Includes:

- Introduction to other sources of information
- Important tips for taking care of your computer
- Diagnostics and troubleshooting
- Recovery options
- Help and service
- Warranty information for your computer
Lenovo 3000 V100
Service and Troubleshooting Guide
Note

Before using this information and the product it supports, be sure to read the following:

- Safety and Warranty Guide included in the package with this publication.
- Lenovo 3000 Regulatory Notice included in the package with this publication.
Read first

To prevent damage to the hard disk and subsequent data loss, before moving your computer, press Fn+F4 to put it in standby mode or turn it off. Make sure that the standby status indicator is on (is green) before moving the computer.

Do not drop, bump, scratch, twist, hit, vibrate, push or place heavy objects on your computer, display, or external devices.

Use a quality carrying case that provides adequate cushion and protection. Do not pack your computer in a tightly packed suitcase or bag.

Place liquids away from your computer to avoid spills, and keep your computer away from water to avoid the danger of electrical shock.

Avoid leaving the base of your computer in contact with your lap or any part of your body for an extended period when the computer is turned on or when the battery is charging.
Chapter 1. Finding information

This guide and other publications

Setup Instructions
helps you to unpack your computer and get started. It includes a few
tips for first-time users, and introduces software preinstalled by
Lenovo.

This Service and Troubleshooting Guide
provides information about caring for your computer, basic
troubleshooting information, some recovery procedures, help and
service information, and warranty information for your computer. The
troubleshooting information in this Guide applies only to problems
that might prevent you from accessing the comprehensive help and
information portal, called Lenovo Care™, preloaded on your
computer.

Access Help
is a comprehensive online manual that provides answers to most of
your questions about your computer, helps you to configure
preloaded features and tools, or solve problems. To open Access Help,
click Start, move the pointer to All Programs; then to Lenovo Care.
Click Access Help.

Lenovo Care
provides an easy access to software tools and key Lenovo sites,
eliminating the need to carry other reference manuals around. To open
Lenovo Care, press the Lenovo Care button on your keyboard. For
more information about using the Lenovo Care button, see "Finding
information with the Lenovo Care button” on page 2.

Safety and Warranty Guide
includes general safety instructions and complete Lenovo Statement of
Limited Warranty.

Regulatory Notice
supplements this Guide. Read it before you use the wireless features
of your computer. Your computer complies with the radio frequency
and safety standards of any country or region in which it has been
approved for wireless use. You are requested to install and use your
computer in strict accordance with the local RF regulations.
Finding information with the Lenovo Care button

The Lenovo Care button can help you in many situations when your computer is working normally, and even when it is not. Press the Lenovo Care button to open the Lenovo Care and get access to informative illustrations and easy-to-follow instructions for getting started and staying productive.

You can also use the Lenovo Care button to interrupt the startup sequence of your computer and start the ThinkVantage™ Rescue and Recovery™ workspace, which runs independently of the Windows operating system and is hidden from it.
Chapter 2. Caring for your computer

Though your computer is designed to function reliably in normal work environments, you need to use common sense in handling it. By following these important tips, you will get the most use and enjoyment out of your computer.

**Important tips:**

**Be careful about where and how you work**
- Do not leave the base of your computer in contact with your lap or any part of your body for an extended period when the computer is functioning or when the battery is charging. Your computer dissipates some heat during normal operation. This heat is a function of the level of system activity and battery charge level. Extended contact with your body, even through clothing, could cause discomfort or, eventually, a skin burn.
- Place liquids away from your computer to avoid spills, and keep your computer away from water (to avoid the danger of electrical shock).
- Store packing materials safely out of the reach of children to prevent the risk of suffocation from plastic bags.
- Keep your computer away from magnets, activated cellular phones, electrical appliances, or speakers (within 13 cm/5 in).
- Avoid subjecting your computer to extreme temperatures (below 5°C/41°F or above 35°C/95°F).

**Be gentle with your computer**
- Avoid placing any objects (including paper) between the display and the keyboard or under the keyboard.
- Do not drop, bump, scratch, twist, hit, vibrate, push, or place heavy objects on your computer, display, or external devices.
- Your computer display is designed to be opened and used at an angle slightly greater than 90 degrees. Do not open the display beyond 135 degrees, as this might damage the computer hinge.

**Carry your computer properly**
- Before moving your computer, be sure to remove any media, turn off attached devices, and disconnect cords and cables.
- Be sure your computer is in standby or hibernation mode, or turned off, before moving it. This will prevent damage to the hard disk drive and data loss.
Caring for your computer

- When picking up your open computer, hold it by the bottom. Do not pick up or hold your computer by the display.
- Use a quality carrying case that provides adequate cushion and protection. Do not pack your computer in a tightly packed suitcase or bag.

Handle storage media and drives properly
- If your computer comes with an optical drive such as CD, DVD, or CD-RW/DVD drive, do not touch the surface of a disc or the lens on the tray.
- Wait until you hear the CD or DVD click into the center pivot of an optical drive such as CD, DVD, or CD-RW/DVD drive before closing the tray.
- When installing your hard disk, diskette, CD, DVD, or CD-RW/DVD drive, follow the instructions shipped with your hardware, and apply pressure only where needed on the device.

Take care in setting passwords
- Remember your passwords. If you forget a supervisor or hard disk password, Lenovo authorized service provider will not reset it, and you might have to replace your system board or hard disk drive.

Other important tips
- Your computer modem might use only an analog telephone network, or public-switched telephone network (PSTN). Do not connect the modem to a PBX (private branch exchange) or any other digital telephone extension line because this could damage your modem. Analog phone lines are often used in homes, while digital phone lines are often used in hotels or office buildings. If you are not sure which kind of phone line you are using, contact your telephone company.
- Your computer might have both an Ethernet connector and a modem connector. If so, be sure to connect your communication cable to the correct one, so your connector is not damaged.
- Register your Lenovo products with Lenovo (refer to the Web page: www.lenovo.com/register). This can help authorities return your computer to you if it is lost or stolen. Registering your computer also enables Lenovo to notify you about possible technical information and upgrades.
- Only an authorized Lenovo notebook repair technician should disassemble and repair your computer.
- Do not modify or tape the latches to keep the display open or closed.
- Take care not to turn your computer over while the AC adapter is plugged in. This could break the adapter plug.
- Store your external and removable hard disk, diskette, CD, DVD, and CD-RW/DVD drives in the appropriate containers or packaging when they are not being used.
Caring for your computer

• Before you install any of the following devices, touch a metal table or a grounded metal object. This action reduces any static electricity from your body. The static electricity could damage the device.
  – ExpressCard
  – Memory Card, such as SD Card, Memory Stick, MultiMediaCard, and xD-Picture Card
  – Memory module
  – PCI Express Mini Card

Cleaning the cover of your computer

Occasionally clean your computer as follows:
1. Prepare a mixture of a gentle kitchen-use detergent (one that does not contain abrasive powder or strong chemicals such as acid or alkaline). Use 5 parts water to 1 part detergent.
2. Absorb the diluted detergent into a sponge.
3. Squeeze excess liquid from the sponge.
4. Wipe the cover with the sponge, using a circular motion and taking care not to let any excess liquid drip.
5. Wipe the surface to remove the detergent.
6. Rinse the sponge with clean running water.
7. Wipe the cover with the clean sponge.
8. Wipe the surface again with a dry, soft lint-free cloth.
9. Wait for the surface to dry completely and remove any cloth fibers from the computer surface.

Cleaning your computer keyboard

1. Absorb some isopropyl rubbing alcohol on a soft, dust-free cloth.
2. Wipe each keytop surface with the cloth. Wipe the keys one by one; if you wipe several keys at a time, the cloth may hook onto an adjacent key and possibly damage it. Make sure that no liquid drips onto or between the keys.
3. Allow to dry.
4. To remove any crumbs and dust from beneath the keys, you can use a camera blower with a brush or cool air from a hair drier.

   Note: Avoid spraying cleaner directly on the display or the keyboard.

Cleaning your computer display
Caring for your computer

1. Gently wipe the display with a dry, soft lint-free cloth. If you see a scratchlike mark on your display, it might be a stain transferred from the keyboard when the cover was pressed from the outside.
2. Wipe or dust the stain gently with a soft, dry cloth.
3. If the stain remains, moisten a soft, lint-free cloth with water or a 50-50 mixture of isopropyl alcohol and water that does not contain impurities.
4. Wring out as much of the liquid as you can.
5. Wipe the display again; do not let any liquid drip into the computer.
6. Be sure to dry the display before closing it.

Care for the fingerprint reader

The following actions could damage the fingerprint reader or cause it not to work properly:
• Scratching the surface of the reader with a hard, pointed object.
• Scraping the surface of the reader with your nail or anything hard.
• Using or touching the reader with a dirty finger.

If you notice any of the following conditions, gently clean the surface of the reader with a dry, soft, lint-free cloth:
• The surface of the reader is dirty or stained.
• The surface of the reader is wet.
• The reader often fails to enroll or authenticate your fingerprint.

Frequently asked questions

This section lists frequently asked questions and tells where you can find detailed answers. For details about each publication included in the package with your computer, see “This guide and other publications” on page 1.

What safety precautions should I follow when using my computer?
See the separate Safety and Warranty Guide for detailed information about safety.

How can I prevent problems with my computer?
See “Read first” on page v, and also Chapter 2, “Caring for your computer,” on page 3 of this Guide. More tips can be found in the Preventing problems section of the Access Help.

What are the main hardware features of my new computer?
See the “Lenovo 3000 tour” section of the Access Help.

Where can I find the detailed specifications for my machine?
See www.lenovo.com/support

I need to upgrade a device or I need to replace one of the following: the hard disk drive, memory, or the keyboard.
Refer to the Appendix B, “Customer Replaceable Units (CRUs),” on page 45 section of this Guide for the list of Customer Replaceable Units and the location of the instructions for removing or replacing components.

My computer is not operating properly.
Study the “Problem solving” section of the Access Help. This Guide describes only problems that might prevent you from getting access to the online help system.
Solving computer problems

How can I contact the Customer Support Center?
See Chapter 6, “Getting help and service,” on page 35 of this Guide.
For the phone numbers of the Customer Support Center nearest to you, see “Worldwide telephone list” on page 41.

Where can I find warranty information?
See the separate Safety and Warranty Guide for detailed warranty information. For the warranty applicable to your computer, including the warranty period and type of warranty service, see “Warranty Information” on page 39.

Diagnosing problems

If you have a problem with your computer, you can test it by using PC-Doctor® for Windows. To run PC-Doctor for Windows, do as follows:
1. Click Start.
2. Move the pointer to All Programs and then to PC-Doctor for Windows.
3. Click PC-Doctor.

For more information about PC-Doctor for Windows, see the Help for the program.

Attention
Running any tests may take up to several minutes or longer. Make sure you have time to run the entire test; do not interrupt the test while it is running.

If you are preparing to contact the Customer Support Center, be sure to print the test log so that you can rapidly provide information to the help technician.

Troubleshooting

If you do not find your problem here, refer to Access Help, your on-board help system. The following section only describes problems that might prevent you from accessing this help system.

Error messages
System BIOS defines error messages to tell users what failure the system has detected and what should be done during POST. Some error messages could be related to a hardware device. Others may indicate a problem with a device configuration. The following is a list of the messages that the BIOS has defined and can display.
Solving computer problems

However, if your system displays one of the messages marked below with an asterisk (*), write down the message and contact your marketing representative. If your system fails after you make changes in the Setup menus, reset the computer, enter Setup again and load Setup defaults or correct the error.

</tr>
</tbody>
</table>

Errors without messages

Problem:
When I turn on the machine, nothing appears on the screen and the machine does not beep while starting up.

Note:
- If you are not sure whether you heard any beeps, turn off the computer; then turn it on again, and listen again.
- If you are using an external monitor, refer to “Computer screen problems” on page 17.

Solution:
- If a user password is set, press any key to display the user password prompt, and then type the correct password and press Enter.
- If the user password prompt does not appear, the brightness level might be set to minimum brightness. Adjust the brightness level by pressing Fn+F11.
- If the screen still remains blank, make sure that:
  - The battery is installed correctly.
  - The ac adapter is connected to the computer and the power cord is plugged into a working electrical outlet.
Solving computer problems

- The computer power is on. (Turn on the power switch again for confirmation.)

If the screen remains blank even though these items are properly set, have the computer serviced.

Problem:
When I turn on the machine, nothing appears on the screen, but I hear two or more beeps.

Solution:
- Make sure that the memory card is installed correctly. If it is, but the screen is still blank, and you hear five beeps, have the computer serviced.

Problem:
My screen goes blank while the computer is on.

Solution:
- Your screen saver or power management may be enabled. Touch the touch pad, or press any key to exit the screen saver, or press the power switch to resume from standby or hibernation mode.

A password problem

Problem:
I forgot my password.

Solution:
- If you forgot your power-on password, you must take your computer to a Lenovo authorized servicer or a marketing representative to have the password canceled.
- If you forgot your HDD password, Lenovo authorized servicer can not reset your password or recover data from the hard disk. You must take your computer to a Lenovo authorized servicer or a marketing representative to have the hard disk drive replaced. Proof of purchase is required, and a fee will be charged for parts and service.
- If you forget your supervisor password, Lenovo authorized servicer cannot reset your password. You must take your computer to a Lenovo authorized servicer or a marketing representative to have the system board replaced. Proof of purchase is required, and a fee will be charged for parts and service.
Solving computer problems

A power switch problem

Problem:
The system does not respond, and you cannot turn off the computer.

Solution:
→ Turn off the computer by pressing and holding the power switch for 4 seconds or more. If the computer is still not reset, remove the ac adapter and the battery.

Keyboard problems

Problem:
A number appears when you type a letter.

Solution:
→ The numeric lock function is on. To disable it, press and hold Fn; then press NmLk.

Problem:
All or some keys on the external numeric keypad do not work.

Solution:
→ Make sure that the external numeric keypad is correctly connected to the computer.

A pointing device problem

Problem:
The mouse or the pointing device does not work.

Solution:
→ Make sure that the mouse or pointing device cable is securely connected to the USB port.

Note: For more information, see the manual supplied with the mouse or pointing device.

Standby or hibernation problems

Problem:
The computer enters standby mode unexpectedly.

Solution:
→ If the processor overheats, the computer automatically enters standby mode to allow the computer to cool and to protect the processor and other internal components. Check the settings for standby mode. Also refer to the Power-saving modes section in Access Help for more information.
Problem:
The computer enters standby mode (the standby indicator turns on) immediately after Power-on self-test (POST) (the standby indicator light turns on).

Solution:
→ Make sure that:
  - The battery is charged.
  - The operating temperature is within the acceptable range. Refer to “Specifications” on page 50.

If these items are correct, have the computer serviced.

Problem:
The "critical low-battery error" message appears, and the computer immediately turns off.

Solution:
→ The battery power is getting low. Connect the ac adapter to the computer, or replace the battery with a fully charged one.

Problem:
When returning from standby mode by pressing any key or the power button, the computer display remains blank.

Solution:
→ Check whether an external monitor has been disconnected while the computer was in standby mode. Do not disconnect the external monitor while the computer is in standby mode or hibernation mode. If no external monitor is attached when the computer resumes, the computer display remains blank and output is not displayed. This restriction does not depend on the resolution value. Press Fn+F7 to bring up the computer display.

Note: If you are using the Fn+F7 key combination to apply a presentation scheme, you will need to press Fn+F7 at least three times in three seconds to bring up the computer display.
Solving computer problems

Problem:
The computer does not return from standby mode, or the power and standby indicators stays on and the computer does not work.

Solution:
→ If the system does not return from standby mode, it may have entered standby or hibernation mode automatically because the battery is depleted. Check the standby indicator.
  − If the standby indicator is on, your computer is in standby mode.
    Connect the ac adapter to the computer; then press Fn.
  − If the standby indicator is off, your computer is in hibernation mode or power-off state. Connect the ac adapter to the computer; then press power button to resume operation.
If the system still does not return from standby mode, your system may stop responding and you cannot turn off the computer. In this case, you need to reset the computer. If you have not saved your data, it may be lost. To reset the computer, press and hold the power button for 4 seconds or more. If the system is still not reset, remove the ac adapter and the battery.

Problem:
Your computer does not enter standby or hibernation mode.

Solution:
→ Check whether any option has been selected that would disable your computer from entering standby or hibernation mode.

Problem:
The Fn+F12 key combination does not make the computer enter hibernation mode.

Solution:
→ The computer cannot enter hibernation mode:
  − If you are using one of the communication ExpressCards. To enter hibernation mode, stop the communication program, and then remove the ExpressCard or disable the ExpressCard slot. Click the Safely Remove Hardware icon in the task bar.
  − If the hibernation mode is not enabled. To enable it, do as follows:
    1. Click Start.
    2. Click the Control Panel and click Performance and maintenance.
    3. Click Power options. Power options properties window opens, and click the Hibernate tab.
    4. Select the Enable hibernation check box.
5. Click OK.

Note: You can enter hibernation mode by pressing Fn+F12 only if the Lenovo PM driver has been installed on your computer.

Computer screen problems

Problem:
The screen is blank.

Solution:
→ Press Fn+F7 to bring up the image.

Note: If you use the Fn+F7 key combination to apply a presentation scheme, press Fn+F7 at least three times in three seconds, and the image is displayed on the computer screen.

→ If you are using the ac adapter, or using the battery, and the battery status indicator is on (is green), press Fn+F11 to make the screen brighter.

→ If the standby status indicator is blinking, press Fn to resume from the standby mode.

→ If the problem persists, do the Solution in the problem below.

Problem:
The screen is unreadable or distorted.

Solution:
→ Make sure that:
  – The display device driver is installed correctly.
  – The screen resolution and color quality are correctly set.
  – The monitor type is correct.

To check these settings, do as follows:
Right-click the desktop to open the Display Properties window.
1. Click the Settings tab.
2. Check whether the screen resolution and color quality are correctly set.
3. Click Advanced.
4. Click the Adapter tab.
5. Make sure that “Intel xxxxx” is shown in the adapter information window.

Note: The device driver name xxxxx depends on the video chip that has been installed on your computer.
Solving computer problems

6. Click the Properties button. Look at the "Device status" box and make sure the device is working properly. If not, click the Troubleshooter button.
7. Click the Monitor tab.
8. Make sure the information is correct.
9. Click the Properties button. Look at the "Device status" box and make sure the device is working properly. If not, click the Troubleshooter button.

Problem:
The screen stays on even after you turn off your computer.

Solution:
→ Press and hold the power switch for 4 seconds or more to turn off your computer; then turn it on again.

Problem:
Missing, discolored, or bright dots appear on the screen every time you turn on your computer.

Solution:
→ This is an intrinsic characteristic of the TFT technology. Your computer’s display contains multiple thin-film transistors (TFTs). A small number of missing, discolored, or bright dots on the screen might exist all the time.

Problem:
A message, “Unable to create overlay window,” appears when you try to start DVD playback.
or
You get poor or no playback while running video playback, DVD playback, or game applications.

Solution:
→ Do either of the following:
  – If you are using 32-bit color mode, change the color depth to 16-bit mode.
  – If you are using a desktop size of 1280×1024 or larger, reduce the desktop size and the color depth.

Battery problems

Problem:
The battery cannot be fully charged by the power-off method in the standard charge time for your computer.
Solving computer problems

Solution:

→ The battery might be over-discharged. Do the following:
  1. Turn off the computer.
  2. Make sure that the over-discharged battery is in the computer.
  3. Connect the ac adapter to the computer and let it charge.

If the battery cannot be fully charged in 24 hours, use a new battery.

Problem:

Your computer shuts down before the battery status indicator shows empty.

or

Your computer operates after the battery status indicator shows empty.

Solution:

→ Discharge and recharge the battery.

Problem:

The operating time for a fully charged battery is short.

Solution:

→ Discharge and recharge the battery. If your battery’s operating time is still short, use a new battery.

Problem:

The computer does not operate with a fully charged battery.

Solution:

→ The surge protector in the battery might be active. Turn off the computer for one minute to reset the protector; then turn on the computer again.

Problem:

The battery does not charge.

Solution:

→ You cannot charge the battery when it is too hot. If the battery feels hot, remove it from the computer and allow it to cool to room temperature. After it cools, reinstall it and recharge the battery. If it still cannot be charged, have it serviced.
Solving computer problems

Hard disk drive problems

Problem:
The hard disk drive makes a rattling noise intermittently.

Solution:
- The rattling noise might be heard when:
  - The hard disk drive starts accessing the data or when it stops.
  - You are carrying the hard disk drive.
  - You are carrying your computer.

This is a normal characteristic of a hard disk drive and is not a defect.

Problem:
The hard disk drive does not work.

Solution:
- In the Boot menu in the BIOS Utility, make sure that the hard disk drive is included in the Boot Sequence correctly.

A startup problem

Problem:
The Microsoft® Windows operating system will not start.

Solution:
- Use the ThinkVantage Rescue and Recovery workspace to help solve or identify your problem. To open the ThinkVantage Rescue and Recovery workspace, do the following:
  1. Turn off your PC for at least 5 seconds, then turn it on again.
  2. Watch the screen carefully while your PC starts. While the initial screen is displayed, press the Lenovo Care button. The ThinkVantage Rescue and Recovery workspace opens.
  3. From the Rescue and Recovery workspace, you can do the following:
     - **Rescue and Restore** your files, folders, or backups.
     - **Configure** your system settings and passwords.
     - **Communicate** by using the internet and link to the support site.
     - **Troubleshoot** and diagnose problems using diagnostics.

In the top panel of the ThinkVantage Rescue and Recovery workspace, you can click one of the following tabs to open other pages or exit the utility:
- **Event Viewer** enables you to view a log that contains information about events, or tasks, associated with Rescue and Recovery operations.
Solving computer problems

- **System Information** enables you to see key hardware and software information about your computer. This information might be valuable when trying to diagnose problems.
- **Warranty Status** enables you to see when your warranty expires, the terms of service for your computer, or the spare parts list.
- **Help** provides information about the various functions available in the ThinkVantage Rescue and Recovery workspace.
- **Restart** closes the ThinkVantage Rescue and Recovery workspace and resumes the startup sequence that was interrupted.

**A fingerprint authentication problem**

**Problem:**
Your cannot register or authenticate your fingerprint.

**Solution:**
- If your finger(s) have any of the following conditions, you may not be able to register or authenticate it:
  - Your finger is wrinkled.
  - Your finger is rough, dry or injured.
  - Your finger is very dry.
  - Your finger is stained with dirt, mud, or oil.
  - The surface of your finger is very different from when you registered your fingerprint.
  - Your finger is wet.
  - A finger is used that has not been enrolled.

To improve the situation, try the following:
- Clean or wipe your hands to remove any excess dirt or moisture from the fingers.
- Enroll and use a different finger for authentication.
- If your hands are too dry, apply lotion to them.

**Other problems**

**Problem:**
The computer locks or does not accept any input.

**Solution:**
- Your computer might lock when it enters standby mode during a communication operation. Disable the standby timer when you are working on the network.
To turn off the computer, press and hold the power switch for 4 seconds or more.

**Problem:**
The computer does not start from a device you want.

**Solution:**
† Refer to the Startup menu of the BIOS Utility. Make sure that the Boot Sequence in the BIOS Utility is set so that the computer starts form the device you want. Also make sure that the device from which the computer starts is enabled. In the Boot menu in the BIOS Utility, make sure that the device is included in the Boot Sequence correctly.

**Problem:**
The computer cannot play a CD, or the sound quality is not good.

**Solution:**
† Be sure that the disk meets the standards for your country. Usually, a disk that meets the local standards is marked with a CD logo on the label. If you use a disc that does not meet these standards, we cannot guarantee that it will play, or that, if it does play, the sound quality will be good.

**Problem:**
You cannot connect using the built-in wireless networking card.

**Solution:**
† If the computer display is closed, open it and try again.

**Problem:**
An application program does not run correctly.

**Solution:**
† Make sure that the problem is not being caused by the application program.
Check that your computer has the minimum required memory to run the application program. Refer to the manuals supplied with the application program.

Check the following:
- The application program is designed to operate with your operating system.
- Other application programs run correctly on your computer.
- The necessary device drivers are installed.
- The application program works when it is run on some other computer.

If an error message appears while you are using the application program, refer to the manuals supplied with the application.
Solving computer problems
Chapter 4. Recovery options

Introducing Rescue and Recovery

If Windows is not running properly, you may need to do the following:

• Get the current system information.
• Diagnose and troubleshoot a problem.
• Rescue a file from your Windows environment or restore backed-up files, provided you have made backups by use of the ThinkVantage Rescue and Recovery program.
• Configure your computer.

All this can be achieved from the ThinkVantage Rescue and Recovery workspace. To start ThinkVantage Rescue and Recovery, turn on the computer and while the initial screen is displayed press the Lenovo Care button. For more information about using Rescue and Recovery features, see the “Recovery overview” section of the Access Help.

Restoring factory contents

Instead of providing a recovery CD or a Windows® CD with your computer, Lenovo provides simpler methods of accomplishing the tasks typically associated with these CDs. The files and programs for these alternative methods are on your hard disk, which eliminates having to locate misplaced CDs and problems associated with using an incorrect CD version.

The complete backup of all the files and programs that Lenovo preinstalled on your computer resides in a hidden protected area, or partition, of the hard disk. Although hidden, the backups in the partition consume hard disk space. Therefore, when checking the capacity of your hard disk according to Windows, you might note that the total capacity of the disk appears to be smaller than anticipated. This discrepancy is explained by the contents of the hidden partition.

The Product Recovery Program contained within this area enables you to restore the complete contents of your hard disk to the same state as it was when originally shipped from the factory.

Note: The recovery process might take up to 2 hours.

To recover the hard disk to its original contents, do the following:
Recovery options

Attention: All of the files on the primary hard disk partition (usually drive C) will be lost in the recovery process. However, before any data is overwritten, you will be given the opportunity to save one or more files to other media.

1. If possible, save all your files and shut down your operating system.
2. Turn off your computer for at least 5 seconds.
3. Select the On position of the wireless radio switch on your computer.

Note: If you forget to select the On position of the wireless radio switch, your wireless network card will not be recognized, and the wireless card driver will not be included in your system.

4. Turn on your computer. Watch the display carefully while your PC starts. While the initial screen is displayed, press the Lenovo Care button. The ThinkVantage Rescue and Recovery workspace opens.

5. Click Restore your system, select Restore my hard drive to the original factory state, and follow the instructions on the screen.

Recovering data

If you performed a backup operation using the Rescue and Recovery program, you also have one or more backups stored that reflect the contents of the hard disk as it existed at various points in time. These backups might be stored on your hard disk, or a network drive, or on removable media, depending on the options you selected during the backup operation.

You can use either the Rescue and Recovery program or the ThinkVantage Rescue and Recovery workspace to restore the contents of the hard disk to an earlier state using any of the stored backups. The ThinkVantage Rescue and Recovery workspace runs independently of the Windows operating system. Therefore, you can start it by pressing the Lenovo Care button when prompted during startup.

After the ThinkVantage Rescue and Recovery workspace opens you can perform a recovery operation, even if you are unable to start Windows.
Chapter 5. Upgrading and replacing devices

Replacing the battery

Important
Read Safety and Warranty Guide before replacing the battery.

1. Turn off the computer, or enter hibernation mode. Then disconnect the ac adapter and all cables from the computer.

   Note: If you are using an ExpressCard, the computer might not be able to enter hibernation mode. If this happens, turn off the computer.

2. Close the computer display, and turn the computer over.

3. Unlock the battery latch 1 by sliding it to the unlocked position.

4. Unlock the battery latch 2 by sliding it to the unlocked position. While holding the latch in the unlocked position, remove the battery 3.
Replacing the battery

5. Install a fully charged battery 1.

6. Slide the battery latch to the locked position 2.

7. Turn the computer over again. Connect the ac adapter and cables to the computer.

Upgrading the hard disk drive

Important
Read Safety and Warranty Guide before replacing the hard disk drive.

You can increase the storage capacity of your computer by replacing the hard disk drive with one of greater capacity. You can purchase a new hard disk drive from your Lenovo reseller or a marketing representative.

Notes:
1. Replace the hard disk drive only if you upgrade it or have it repaired. The connectors and bay of the hard disk drive were not designed for frequent changes, or drive swapping.
2. The ThinkVantage Rescue and Recovery workspace and the Product Recovery program are not included on an optional hard disk drive.
Attention

Handling a hard disk drive

- Do not drop the drive or subject it to physical shocks. Put the drive on a material, such as soft cloth, that absorbs the physical shock.
- Do not apply pressure to the cover of the drive.
- Do not touch the connector.

The drive is very sensitive. Incorrect handling can cause damage and permanent loss of data on the hard disk. Before removing the hard disk drive, make a backup copy of all the information on the hard disk, and then turn the computer off. Never remove the drive while the system is operating, in standby mode, or in hibernation mode.

To replace the hard disk drive, do the following:

1. **Turn off the computer**; then disconnect the ac adapter and all cables from the computer.
2. Close the computer display, and turn the computer over.
3. Remove the battery.
4. Unfasten two screws 1, and remove the hard disk cover 2.
5. Disconnect the hard disk drive and remove it by pulling out the tab 3.

6. Insert a new hard disk drive into the hard disk drive bay 1, then firmly install it.
Upgrading the hard disk drive

7. Reinstall the cover by aligning the front side of the cover first 1, and closing the cover 2. Then tighten the two screws 3.

8. Reinstall the battery.
9. Turn the computer over again. Connect the ac adapter and cables to the computer.

Replacing memory

Important
Read Safety and Warranty Guide before replacing memory.

Increasing memory capacity is an effective way to make programs run faster. You can increase the amount of memory in your computer by installing a PC2-5300 (double data rate (DDR) II 667) synchronous dynamic random access memory (DRAM) unbuffered small outline dual inline memory module (SO-DIMM), available as an option, in the memory slot of your computer. SO-DIMMs with different capacities are available.

Note: Use only the memory types supported by your computer. If you incorrectly install the optional memory or install an unsupported memory type, a warning beep will sound when you try to start the computer.

To install an SO-DIMM, do the following:
1. Touch a metal table or a grounded metal object. This action reduces any static electricity in your body, that could damage the SO-DIMM. Do not touch the contact edge of the SO-DIMM.
Replacing memory

2. **Turn off the computer**; then disconnect the ac adapter and all cables from the computer.
3. Close the computer display, and turn the computer over.
4. Remove the battery.
5. Unfasten the two screws on the cover of the memory slot, and remove the cover.

![Diagram of computer with screws unfastened and cover removed]

6. If the SO-DIMM is already installed in the memory slot, remove it to make room for the new one by pressing out on the latches on both edges of the socket at the same time. Be sure to save it for future use.

![Diagram of SO-DIMM being removed]

7. Find the notch on the contact edge side of the SO-DIMM.
   **Attention:** To avoid damaging the SO-DIMM, do not touch its contact edge.
Replacing memory

8. With the notched end of the SO-DIMM toward the contact edge side of the socket, firmly insert the SO-DIMM into the socket at an angle of about 20 degrees 1, then press it firmly 2.

9. Push the SO-DIMM down until it snaps into place.
10. Make sure that the memory module is firmly fixed in the slot and does not move easily.
11. Reinstall the cover of the memory slot by aligning the front side of the cover first 1, and closing the cover 2. Then tighten the two screws 3.

Attention: When you have replaced the SO-DIMM, do not use your computer until you have closed the memory slot cover. Never use the computer with the cover open.
12. Reinstall the battery.
13. Turn the computer over again, and reconnect the ac adapter and cables to the computer.
Replacing memory

To make sure that the SO-DIMM is installed correctly, do as follows:
1. Turn the computer on.
2. While the initial screen is displayed, press F1. The BIOS Utility screen opens. The "Memory" item shows the amount of memory you can utilize.
Chapter 6. Getting help and service

Getting help and service

If you need help, service, technical assistance, or just want more information about Lenovo computers, you will find a wide variety of sources available from Lenovo to assist you. This section contains information about where to go for additional information about Lenovo computers, what to do if you experience a problem with your computer, and whom to call for service should it be necessary.

Microsoft Service Packs are the latest software source for Windows product updates. They are available via Web download (connection charges may apply) or via CD-ROM. For more specific information and links, go to www.microsoft.com. For technical assistance with installation of, or questions related to, Service Packs for your preloaded Microsoft Windows product, refer to the Microsoft Product Support Services Web site at http://support.microsoft.com/directory/, or you can contact Customer Support Center at the phone number(s) listed in “Worldwide telephone list” on page 41. Some fees might apply.

Getting help on the Web

The Lenovo Web site on the World Wide Web has up-to-date information about Lenovo computers and support. The address for the Lenovo home page is http://www.lenovo.com.

You can find support information for your Lenovo 3000 computer at www.lenovo.com/support. Research this Web site to learn how to solve problems, find new ways to use your computer, and learn about options that can make working with your Lenovo computer even easier.

Calling the Customer Support Center

If you have tried to correct the problem yourself and still need help, during the warranty period, you can get help and information by telephone through the Customer Support Center. The following services are available during the warranty period:

• Problem determination - Trained personnel are available to assist you with determining if you have a hardware problem and deciding what action is necessary to fix the problem.
**Getting help and service**

- Lenovo hardware repair - If the problem is determined to be caused by Lenovo hardware under warranty, trained service personnel are available to provide the applicable level of service.
- Engineering change management - Occasionally, there might be changes that are required after a product has been sold. Lenovo or your reseller, if authorized by Lenovo, will make selected Engineering Changes (ECs) available that apply to your hardware.

The following items are not covered:
- Replacement or use of parts not manufactured for or by Lenovo or nonwarranted parts

**Note:** All warranted parts contain a 7-character identification in the format FRU XXXXXXX
- Identification of software problem sources
- Configuration of BIOS as part of an installation or upgrade
- Changes, modifications, or upgrades to device drivers
- Installation and maintenance of network operating systems (NOS)
- Installation and maintenance of application programs

To determine if your machine is in warranty and when the warranty expires, go to www.lenovo.com/support, and click **Warranty**, then follow the instructions on the screen.

Refer to your Lenovo hardware warranty for a full explanation of Lenovo warranty terms. Be sure to retain your proof of purchase to obtain warranty service.

If possible, be near your computer when you make your call in case the technical assistance representative needs to help you resolve a computer problem. Please ensure that you have downloaded the most current drivers and system updates, run diagnostics, and recorded information before you call. When calling for technical assistance, please have the following information available:
- Machine Type and Model
- Serial numbers of your computer, monitor, and other components, or your proof of purchase
- Description of the problem
- Exact wording of any error messages
- Hardware and software configuration information for your system

The telephone numbers for your Customer Support Center location are located in the **Worldwide telephone list** section of this guide.

**Note:** Telephone numbers are subject to change without notice. For the latest list of Customer Support Center telephone numbers and hours of
operation, visit the Support Web site at www.lenovo.com/support. If the number for your country or region is not listed, contact your Lenovo reseller or Lenovo marketing representative.

Getting help around the world

If you travel with your computer or relocate it to a country where your Lenovo machine type is sold, your computer might be eligible for International Warranty Service, which automatically entitles you to obtain warranty service throughout the warranty period. Service will be performed by service providers authorized to perform warranty service.

Service methods and procedures vary by country, and some services might not be available in all countries. International Warranty Service is delivered through the method of service (such as depot, carry-in, or on-site service) that is provided in the servicing country. Service centers in certain countries might not be able to service all models of a particular machine type. In some countries, fees and restrictions might apply at the time of service.

To determine whether your computer is eligible for International Warranty Service and to view a list of the countries where service is available, go to www.lenovo.com/support, click Warranty, and follow the instructions on the screen.
Getting help and service
Appendix A. Warranty information

Warranty Information

This Appendix provides information regarding the warranty period and type of warranty service applicable to your Machine in your country or region. For the terms and conditions of the Statement of Limited Warranty that applies to your Machine, refer to Chapter 2, Warranty Information in the Safety and Warranty Guide included with your Machine.

Warranty Period

The warranty period may vary by country or region and is specified in the table below. NOTE: "Region" means either Hong Kong or Macau Special Administrative Region of China.

A warranty period of 3 years on parts and 1 year on labor means that Lenovo provides warranty service without charge for:

a. parts and labor during the first year of the warranty period; and

b. parts only, on an exchange basis, in the second and third years of the warranty period. Your Service Provider will charge you for any labor provided in performance of the repair or replacement(s) in the second and third year of warranty period.

Types of Warranty Service

If required, your Service Provider will provide repair or exchange service depending on the type of warranty service specified for your Machine in the above table and as described below. Scheduling of service will depend upon the time of your call and is subject to parts availability. Service levels are response time objectives and are not guaranteed. The specified level of warranty service may not be available in all worldwide locations, additional charges may apply outside your Service Provider’s normal service area, contact your local Service Provider representative or your reseller for country and location specific information.
1. **Customer Replaceable Unit ("CRU") Service**

   Lenovo will ship CRUs to you for you to install, Tier 1 CRUs are easy to install whereas Tier 2 CRUs require some technical skill and tools. CRU information and replacement instructions are shipped with your Machine and are available from Lenovo at any time on your request. You may request that a Service Provider install CRUs, at no additional charge, under the type of warranty service designated for your Machine. Lenovo specifies in the materials shipped with a replacement CRU whether a defective CRU must be returned. When return is required, 1) return instructions and a container are shipped with the replacement CRU, and 2) you may be charged for the replacement CRU if Lenovo does not receive the defective CRU within 30 days of your receipt of the replacement.

2. **On-site Service**

   Your Service Provider will either repair or exchange the failing Machine at your location and verify its operation. You must provide suitable working area to allow disassembly and reassembly of the Lenovo Machine. The area must be clean, well lit and suitable for the purpose. For some Machines, certain repairs may require sending the Machine to a designated service center.

3. **Courier or Depot Service * **

   You will disconnect the failing Machine for collection arranged by your Service Provider. A shipping container will be provided to you for you to return your Machine to a designated service center. A courier will pick up your Machine and deliver it to the designated service center. Following its repair or exchange, the service center will arrange the return delivery of the Machine to your location. You are responsible for its installation and verification.

4. **Customer Carry-In or Mail-In Service**

   You will deliver or mail as your Service Provider specifies (prepaid unless specified otherwise) the failing Machine suitably packaged to a designated location. After the Machine has been repaired or exchanged, it will be made available for your collection or, for Mail-in Service, the Machine will be returned to you at Lenovo’s expense, unless your Service Provider specifies otherwise. You are responsible for the subsequent installation and verification of the Machine.

5. **CRU and On-site Service**

   This type of Warranty Service is a combination of Type 1 and Type 2 (see above).

6. **CRU and Courier or Depot Service**

   This type of Warranty Service is a combination of Type 1 and Type 3 (see above).

7. **CRU and Customer Carry-In or Mail-In Service**
This type of Warranty Service is a combination of Type 1 and Type 4 (see above).

When a 5, 6 or 7 type of warranty service is listed, your Service Provider will determine which type of warranty service is appropriate for the repair.

* This type of service is called Lenovo EasyServ or EasyServ in some countries.

To obtain warranty service contact a Service Provider. In Canada or the United States, call 1-800-IBM-SERV (426-7378). In other countries, see the telephone numbers below.

**Worldwide telephone list**

Phone numbers are subject to change without notice. For the most current phone numbers, go to http://www.lenovo.com/support and click Support phone list.

You can find instructions for replacing CRUs in Access Help. To open Access Help, click Start, move the pointer to All Programs; then to Lenovo Care. Click Access Help.

If you are unable to access these instructions or if you have difficulty replacing a CRU, you can use either of the following additional resources:

- The Online Hardware Maintenance Manual available from the Support Web site
- The Customer Support Center. For the telephone number of the Support Center for your country or region, see "Worldwide telephone list" on page 41.
Appendix C. Overview of your computer

Your computer at a glance
Your computer at a glance

Rear view

USB connector
IEEE 1394 connector
ExpressCard slot
USB connector
Features

Processor
• See the system properties of your computer. You can do this as follows:
  right-click the My computer icon on your desktop, from the pull down
  menu select Properties.

Memory
• Double data rate (DDR) synchronous dynamic random access memory
  (DRAM) II

Storage device
• 2.5-inch hard disk drive

Display
The color display uses TFT technology:
• Size: 12.1 inch
• Resolution:
  – LCD: 1280-by-800
  – External monitor: Up to 2048-by-1536
• Brightness control
• Integrated camera (on some models)

Keyboard
• Fingerprint reader (on some models)
• 84-key, 85-key, or 89-key
• Touchpad
• Fn key function
• Lenovo Care button
• Volume control buttons
• InstantON button

External interface
• External-monitor connector
• ExpressCard slot
• Stereo headphone jack
• Microphone jack
• 3 Universal Serial Bus (USB) connectors
• RJ11 telephone connector
• RJ45 Ethernet connector
• IEEE1394 connector
• Digital Media Reader slot
• Wireless radio switch
• Optical drive
• Integrated wireless LAN feature
• Integrated Bluetooth feature (on some models)
Specifications

Size
• Width: 305 mm
• Depth: 227 mm
• Height: 31.7 mm

Environment
• Maximum altitude without pressurization: 3048 m (10000 ft)
• Temperature
  – At altitudes up to 2438 m (8000 ft)
    - Operating with no diskette: 5° to 35°C (41° to 95°F)
    - Operating with a diskette: 10° to 35°C (50° to 95°F)
    - Not operating: 5° to 43°C (41° to 110°F)
  – At altitudes above 2438 m (8000 ft)
    - Maximum operating temperature, 31.3°C (88° F)

Note: When you charge the battery pack, its temperature must be at least 10°C (50°F).
• Relative humidity:
  – Operating with no disc in the drive: 8% to 90%
  – Operating with a disc in the drive: 8% to 80%
  – Not operating: 5% to 95%

Heat output
• 65 W (222 Btu/hour) maximum

Power source (ac adapter)
• Sine-wave input at 50 to 60 Hz
• Input rating of the ac adapter: 100-240 V ac, 50 to 60 Hz

Battery pack
• Lithium-ion (Li-Ion) battery pack
  – Nominal voltage: 11.1 V dc
  – Capacity: 2.6 AH or 5.2 AH, depending on the model
Appendix D. Wireless related information

Wireless interoperability

Wireless LAN PCI Express Mini Card is designed to be interoperable with any wireless LAN product that is based on Direct Sequence Spread Spectrum (DSSS) and/or Orthogonal Frequency Division Multiplexing (OFDM) radio technology, and is compliant to:

- The IEEE 802.11a/b/g Standard on Wireless LANs, as defined and approved by the Institute of Electrical and Electronics Engineers.
- The Wireless Fidelity (WiFi) certification as defined by the Wi-Fi Alliance.

Bluetooth Daughter Card is designed to be interoperable with any Bluetooth product that is compliant to Bluetooth Specification 2.0 + EDR as defined by the Bluetooth SIG. Following profiles are supported by Bluetooth Daughter Card:

- Generic Access
- Service Discovery
- Serial Port
- Dial-up Networking
- FAX
- LAN Access using PPP
- Personal Area Network
- Generic Object Exchange
- Generic Object Push
- File Transfer
- Synchronization
- Audio Gateway
- Headset
- Printer
- Human Interface Devices (Keyboard/Mouse)
- Basic Image
- Handsfree
- AV

Usage environment and your health

Wireless LAN PCI Express Mini Card and Bluetooth Daughter Card emits radio frequency electromagnetic energy like other radio devices. However, the level of energy emitted is far much less than the electromagnetic energy emitted by wireless devices like for example mobile phones.
Because Wireless LAN PCI Express Mini Card and Bluetooth Daughter Card operates within the guidelines found in radio frequency safety standards and recommendations, Lenovo believes the integrated wireless cards are safe for use by consumers. These standards and recommendations reflect the consensus of the scientific community and result from deliberations of panels and committees of scientists who continually review and interpret the extensive research literature.

In some situation or environment, the use of Wireless LAN PCI Express Mini Card or Bluetooth Daughter Card may be restricted by the proprietor of the building or responsible representatives of the organization. These situations may for example include:

- Using the integrated wireless cards on board of airplanes, or in hospitals
- In any other environment where the risk of interference to other devices or services is perceived or identified as harmful.

If you are uncertain of the policy that applies on the use of wireless devices in a specific organization (e.g. airport or hospital), you are encouraged to ask for authorization to use Wireless LAN PCI Express Mini Card or Bluetooth Daughter Card prior to turning on the computer.
Appendix E. Notices

Notices

Lenovo may not offer the products, services, or features discussed in this document in all countries. Consult your local Lenovo representative for information on the products and services currently available in your area. Any reference to a Lenovo product, program, or service is not intended to state or imply that only that Lenovo product, program, or service may be used. Any functionally equivalent product, program, or service that does not infringe any Lenovo intellectual property right may be used instead. However, it is the user’s responsibility to evaluate and verify the operation of any other product, program, or service.

Lenovo may have patents or pending patent applications covering subject matter described in this document. The furnishing of this document does not give you any license to these patents. You can send license inquiries, in writing, to:

Lenovo (United States), Inc.
500 Park Offices Drive, Hwy. 54
Research Triangle Park, NC 27709
U.S.A.
Attention: Lenovo Director of Licensing

indemnity under the intellectual property rights of Lenovo or third parties. All information contained in this document was obtained in specific environments and is presented as an illustration. The result obtained in other operating environments may vary.

Lenovo may use or distribute any of the information you supply in any way it believes appropriate without incurring any obligation to you.

Any references in this publication to non-Lenovo Web sites are provided for convenience only and do not in any manner serve as an endorsement of those Web sites. The materials at those Web sites are not part of the materials for this Lenovo product, and use of those Web sites is at your own risk.

Any performance data contained herein was determined in a controlled environment. Therefore, the result obtained in other operating environments may vary significantly. Some measurements may have been made on development-level systems and there is no guarantee that these measurements will be the same on generally available systems. Furthermore, some measurements may have been estimated through extrapolation. Actual results may vary. Users of this document should verify the applicable data for their specific environment.

Television output notice
The following notice applies to models that have the factory-installed television-output feature.

This product incorporates copyright protection technology that is protected by method claims of certain U.S. patents and other intellectual property rights owned by Macrovision Corporation and other rights owners. Use of this copyright protection technology must be authorized by Macrovision Corporation, and is intended for home and other limited viewing uses only unless otherwise authorized by Macrovision Corporation. Reverse engineering or disassembly is prohibited.

Electronic emissions notices
The following information refers to Lenovo 3000 V100, machine type 0763.

Federal Communications Commission (FCC) Statement
This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee the interference will not occur in a particular
installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult an authorized dealer or service representative for help.

Properly shielded and grounded cables and connectors must be used in order to meet FCC emission limits. Proper cables and connectors are available from Lenovo authorized dealers. Lenovo is not responsible for any radio or television interference caused by using other than recommended cables or connectors or by unauthorized changes or modifications to this equipment. Unauthorized changes or modifications could void the user’s authority to operate the equipment.

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Responsible party:
Lenovo (United States) Inc.
One Manhattanville Road
Purchase, New York 10577
Telephone: (919) 254-0532

Industry Canada Class B emission compliance statement
This Class B digital apparatus complies with Canadian ICES-003.

Avis de conformité à la réglementation d’Industrie Canada
Cet appareil numérique de la classe B est conforme à la norme NMB-003 du Canada.

European Union EMC Directive conformance statement
This product is in conformity with the protection requirements of EU Council Directive 89/336/EEC on the approximation of the laws of the Member States relating to electromagnetic compatibility. Lenovo cannot accept responsibility
for any failure to satisfy the protection requirements resulting from a nonrecommended modification of the product, including the fitting of non-Lenovo option cards.

This product has been tested and found to comply with the limits for Class B Information Technology Equipment according to CISPR 22/European Standard EN 55022. The limits for Class B equipment were derived for typical residential environments to provide reasonable protection against interference with licensed communication devices.

Properly shielded and grounded cables and connectors must be used in order to reduce the potential for causing interference to radio and TV communications and to other electrical or electronic equipment. Such cables and connectors are available from Lenovo authorized dealers. Lenovo cannot accept responsibility for any interference caused by using other than recommended cables and connectors.

Environmental notices for Japan

Collecting and recycling a disused ThinkPad computer

If you are a company employee and need to dispose of a Lenovo computer that is the property of the company, you must do so in accordance with the Law for Promotion of Effective Utilization of Resources. The computer is categorized as industrial waste. It should be properly disposed of by an industrial waste disposal contractor certified by a local government. In accordance with the Law for Promotion of Effective Utilization of Resources, IBM Japan provides, through its PC Collecting and Recycling Services, for the collecting, reuse, and recycling of disused computers. For details, visit the IBM Japan Web site at www.ibm.com/jp/pc/service/recycle/

Pursuant to the Law for Promotion of Effective Utilization of Resources, the collecting and recycling of home-used computers by the manufacturer was begun on October 1, 2003. For details, visit the IBM Japan Web site at www.ibm.com/jp/pc/service/recycle/personal.html

Disposing of a Lenovo computer component containing heavy metal

The printed circuit board of a Lenovo computer contains heavy metal. (Soldering with lead is used on the printed circuit board.) To properly dispose of the disused printed circuit board, follow the instructions in Collecting and recycling a disused Lenovo computer.
Disposing of a disused lithium battery

A button-shaped lithium battery is installed on the system board of your Lenovo computer to back up the main battery. If you want to replace it with a new one, contact your place of purchase or ask for a repair service provided by IBM. If you have replaced it by yourself and want to dispose of the disused lithium battery, insulate it with vinyl tape, contact your place of purchase, and follow the instructions.

If you use a Lenovo computer at home and need to dispose of a lithium battery, you must comply with local ordinances and regulations.

Handling a disused Lenovo battery pack

Your Lenovo computer has a lithium ion battery pack or a nickel metal hydride battery pack. If you are a company Lenovo computer user and need to dispose of a battery pack, contact the proper person in Lenovo sales, service, or marketing, and follow that person’s instructions. For details, visit the IBM Japan Web site at www.ibm.com/jp/pc/environment/recycle/battery/

If you use a Lenovo computer at home and need to dispose of a battery pack, you must comply with local ordinances and regulations.

Important information for the European Directive 2002/96/EC

Notice: This mark applies only to countries within the European Union (EU) and Norway. This appliance is labelled in accordance with European Directive 2002/96/EC concerning waste electrical and electronic equipment (WEEE). The Directive determines the framework for the return and recycling of used appliances as applicable throughout the European Union. This label is applied to various products to indicate that the product is not to be thrown away, but rather reclaimed upon end of life per this Directive.

**IBM Lotus Software Offer**

**About the offer:** As a qualifying Lenovo computer customer, you are receiving a single, limited license for the Lotus Notes® “standalone” client and a single license for the Lotus SmartSuite® software. These licenses entitle you to install and use this software on your new Lenovo computer using one of the following options:

- **Media for this software is not included in this offer.** If you do not already have the appropriate Lotus Notes Client or Lotus SmartSuite software media, you can order a CD and install the software onto your computer. For more information, see "To order a CD" on page 59.

- **If you already have a licensed copy of the software,** you are entitled to make and use one additional copy of the software you have.

**About IBM Lotus Notes:** With your standalone, limited use Notes client, you can integrate your most valuable messaging, collaborative and personal information management (PIM) resources — like e-mail, calendar, to-do list — allowing you to access them while connected to or disconnected from your network. The standalone license does not include the right to access any IBM Lotus Domino servers; however this stand-alone license may be upgraded to a full Notes license at a reduced price. For more information visit http://www.lotus.com/notes.

**About IBM Lotus SmartSuite:** Lotus SmartSuite contains powerful applications with timesaving features that give you a head start on your work and guide you through individual tasks.

- Lotus Word Pro® – Word Processor
- Lotus 1-2-3® – Spreadsheet
- Lotus Freelance Graphics® – Presentation Graphics
- Lotus Approach® – Database
- Lotus Organizer® – Time, Contact, and Information Manager
• Lotus FastSite® – Web Publisher
• Lotus SmartCenter – Internet Information Manager

Customer Support: For support information and phone numbers to help with initial installation of software, visit http://www.lenovo.com/support. To purchase technical support beyond this initial installation support, visit http://www.lotus.com/passport.

International Program License Agreement: The software licensed to you under this offer does not include software upgrades or technical support, and is subject to the terms and conditions of the IBM International Program License Agreement (IPLA) that accompanies the software. Your use of the Lotus SmartSuite and Lotus Notes programs described in this offer constitutes acceptance of the terms of this Offer and the IPLA. For further information regarding the IBM IPLA, visit http://www.ibm.com/software/sla/sladb.nsf. These programs are not for resale.

Proof of Entitlement: The proof of purchase for your qualifying Lenovo computer, as well as this Offer document, should be retained as your proof of entitlement.

Purchasing Upgrades, Additional Licenses and Technical Support
Software upgrades and technical support are available for a fee through IBM’s Passport Advantage® Program. For information about purchasing additional licenses for Notes, SmartSuite, or other Lotus® products, visit http://www.ibm.com or http://www.lotus.com/passport.

To order a CD:

Important: Pursuant to this Offer, you may order one CD media per license. You will need to provide the 7 digit serial number of the new Lenovo computer that you purchased. The CD is provided at no charge; however, applicable shipping, duties and taxes may be imposed by local jurisdictions. Please allow 10 to 20 business days from receipt of your request for delivery.
