in new editions of the publication. Lenovo may make improvements and/or changes in the product(s) and/or the program(s) described in this publication at any time without notice.

The products described in this document are not intended for use in implantation or other life support applications where malfunction may result in injury or death to persons. The information contained in this document does not affect or change Lenovo product specifications or warranties. Nothing in this document shall operate as an express or implied license or
indemnity under the intellectual property rights of Lenovo or third parties. All information contained in this document was obtained in specific environments and is presented as an illustration. The result obtained in other operating environments may vary.

Lenovo may use or distribute any of the information you supply in any way it believes appropriate without incurring any obligation to you.

Any references in this publication to non-Lenovo Web sites are provided for convenience only and do not in any manner serve as an endorsement of those Web sites. The materials at those Web sites are not part of the materials for this Lenovo product, and use of those Web sites is at your own risk.

Any performance data contained herein was determined in a controlled environment. Therefore, the result obtained in other operating environments may vary significantly. Some measurements may have been made on development-level systems and there is no guarantee that these measurements will be the same on generally available systems. Furthermore, some measurements may have been estimated through extrapolation. Actual results may vary. Users of this document should verify the applicable data for their specific environment.

**Television output notice**

The following notice applies to models that have the factory-installed television-output feature.

This product incorporates copyright protection technology that is protected by U.S. patents and other intellectual property rights. Use of this copyright protection technology must be authorized by Macrovision, and is intended for home and other limited viewing uses only unless otherwise authorized by Macrovision. Reverse engineering or disassembly is prohibited.

**Electronic emissions notices**

The following information refers to ThinkPad R60 Series, machine type 9444, 9445, 9446, 9447, 9456, 9457, 9458, 9459, 9460, 9461, 9462, 9463, 9464, 0656, 0658, and 0659

**Federal Communications Commission (FCC) Statement**

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, used, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee the interference will not occur in a particular
installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult an authorized dealer or service representative for help.

Properly shielded and grounded cables and connectors must be used in order to meet FCC emission limits. Proper cables and connectors are available from Lenovo authorized dealers. Lenovo is not responsible for any radio or television interference caused by using other than recommended cables or connectors or by unauthorized changes or modifications to this equipment. Unauthorized changes or modifications could void the user’s authority to operate the equipment.

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Responsible party:
Lenovo (United States) Inc.
One Manhattanville Road
Purchase, New York 10577
Telephone: (919) 254-0532

Industry Canada Class B emission compliance statement
This Class B digital apparatus complies with Canadian ICES-003.

Avis de conformité à la réglementation d’Industrie Canada
Cet appareil numérique de la classe B est conforme à la norme NMB-003 du Canada.

European Union EMC Directive conformance statement
This product is in conformity with the protection requirements of EU Council Directive 89/336/EEC on the approximation of the laws of the Member States relating to electromagnetic compatibility. Lenovo cannot accept responsibility
for any failure to satisfy the protection requirements resulting from a non-recommended modification of the product, including the fitting of non-Lenovo option cards.

This product has been tested and found to comply with the limits for Class B Information Technology Equipment according to CISPR 22/European Standard EN 55022. The limits for Class B equipment were derived for typical residential environments to provide reasonable protection against interference with licensed communication devices.

Properly shielded and grounded cables and connectors must be used in order to reduce the potential for causing interference to radio and TV communications and to other electrical or electronic equipment. Such cables and connectors are available from Lenovo authorized dealers. Lenovo cannot accept responsibility for any interference caused by using other than recommended cables and connectors.

Environmental notices for Japan

Collecting and recycling a disused ThinkPad computer

If you are a company employee and need to dispose of a ThinkPad computer that is the property of the company, you must do so in accordance with the Waste Disposal Law. The computer is categorized as industrial waste, containing iron, glass, plastics, and other materials. It should be properly disposed of by an industrial waste disposal contractor certified by a local government.

For details, visit the IBM Web site at www.ibm.com/jp/pc/recycle/pc

If you use a ThinkPad computer at home and need to dispose of it, you must comply with local ordinances and regulations.

Disposing of a ThinkPad computer component containing heavy metal

The printed circuit board of a ThinkPad computer contains heavy metal. (Soldering with lead is used on the printed circuit board.) To properly dispose of the disused printed circuit board, follow the instructions in Collecting and recycling a disused ThinkPad computer.

Disposing of a disused lithium battery

A button-shaped lithium battery is installed on the system board of your ThinkPad computer to back up the main battery. If you want to replace it with a new one, contact your place of purchase or ask for a repair service provided by IBM. If you have replaced it by yourself
and want to dispose of the disused lithium battery, insulate it with vinyl tape, contact your place of purchase, and follow the instructions.

If you use a ThinkPad computer at home and need to dispose of a lithium battery, you must comply with local ordinances and regulations.

Handling a disused ThinkPad battery pack

Your ThinkPad computer has a lithium ion battery pack or a nickel metal hydride battery pack. If you are a company ThinkPad computer user and need to dispose of a battery pack, contact the proper person in IBM sales, service, or marketing, and follow that person’s instructions. You can also see the instructions at www.ibm.com/jp/pc/recycle/battery

If you use a ThinkPad computer at home and need to dispose of a battery pack, you must comply with local ordinances and regulations.

Important information for the European Directive 2002/96/EC

Notice : This mark applies only to countries within the European Union (EU) and Norway. This appliance is labelled in accordance with European Directive 2002/96/EC concerning waste electrical and electronic equipment (WEEE). The Directive determines the framework for the return and recycling of used appliances as applicable throughout the European Union. This label is applied to various products to indicate that the product is not to be thrown away, but rather reclaimed upon end of life per this Directive.

IBM Lotus Software Offer

About the offer: As a qualifying ThinkPad computer customer, you are receiving a single, limited license for the Lotus Notes "standalone" client. This license entitles you to install and use this software on your new ThinkPad computer using one of the following options:

- **Media for this software is not included in this offer. If you do not already have the appropriate Lotus Notes Client, you can order a CD and install the software onto your computer.** Use one of the methods listed on the following page to order.
- **If you already have a licensed copy of the software, you are entitled to make and use one additional copy of the software you have.**

About IBM Lotus Notes: With your standalone, limited use Notes client, you can integrate your most valuable messaging, collaborative and personal information management (PIM) resources — like e-mail, calendar, to-do list — allowing you to access them while connected to or disconnected from your network. The standalone license does not include the right to access any IBM Lotus Domino servers; however this stand-alone license may be upgraded to a full Notes license at a reduced price. For more information visit http://www.lotus.com/notes.

Customer Support: For support information and phone numbers to help with initial installation of software, visit http://www.pc.ibm.com/support. To purchase technical support beyond this initial installation support, visit http://www.lotus.com/passport.

International Program License Agreement: The software licensed to you under this offer does not include software upgrades or technical support, and is subject to the terms and conditions of the IBM International Program License Agreement (IPLA) that accompanies the software. Your use of the Lotus Notes program described in this offer constitutes acceptance of the terms of this Offer and the IPLA. For further information regarding the IBM IPLA, visit http://www.ibm.com/software/sla/sladb.nsf. These programs are not for resale.

Proof of Entitlement: The proof of purchase for your qualifying ThinkPad computer, as well as this Offer document, should be retained as your proof of entitlement.
Purchasing Upgrades, Additional Licenses and Technical Support

Software upgrades and technical support are available for a fee through IBM’s Passport Advantage Program. For information about purchasing additional licenses for Notes, SmartSuite, or other Lotus products, visit http://www.ibm.com or http://www.lotus.com/passport.

To order a CD:

**Important**: Pursuant to this Offer, you may order one CD media per license. You will need to provide the 7 digit serial number of the new ThinkPad computer that you purchased. The CD is provided at no charge; however, applicable shipping, duties and taxes may be imposed by local jurisdictions. Please allow 10 to 20 business days from receipt of your request for delivery.
