Read first

When your computer is turned on or the battery is charging, the base, the palm rest, and some other parts may become hot. Avoid keeping your hands, your lap, or any other part of your body in contact with a hot section of the computer for any extended length of time. When you use the keyboard, avoid keeping your palms on the palm rest for a prolonged period of time.

Your computer generates some heat during normal operation. The amount of heat depends on the amount of system activity and the battery charge level. Extended contact with your body, even through clothing, could cause discomfort or even a skin burn. Periodically take breaks from using the keyboard by lifting your hands from the palm rest; and be careful not to use the keyboard for any extended length of time.

When the ac adapter is connected to an electrical outlet and your computer, it generates heat. Do not place the adapter in contact with any part of your body while using it. Never use the ac adapter to warm your body. Extended contact with your body, even through clothing, may cause a skin burn.
Route the cables of an ac adapter, a mouse, a keyboard, a printer, or any other electronic device, or communication lines, so that they cannot be walked on, tripped over, pinched by your computer or other objects, or in any way subjected to treatment that could disturb the operation of your computer. Applying strong force to the cables may damage or break them.

Before moving your computer, do one of the following: turn it off, press Fn+F4 to put it in sleep mode, or press Fn+F12 to put it in hibernation mode.

Before moving the computer, make sure that the power on indicator is off. This will help to prevent damage to the hard disk drive, and possible loss of data.

Do not drop, bump, scratch, twist, hit, vibrate, push or place heavy objects on your computer, display, or external devices.

Use a quality carrying case that provides adequate cushion and protection. Do not pack your computer in a tightly packed suitcase or bag.
Place liquids away from your computer to avoid spills, and keep your computer away from water to avoid the danger of electrical shock.
Chapter 1. Finding information

This guide and other publications

Setup Instructions
helps you to unpack your computer and get started. It includes a few tips for first-time users, and introduces software preinstalled by Lenovo™.

This Service and Troubleshooting Guide
provides information about caring for your computer, basic troubleshooting information, some recovery procedures, help and service information, and warranty information for your computer. The troubleshooting information in this Guide applies only to problems that might prevent you from accessing the comprehensive online manual, called Access Help preinstalled on your computer.

Access Help
is a comprehensive online manual that provides answers to most of your questions about your computer, helps you to configure preinstalled features and tools, or solve problems. To open Access Help, do either of the following:
• Press the Lenovo Care button. Under Quick Links in the Lenovo Care, click Access on-system help.
• Click Start, move the pointer to All Programs; then to Lenovo Care. Click Access Help.

Lenovo Care
provides an easy access to software tools and key Lenovo sites, eliminating the need to carry other reference manuals around. To open Lenovo Care, press the Lenovo Care button on your keyboard. For more information about using the Lenovo Care button, see "Finding information with the Lenovo Care button" on page 2.

Safety and Warranty Guide
includes general safety instructions and complete Lenovo Limited Warranty.

Regulatory Notice
supplements this Guide. Read it before you use the wireless features of your computer. Your computer complies with the radio frequency and safety standards of any country or region in which it has been approved for wireless use. You are requested to install and use your computer in strict accordance with the local RF regulations.
Finding information

Finding information with the Lenovo Care button

The Lenovo Care button can help you in many situations when your computer is working normally, and even when it is not. Press the Lenovo Care button to open the Lenovo Care and get access to informative illustrations and easy-to-follow instructions for getting started and staying productive.

You can also use the Lenovo Care button to turn on your computer and immediately enter the Rescue and Recovery™ workspace, which runs independently of the Windows® operating system and is hidden from it.
Chapter 2. Caring for your computer

Though your computer is designed to function reliably in normal work environments, you need to use common sense in handling it. By following these important tips, you will get the most use and enjoyment out of your computer.

Important tips

Be careful about where and how you work

- Do not leave the base of your computer, or any other part that becomes hot during operation, in contact with your lap or any part of your body for an extended period when the computer is functioning or when the battery is charging. Your computer dissipates some heat during normal operation. This heat is a function of the level of system activity and battery charge level. Extended contact with your body, even through clothing, could cause discomfort or, eventually, a skin burn.

- When the ac adapter is connected to an electrical outlet and your computer, it generates heat. Do not place the adapter in contact with any part of your body while using it. Never use the ac adapter to warm your body. Extended contact with your body, even through clothing, may cause a skin burn.

- Route the cables of an ac adapter, a mouse, a keyboard, a printer, or any other electronic device, or communication lines, so that they cannot be walked on, tripped over, pinched by your computer or other objects, or in any way subjected to treatment that could disturb the operation of your computer. Applying strong force to the cables may damage or break them.

- Place liquids away from your computer to avoid spills, and keep your computer away from water (to avoid the danger of electrical shock).

- Store packing materials safely out of the reach of children to prevent the risk of suffocation from plastic bags.

- Keep your computer away from magnets, activated cellular phones, electrical appliances, or speakers (within 13 cm or 5 in).

- Avoid subjecting your computer to extreme temperatures (below 5°C/41°F or above 35°C/95°F).

- Some appliances, such as certain portable desktop fans or air purifiers, can produce negative ions. If a computer is close to such an appliance, and is exposed for an extended time to air containing negative ions, it may become electrostatically charged. Such a charge may be discharged through your hands when you touch the keyboard or other parts of the computer,
Caring for your computer

or through connectors on I/O devices connected to it. Even though this kind of electrostatic discharge (ESD) is the opposite of a discharge from your body or clothing to the computer, it poses the same risk of a computer malfunction.

Your computer is designed and manufactured to minimize any effects of electrostatic charge. An electrostatic charge above a certain limit, however, can increase the risk of ESD. Therefore, when using the computer close to an appliance that can produce negative ions, give special attention to the following:

- Avoid directly exposing your computer to the air from an appliance that can produce negative ions.
- Keep your computer and peripherals as far as possible from such an appliance.
- Wherever possible, ground your computer to facilitate safe electrostatic discharge.

Note: Not all such appliances cause a significant electrostatic charge.

Be gentle with your computer

- Avoid placing any objects (including paper) between the display and the keyboard or under the keyboard.
- Do not drop, bump, scratch, twist, hit, vibrate, push, or place heavy objects on your computer, display, or external devices.
- Your computer display is designed to be opened and used at an angle slightly greater than 90 degrees. Do not open the display beyond 135 degrees, as this might damage the computer hinge.

Carry your computer properly

- Before moving your computer, be sure to remove any media, turn off attached devices, and disconnect cords and cables.
- Be sure your computer is in sleep or hibernation mode, or turned off, before moving it. This will prevent damage to the hard disk drive and data loss.
- When picking up your open computer, hold it by the bottom. Do not pick up or hold your computer by the display.
- Use a quality carrying case that provides adequate cushion and protection. Do not pack your computer in a tightly packed suitcase or bag.

Handle storage media and drives properly

- If your computer comes with an optical drive, do not touch the surface of a disc or the lens on the tray.
- Wait until you hear the CD or DVD click into the center pivot of an optical drive before closing the tray.
Caring for your computer

- When installing your hard disk, follow the instructions shipped with your hardware, and apply pressure only where needed on the device.

Take care in setting passwords
- Remember your passwords. If you forget a supervisor or hard disk password, Lenovo authorized service provider will not reset it, and you might have to replace your system board or hard disk drive.

Other important tips
- Your computer modem might use only an analog telephone network, or public-switched telephone network (PSTN). Do not connect the modem to a PBX (private branch exchange) or any other digital telephone extension line because this could damage your modem. Analog phone lines are often used in homes, while digital phone lines are often used in hotels or office buildings. If you are not sure which kind of phone line you are using, contact your telephone company.
- Your computer might have both an Ethernet connector and a modem connector. If so, be sure to connect your communication cable to the correct one, so your connector is not damaged.
- Register your Lenovo products with Lenovo (refer to the Web page: http://www.lenovo.com/register). This can help authorities return your computer to you if it is lost or stolen. Registering your computer also enables Lenovo to notify you about possible technical information and upgrades.
- Only an authorized Lenovo repair technician should disassemble and repair your computer.
- Do not modify or tape the latches to keep the display open or closed.
- Take care not to turn your computer over while the ac adapter is plugged in. This could break the adapter plug.
- Turn off your computer if you are replacing a device, or else verify that the device is warm- or hot-swappable.
- Before you install any of the following devices, touch a metal table or a grounded metal object. This action reduces any static electricity from your body. The static electricity could damage the device.
  - ExpressCard
  - Smart Card
  - Memory Card, such as SD Card, Memory Stick, MultiMediaCard, xD-Picture Card, and Memory Stick Pro card.
  - Memory module
  - PCI Express Mini Card
- When transferring data to or from a Flash Media Card, such as an SD card, do not put your computer in sleep or hibernation mode before the data transfer is complete. To do so might cause damage to your data.
Caring for your computer

Cleaning the cover of your computer
Occasionally clean your computer as follows:
1. Prepare a mixture of a gentle kitchen-use detergent (one that does not contain abrasive powder or strong chemicals such as acid or alkaline). Use 5 parts water to 1 part detergent.
2. Absorb the diluted detergent into a sponge.
3. Squeeze excess liquid from the sponge.
4. Wipe the cover with the sponge, using a circular motion and taking care not to let any excess liquid drip.
5. Wipe the surface to remove the detergent.
6. Rinse the sponge with clean running water.
7. Wipe the cover with the clean sponge.
8. Wipe the surface again with a dry, soft lint-free cloth.
9. Wait for the surface to dry completely and remove any cloth fibers from the computer surface.

Cleaning your computer keyboard
1. Absorb some isopropyl rubbing alcohol on a soft, dust-free cloth.
2. Wipe each keytop surface with the cloth. Wipe the keys one by one; if you wipe several keys at a time, the cloth may hook onto an adjacent key and possibly damage it. Make sure that no liquid drips onto or between the keys.
3. Allow to dry.
4. To remove any crumbs and dust from beneath the keys, you can use a camera blower with a brush or cool air from a hair drier.

Note: Avoid spraying cleaner directly on the display or the keyboard.

Cleaning your computer display
1. Gently wipe the display with a dry, soft lint-free cloth. If you see a scratchlike mark on your display, it might be a stain transferred from the keyboard when the cover was pressed from the outside.
2. Wipe or dust the stain gently with a soft, dry cloth.
3. If the stain remains, moisten a soft, lint-free cloth with water or a 50-50 mixture of isopropyl alcohol and water that does not contain impurities.
4. Wring out as much of the liquid as you can.
5. Wipe the display again; do not let any liquid drip into the computer.
6. Be sure to dry the display before closing it.

Care for the fingerprint reader
The following actions could damage the fingerprint reader (in some models) or cause it not to work properly:
Caring for your computer

- Scratching the surface of the reader with a hard, pointed object.
- Scraping the surface of the reader with your nail or anything hard.
- Using or touching the reader with a dirty finger.

If you notice any of the following conditions, gently clean the surface of the reader with a dry, soft, lint-free cloth:
- The surface of the reader is dirty or stained.
- The surface of the reader is wet.
- The reader often fails to enroll or authenticate your fingerprint.

Frequently asked questions

This section lists frequently asked questions and tells where you can find detailed answers. For details about each publication included in the package with your computer, see “This guide and other publications” on page 1.

What safety precautions should I follow when using my computer?
See the separate Safety and Warranty Guide for detailed information about safety.

How can I prevent problems with my computer?
See “Read first” on page v, and also Chapter 2, “Caring for your computer,” on page 3 of this Guide. More tips can be found in the “Preventing problems” section in online Help.

What are the main hardware features of my new computer?
See the “Lenovo 3000 tour” section in online Help.

Where can I find the detailed specifications for my computer?
See http://www.lenovo.com/support.

I need to upgrade a device or I need to replace one of the following: the hard disk drive, memory, or the keyboard.
See Appendix B, “Customer Replaceable Units (CRUs),” on page 43 of this Guide for the list of Customer Replaceable Units and the location of the instructions for removing or replacing components.

My computer is not operating properly.
Study the “Problem solving” section in online Help. This Guide describes only problems that might prevent you from accessing the online help system.

Where are the recovery discs?
Your computer did not come with a recovery disc or Windows disc. For an explanation of the alternative recovery methods offered by Lenovo, see the “Restoring factory contents” on page 23 of this Guide.

How can I contact the Customer Support Center?
See Chapter 6, “Getting help and service,” on page 35 of this Guide. For the phone numbers of the Customer Support Center nearest to you, see “Worldwide telephone list” on page 37.
Where can I find warranty information?

See the separate Safety and Warranty Guide for detailed warranty information. For the warranty applicable to your computer, including the warranty period and type of warranty service, see Appendix A, “Warranty information,” on page 41.

Diagnosing problems

If you have a problem with your computer, you can test it by using PC-Doctor® for Windows. To run PC-Doctor for Windows, do as follows:

1. Click Start.
2. Move the pointer to All Programs and then to PC-Doctor for Windows.
3. Click PC-Doctor.

For more information about PC-Doctor for Windows, see the Help for the program.

Attention

Running any tests can take up to several minutes or longer. Make sure you have time to run the entire test; do not interrupt the test while it is running.

When preparing to contact the Customer Support Center, be sure to print the test log so that you can rapidly provide information to the help technician.

Troubleshooting

If you do not find your problem here, see Access Help The following section only describes problems that might prevent you from accessing this help system.

Error messages

The following is a list of the messages that the BIOS can display. Most of them occur during POST. Some of them display information about a hardware device, e.g., the amount of memory installed. Others may indicate a problem with a device, such as the way it has been configured. Following the list are explanations of the messages and remedies for reported problems. If your system displays one of the messages marked below with an asterisk (*), write down the message and contact your marketing representative. If your system fails after you make changes in the BIOS Setup Utility menus, reset the computer, enter BIOS Setup Utility and configure default settings or correct the error.

Errors without messages

<table>
<thead>
<tr>
<th>Problem:</th>
<th>When I turn on the computer, nothing appears on the screen and the computer does not beep while starting up.</th>
</tr>
</thead>
<tbody>
<tr>
<td>Note:</td>
<td>If you are not sure whether you heard any beeps, turn off the computer; then turn it on again, and listen again. If you are using an external monitor, see “Computer screen problems” on page 18.</td>
</tr>
<tr>
<td>Solution:</td>
<td>If a user password is set, press any key to display the user password prompt; then type the correct password and press Enter. If the user password prompt does not appear, the brightness level might be set to minimum brightness. Adjust the brightness level by pressing Fn+F11. If the screen still remains blank, make sure that: • The battery is installed correctly. • The ac adapter is connected to the computer and the power cord is plugged into a working electrical outlet. • The computer power is on. (Turn on the power switch again for confirmation.) If these items are properly set, and the screen remains blank, have the computer serviced.</td>
</tr>
</tbody>
</table>

| Problem: | When I turn on the computer, nothing appears on the screen, but I hear two or more beeps. |
| Solution: | Make sure that the memory card is installed correctly. If it is, but the screen is still blank, and you hear five beeps, have the computer serviced. |

| Problem: | When I turn on the computer, only a white cursor appears on a blank screen. |
| Solution: | Restore backed-up files to your Windows environment or the entire contents of your hard disk to the original factory contents using Rescue and Recovery. If you still see only the cursor on the screen, have the computer serviced. |

| Problem: | My screen goes blank while the computer is on. |
| Solution: | Your screen saver or power management may be enabled. Do one of the following to exit from the screen saver or to resume from sleep or hibernation mode: • Touch the touch pad. • Press a key. • Press the power switch. |
## A password problem

| Problem: | I forgot my password. |
| Solution: | • If you forgot your user password, you must take your computer to a Lenovo authorized servicer or a marketing representative to have the password canceled.  
• If you forgot your HDD password, Lenovo authorized servicer can not reset your password or recover data from the hard disk. You must take your computer to a Lenovo authorized servicer or a marketing representative to have the hard disk drive replaced. Proof of purchase is required, and a fee will be charged for parts and service.  
• If you forget your supervisor password, Lenovo authorized servicer cannot reset your password. You must take your computer to a Lenovo authorized servicer or a marketing representative to have the system board replaced. Proof of purchase is required, and a fee will be charged for parts and service. |

## Keyboard problems

| Problem: | A number appears when you type a letter. |
| Solution: | The numeric lock function is on. To disable it, press Fn+Delete. |

| Problem: | All or some of the keys on the external numeric keypad do not work. |
| Solution: | Make sure that the external numeric keypad is correctly connected to the computer. |

## Sleep or hibernation problems

| Problem: | The computer enters sleep mode unexpectedly. |
| Solution: | If the processor overheats, the computer automatically enters sleep mode to allow the computer to cool and to protect the processor and other internal components. Check the settings for sleep mode. |
### Problem:
The computer enters sleep mode (the sleep indicator turns on) immediately after Power-on self-test (POST).

### Solution:
Make sure that:
- The battery is charged.
- The operating temperature is within the acceptable range. See “Specifications” on page 46.

If the battery is charged and the temperature is within range, have the computer serviced.

### Problem:
The critical low-battery error message appears, and the computer immediately turns off.

### Solution:
The battery power is getting low. Connect the ac adapter to the computer, or replace the battery with a fully charged one.

### Problem:
When you take action to return from sleep mode, the computer display remains blank.

### Solution:
Check whether an external monitor was disconnected or turned off while the computer was in sleep mode. If you disconnected or turned off the external monitor, connect it or turn it on before resuming the computer from the sleep mode. When resuming the computer from the sleep mode without attaching the external monitor or turning it on, and the computer display remains blank, press Fn+F7 to bring up the computer display.

**Note:** If you use the Fn+F7 key combination to apply a presentation scheme, press Fn+F7 at least three times in three seconds, and the image is displayed on the computer screen.

### Problem:
The computer does not return from sleep mode, or the sleep indicator stays on and the computer does not work.

### Solution:
If the computer does not return from sleep mode, it may have entered sleep or hibernation mode automatically because the battery is depleted. Check the sleep indicator.
- If the sleep indicator is on, your computer is in sleep mode. Connect the ac adapter to the computer; then press any key or the power button.
- If the sleep indicator is off, your computer is in hibernation mode or power-off state. Connect the ac adapter to the computer; then press power button to resume operation.

If the system still does not return from sleep mode, your system may stop responding and you cannot turn off the computer. Reset the computer. Unsaved data may be lost. To reset the computer, press and hold the power button for 4 seconds or more. If the computer is still not reset, remove the ac adapter and the battery.
## Solving computer problems

### Computer screen problems

<table>
<thead>
<tr>
<th>Problem:</th>
<th>The screen is blank.</th>
</tr>
</thead>
<tbody>
<tr>
<td>Solution:</td>
<td>Do the following:</td>
</tr>
<tr>
<td></td>
<td>• Press Fn+F7 to bring up the image.</td>
</tr>
<tr>
<td></td>
<td><strong>Note:</strong> If you use the Fn+F7 key combination to apply a presentation scheme, press Fn+F7 at least three times in three seconds, and the image is displayed on the computer screen.</td>
</tr>
<tr>
<td></td>
<td>• If you are using the ac adapter, or using the battery, and the battery status indicator is on (is green), press Fn+F11 to make the screen brighter.</td>
</tr>
<tr>
<td></td>
<td>• If the sleep status indicator is on (is green), press any key or the power button to resume from the sleep mode.</td>
</tr>
<tr>
<td></td>
<td>• If you still have the problem, do the Solution in the following problem “The screen is unreadable or distorted.”</td>
</tr>
<tr>
<td>Problem:</td>
<td>The screen is unreadable or distorted.</td>
</tr>
<tr>
<td>----------</td>
<td>--------------------------------------</td>
</tr>
</tbody>
</table>
| Solution: | Make sure that:  
• The display device driver is installed correctly.  
• The screen resolution and color quality are correctly set.  
• The monitor type is correct.  
To check these settings, do as follows:  
1. Right-click on the desktop, and click Personalize.  
2. Click Display Settings and check whether the screen resolution and color quality are correctly set.  
3. Click Advanced Settings.  
4. Click the Adapter tab.  
5. Make sure that the correct device driver name is shown in the adapter information window.  
   **Note:** The device driver name depends on the video chip that has been installed on your computer.  
6. Click the Properties button. If you are prompted for an administrator password or confirmation, type the password or provide confirmation. Check the "Device status" box and make sure the device is working properly. If not, click the Troubleshoot button.  
7. Click the Monitor tab.  
8. Make sure the information is correct.  
9. Click the Properties button. If you are prompted for an administrator password or confirmation, type the password or provide confirmation. Check the "Device status" box and make sure the device is working properly. If not, click the Troubleshoot button. |

Solving computer problems

A hard disk drive problem

| Problem: | The hard disk drive does not work. |
| Solution: | In the Boot menu in BIOS Setup Utility, make sure that the hard disk drive is included in the Boot Sequence correctly. |

A startup problem

| Problem: | The Microsoft® Windows operating system will not start. |
| Solution: | Use the Rescue and Recovery workspace to help solve or identify your problem. For details about Rescue and Recovery, see ![Chapter 4, “Recovery options,” on page 23](#). |

A fingerprint authentication problem

| Problem: | You cannot register or authenticate your finger because it is wrinkled, rough, dry, injured, stained, oily, wet, or different one from what you have registered. |
| Solution: | To improve the situation, try the following:  
  * Clean or wipe your hands to remove any excess dirt or moisture from the fingers.  
  * Enroll and use a different finger for authentication.  
  * If your hands are too dry, apply lotion to them.  
For details, see the Fingerprint reader category in Troubleshooting under the "Problem solving” section in ![Access Help](#). |

Other problems

| Problem: | Your computer does not respond. |
| Solution: |  
  * To turn off your computer, press and hold the power switch for 4 seconds or more. If the computer still does not respond, remove the ac adapter and the battery.  
  * Your computer might lock when it enters sleep mode during a communication operation. Disable the sleep timer when you are working on the network. |
**Solving computer problems**

**Problem:** The computer does not start from a device you want.

**Solution:**

See the Startup menu of the BIOS Setup Utility. Make sure that the startup sequence in the BIOS Setup Utility is set so that the computer starts from the device you want.

Also make sure that the device from which the computer starts is enabled. In the startup menu in the BIOS Setup Utility, make sure that the device is included in the "Boot priority order" list. If it is included in the "Excluded from boot order" list, it is disabled. Select the entry for it in the list and press the x key. This moves the entry to the "Boot priority order" list.
Chapter 4. Recovery options

Using Rescue and Recovery

If Windows is not running properly, use the Rescue and Recovery workspace to help solve or identify your problem. Do the following:

1. Turn off your computer.
2. Press the Lenovo Care button to turn on the computer and immediately enter the Rescue and Recovery workspace.
3. After the Rescue and Recovery workspace opens, you can do the following:
   • Rescue and restore your files, folders, or backups.
   • Configure your computer and passwords.
   • Communicate using the Internet and link to the support site.
   • Troubleshoot and diagnose problems using diagnostics.

For more information about using Rescue and Recovery features, see the “Recovery overview” section in online [Access Help].

Restoring factory contents

Instead of providing a recovery disc or a Windows disc with your computer, Lenovo provides simpler alternative methods of accomplishing the tasks typically associated with these discs. The files and programs for these alternative methods are on your hard disk, which eliminates having to locate misplaced discs and problems associated with using an incorrect disc version.

The complete backup of all the files and programs that Lenovo preinstalled on your computer resides in a hidden protected area, or partition, of the hard disk. Although hidden, the backups in the partition consume hard disk space. Therefore, when checking the capacity of your hard disk according to Windows, you might note that the total capacity of the disk appears to be smaller than anticipated. This discrepancy is explained by the contents of the hidden partition.

The Product Recovery Program contained within this area enables you to restore the complete contents of your hard disk to the same state as it was when originally shipped from the factory.

Note: The recovery process might take a couple of hours.

To recover the hard disk to its original contents, do the following:
Recovery options

Attention: All of the files on the primary hard disk partition (usually drive C) will be lost in the recovery process. However, before any data is overwritten, you will be given the opportunity to save one or more files to other media.

1. If possible, save all your files and shut down your operating system.
2. Turn off your computer for at least 5 seconds.
3. Select the On position of the wireless radio switch on your computer.

Note: If you forget to select the On position of the wireless radio switch, your wireless network card will not be recognized, and the wireless card driver will not be included in your system.

4. Press the Lenovo Care button to turn on the computer and immediately enter the Rescue and Recovery workspace.
5. Click Restore your system, select Restore my hard drive to the original factory state, and follow the instructions on the screen.

Recovering data

If you performed a backup operation using the Rescue and Recovery program, you also have one or more backups stored that reflect the contents of the hard disk as it existed at various points in time. These backups might be stored on your hard disk, or a network drive, or on removable media, depending on the options you selected during the backup operation.

You can use either the Rescue and Recovery program or the Rescue and Recovery workspace to restore the contents of the hard disk to an earlier state using any of the stored backups. You can use the Lenovo Care button to turn on your computer and enter the Rescue and Recovery workspace that runs independently of the Windows operating system.

After the Rescue and Recovery workspace opens you can perform a recovery operation, even if you are unable to start Windows.
Chapter 5. Upgrading and replacing devices

Replacing the battery

**Important**
Read *Safety and Warranty Guide* before replacing the battery.

1. **Turn off the computer, or enter hibernation mode.** Then disconnect the ac adapter and all cables from the computer.

   **Note:** If you are using a PC Card, the computer might not be able to enter hibernation mode. If this happens, turn off the computer.

2. Close the computer display, and turn the computer over.
3. Unlock the battery latch by sliding it to the unlocked position.

14.1-inch screen models:  
15.4-inch screen models:
Replacing the battery

4. Unlock the battery latch by sliding it to the unlocked position, and while holding it in the position remove the battery.

5. Install a new battery.
Replacing the battery

6. Slide the battery latch to the locked position.

14.1-inch screen models:

15.4-inch screen models:

7. Turn the computer over again. Connect the ac adapter and cables to the computer.

Upgrading the hard disk drive

**Important**

Read *Safety and Warranty Guide* before replacing the hard disk drive.

You can increase the storage capacity of your computer by replacing the hard disk drive with one of greater capacity. You can purchase a new hard disk drive from your Lenovo reseller or a marketing representative.

**Notes:**

1. Replace the hard disk drive only if you upgrade it or have it repaired. The connectors and bay of the hard disk drive were not designed for frequent changes, or drive swapping.

2. The Rescue and Recovery workspace and the Product Recovery program are not included on an optional hard disk drive.
Upgrading the hard disk drive

Attention
Handling a hard disk drive
- Do not drop the drive or subject it to physical shocks. Put the drive on a material, such as soft cloth, that absorbs the physical shock.
- Do not apply pressure to the cover of the drive.
- Do not touch the connector.

The drive is very sensitive. Incorrect handling can cause damage and permanent loss of data on the hard disk. Before removing the hard disk drive, make a backup copy of all the information on the hard disk, and then turn the computer off. Never remove the drive while the system is operating, in sleep mode, or in hibernation mode.

To replace the hard disk drive, do the following:
1. Turn off the computer; then disconnect the ac adapter and all cables from the computer.
2. Close the computer display, and turn the computer over.
3. Remove the battery.
4. Loosen two screws, and remove the hard disk cover.

14.1-inch screen models:

15.4-inch screen models:
5. Slide the hard disk drive toward the side of the computer to disconnect it, then pull out the tab to remove the drive.

6. Place a new hard disk drive into the hard disk drive bay, then connect it firmly.
Upgrading the hard disk drive

7. Align the front side of the hard disk cover, reinstall the cover, and tighten the screws.

14.1-inch screen models:

15.4-inch screen models:

8. Reinstall the battery.

9. Turn the computer over again. Connect the ac adapter and cables to the computer.

Replacing memory

**Important**

Read *Safety and Warranty Guide* before replacing memory.

Increasing memory capacity is an effective way to make programs run faster. You can increase the amount of memory in your computer by installing a PC2-5300 (double data rate 2 (DDR 2) 667) synchronous dynamic random access memory (DRAM) unbuffered small outline dual inline memory module (SO-DIMM), available as an option, in the memory slot of your computer. SO-DIMMs with different capacities are available.

**Note:** Use only the memory types supported by your computer. If you incorrectly install the optional memory or install an unsupported memory type, a warning beep will sound when you try to start the computer.

To install an SO-DIMM, do the following:

1. Touch a metal table or a grounded metal object. This action reduces any static electricity in your body, that could damage the SO-DIMM. Do not touch the contact edge of the SO-DIMM.
Replacing memory

2. **Turn off the computer**; then disconnect the ac adapter and all cables from the computer.
3. Close the computer display, and turn the computer over.
4. Remove the battery.
5. Loosen the screw(s) on the cover of the memory slot, and remove the cover.

14.1-inch screen models:

15.4-inch screen models:

6. If two SO-DIMMs are already installed in the memory slots, remove one of them to make room for the new one by pressing out on the latches on both edges of the socket at the same time. Be sure to save it for future use.

14.1-inch screen models:

15.4-inch screen models:

7. Find the notch on the contact edge side of the SO-DIMM.
   
   **Attention:** To avoid damaging the SO-DIMM, do not touch its contact edge.
Replacing memory

8. With the notched end of the SO-DIMM toward the contact edge side of the socket, firmly insert the SO-DIMM into the socket at an angle of about 20 degrees 1, then press it firmly 2.

9. Push the SO-DIMM downward until it snaps into place.

10. Make sure that the card is firmly fixed in the slot and does not move easily.

11. Reinstall the cover of the memory slot by aligning the front side of the cover 1, and closing the cover 2. Tighten the screw(s) 3.

**Attention:** When you have added or upgraded an SO-DIMM, do not use your computer until you have closed the memory slot cover. Never use the computer with the cover open.

12. Reinstall the battery.
Replacing memory

13. Turn the computer over again, and reconnect the ac adapter and cables to the computer.

To make sure that the SO-DIMM is installed correctly, do as follows:
1. Turn the computer on.
2. While the initial screen is displayed, press F1. The BIOS Setup Utility screen opens.
3. The "Memory" item shows the amount of memory you can utilize.
Replacing memory
Chapter 6. Getting help and service

Getting help and service

If you need help, service, technical assistance, or just want more information about Lenovo computers, you will find a wide variety of sources available from Lenovo to assist you. This section contains information about where to go for additional information about Lenovo computers, what to do if you experience a problem with your computer, and whom to call for service should it be necessary.

Microsoft Service Packs are the latest software source for Windows product updates. They are available via Web download (connection charges may apply) or via a disc. For more specific information and links, please go to the Microsoft Web site at [http://www.microsoft.com](http://www.microsoft.com). Lenovo offers Up and Running technical assistance with installation of, or questions related to, Service Packs for your Lenovo-preinstalled Microsoft Windows product. For information, please contact the Customer Support Center at the phone number(s) listed in “Worldwide telephone list” on page 37. Some fees might apply.

Getting help on the Web

The Lenovo Web site on the World Wide Web has up-to-date information about Lenovo computers and support. The address for the Lenovo home page is [http://www.lenovo.com](http://www.lenovo.com).

You can find support information for your Lenovo 3000 computer at [http://www.lenovo.com/support](http://www.lenovo.com/support). Research this Web site to learn how to solve problems, find new ways to use your computer, and learn about options that can make working with your Lenovo computer even easier.

Calling the Customer Support Center

If you have tried to correct the problem yourself and still need help, during the warranty period, you can get help and information by telephone through the Customer Support Center. The following services are available during the warranty period:

- Problem determination - Trained personnel are available to assist you with determining if you have a hardware problem and deciding what action is necessary to fix the problem.
Lenovo hardware repair - If the problem is determined to be caused by Lenovo hardware under warranty, trained service personnel are available to provide the applicable level of service.

Engineering change management - Occasionally, there might be changes that are required after a product has been sold. Lenovo or your reseller, if authorized by Lenovo, will make selected Engineering Changes (ECs) available that apply to your hardware.

The following items are not covered:

- Replacement or use of parts not manufactured for or by Lenovo or nonwarranted parts

Note: All warranted parts contain a 7-character identification in the format FRU XXXXXX

- Identification of software problem sources
- Configuration of BIOS as part of an installation or upgrade
- Changes, modifications, or upgrades to device drivers
- Installation and maintenance of network operating systems (NOS)
- Installation and maintenance of application programs

To determine if your Lenovo hardware product is in warranty and when the warranty expires, go to [http://www.lenovo.com/support](http://www.lenovo.com/support) and click Warranty, then follow the instructions on the screen.

Refer to your Lenovo hardware warranty for a full explanation of Lenovo warranty terms. Be sure to retain your proof of purchase to obtain warranty service.

If possible, be near your computer when you make your call in case the technical assistance representative needs to help you resolve a computer problem. Please ensure that you have downloaded the most current drivers and system updates, run diagnostics, and recorded information before you call. When calling for technical assistance, please have the following information available:

- Machine Type and Model
- Serial numbers of your computer, monitor, and other components, or your proof of purchase
- Description of the problem
- Exact wording of any error messages
- Hardware and software configuration information for your system

The telephone numbers for your Customer Support Center location are located in the [Worldwide telephone list](#) section of this guide.

Note: Telephone numbers are subject to change without notice. For the latest list of Customer Support Center telephone numbers and hours of
Getting help and service

If you travel with your computer or relocate it to a country where your Lenovo machine type is sold, your computer might be eligible for International Warranty Service, which automatically entitles you to obtain warranty service throughout the warranty period. Service will be performed by service providers authorized to perform warranty service.

Service methods and procedures vary by country, and some services might not be available in all countries. International Warranty Service is delivered through the method of service (such as depot, carry-in, or on-site service) that is provided in the servicing country. Service centers in certain countries might not be able to service all models of a particular machine type. In some countries, fees and restrictions might apply at the time of service.

To determine whether your computer is eligible for International Warranty Service and to view a list of the countries where service is available, go to http://www.lenovo.com/support, click Warranty, and follow the instructions on the screen.

Appendix A. Warranty information

This Appendix provides information regarding the warranty period and type of warranty service applicable to your Machine in your country or region. For the terms and conditions of the Lenovo Limited Warranty that applies to your Lenovo hardware product, see Chapter 3, Warranty Information in the Safety and Warranty Guide included with your Lenovo hardware product.

Types of warranty service

If required, your Service Provider will provide repair or exchange service depending on the type of warranty service specified for your Lenovo hardware product in the above table and as described below. Scheduling of service will depend upon the time of your call and is subject to parts availability. Service levels are response time objectives and are not guaranteed. The specified level of warranty service may not be available in all worldwide locations, additional charges may apply outside your Service Provider’s normal service area, contact your local Service Provider representative or your reseller for country and location specific information.

1. **Customer Replaceable Unit (“CRU”) Service**

Under CRU Service, your Service Provider will ship CRUs to you for you to install. Most CRUs are easy to install whereas others may require some technical skill and tools. CRU information and replacement instructions are shipped with your product and are available from Lenovo at any time upon request. You may request that a Service Provider install some CRUs under one of the other types of warranty service designated for your product. Installation of external CRUs (such as mice, keyboards, or monitors) is your responsibility. Lenovo specifies in the materials shipped with a replacement CRU whether the defective CRU must be returned.
When return is required, 1) return instructions, a prepaid return shipping label, and a container are included with the replacement CRU, and 2) you may be charged for the replacement CRU if your Service Provider does not receive the defective CRU within thirty (30) days of your receipt of the replacement.

2. **On-site Service**
   Under On-Site Service, your Service Provider will either repair or exchange the product at your location. You must provide a suitable working area to allow disassembly and reassembly of the Lenovo product. For some products, certain repairs may require your Service Provider to send the product to a designated service center.

3. **Courier or Depot Service**
   Under Courier or Depot Service, your product will be repaired or exchanged at a designated service center, with shipping arranged by your Service Provider. You are responsible for disconnecting the product. A shipping container will be provided to you for you to return your product to a designated service center. A courier will pick up your product and deliver it to the designated service center. Following its repair or exchange, the service center will arrange the return delivery of the product to you.

4. **Customer Carry-In or Mail-In Service**
   Under Customer Carry-In or Mail-In Service, your product will be repaired or exchanged at a designated service center, with delivery or shipping arranged by you. You are responsible to deliver or mail, as your Service Provider specifies, (prepaid unless specified otherwise) the product suitably packaged to a designated location. After the product has been repaired or exchanged, it will be made available for your collection. Failure to collect the product may result in your Service Provider disposing of the product as it sees fit. For Mail-in Service, the product will be returned to you at Lenovo’s expense, unless your Service Provider specifies otherwise.
Appendix B. Customer Replaceable Units (CRUs)

Customer Replaceable Units (CRUs) are computer parts that can be upgraded or replaced by the customer. There are two types of CRUs: **internal** and **external**. External CRUs are easy to install, whereas internal CRUs require some technical skills and in some cases might require tools such as a screwdriver. However, both internal and external CRUs are safe for removal by the customer.

Customers are responsible for replacing all external CRUs. Internal CRUs can be removed and installed by customers or by a Lenovo service technician during the warranty period.

Your computer contains the following types of external CRUs:

- **External CRUs (pluggable):** These CRUs unplug from the computer. Examples of these types of CRUs include the ac adapter and power cord.
- **External CRUs with latches:** These CRUs include a latch to help you remove and replace the part. Examples of these types of CRUs include the notebook main battery, an optical drive, a hard-disk drive, and an extended battery.

Your computer contains the following types of internal CRUs:

- **Internal CRUs (located behind an access panel):** These CRUs are isolated parts within the computer that are concealed by an access panel that is typically secured by either one or two screws. Once the access panel is removed, only the specific CRU is visible. Examples of these types of CRUs include memory modules and hard disk drives.
- **Internal CRUs (located within the product):** These CRUs are accessible only by opening the computer’s outer case. Examples of these CRUs include PCI Express Mini Cards and the integrated keyboard.

Online [Access Help](#) provides instructions for replacing internal and external CRUs. To open [Access Help](#), click Start, move the pointer to All Programs; then to Lenovo Care. Click Access Help.

Additionally, the Service and Troubleshooting Guide (this guide) and Setup [Instructions](#) provide instructions for several critical CRU’s.

If you are unable to access these instructions or if you have difficulty replacing a CRU, you can use either of the following additional resources:
- The Online Hardware Maintenance Manual and Online Videos available from the Support Web site
  &indocid=part-video

- The Customer Support Center. For the telephone number of the Support Center for your country or region, see “Worldwide telephone list” on page 37.

Note: Only use computer parts provided by Lenovo. See Chapter 3, Warranty Information in the Safety and Warranty Guide for warranty information about the CRUs for your machine type.

The following table provides a list of CRUs for your computer and where to locate the replacement instructions.

Appendix C. Features and specifications

For details about each part and its function of your computer, see “About your computer” in online Access Help.

Features

Processor
- See the system properties of you computer. You can do this as follows:
  Click Start, right-click Computer; then from the pull down menu select Properties.

Memory
- Double data rate (DDR) II 667 (PC2-5300) synchronous dynamic random access memory (DRAM)

Storage device
- 2.5-inch hard disk drive

Display
The color display uses TFT technology:
- Size: 14.1-inch or 15.4-inch, depending on the model
- Resolution:
  – LCD: 1280-by-800
  – External monitor: Up to 2048-by-1536
- Brightness control
- Integrated camera (on some models)

Keyboard
- Fingerprint reader (on some models)
- 84-key, 85-key, or 89-key
- Touch pad
- Fn key function
- Lenovo Care button
- Volume control buttons

Interface
- External-monitor connector
- S-Video connector
- Stereo headphone jack
- Microphone jack
- 4 Universal Serial Bus (USB) connectors
- RJ11 telephone connector
Features

- RJ45 Ethernet connector
- IEEE1394

ExpressCard slot
- ExpressCard

Optical drive
- CD-ROM, DVD-ROM, Combo or Multi drive depending on the model.

Wireless features
- Integrated wireless LAN or Bluetooth (on some models)

Digital media reader
- 5-in-1 (SD card, MMC, Memory Stick, xD-Pictur Card, Memory Stick Pro) digital media slot

Specifications

Size
- 14.1-inch screen model
  - Width: 335 mm
  - Depth: 246 mm
  - Height: 30 to 36 mm
- 15.4-inch screen model
  - Width: 360 mm
  - Depth: 267 mm or 287 mm
  - Height: 31.4 to 38.6 mm

Environment
- Maximum altitude without pressurization: 3048 m (10000 ft)
- Temperature
  - At altitudes up to 2438 m (8000 ft)
    - Operating: 5° to 35°C (41° to 95°F)
    - Not operating: 5° to 43°C (41° to 109°F)
  - At altitudes above 2438 m (8000 ft)
    - Maximum operating temperature, 31.3°C (88° F)

Note: When you charge the battery pack, its temperature must be at least 10°C (50°F).
- Relative humidity:
  - Operating: 8% to 80%
  - Non-operating: 5% to 95%

Heat output
- 90 W (307 Btu/hour) maximum for Discrete Graphics Models
Specifications

- 65 W (222 Btu/hour) maximum for Integrated Graphics Models

**Power source (ac adapter)**
- Sine-wave input at 50 to 60 Hz
- Input rating of the ac adapter: 100-240 V ac, 50 to 60 Hz

**Battery pack**
- Lithium-ion (Li-Ion) battery pack
  - Nominal voltage: 10.8 V dc
  - Capacity: 4.8 AH or 7.2 AH, depending on the model

**Battery life**
- For percentage of battery power remaining, see Power Meter on the task tray.
Specifications
Appendix D. Notices

Notices

Lenovo may not offer the products, services, or features discussed in this document in all countries. Consult your local Lenovo representative for information on the products and services currently available in your area. Any reference to a Lenovo product, program, or service is not intended to state or imply that only that Lenovo product, program, or service may be used. Any functionally equivalent product, program, or service that does not infringe any Lenovo intellectual property right may be used instead. However, it is the user’s responsibility to evaluate and verify the operation of any other product, program, or service.

Lenovo may have patents or pending patent applications covering subject matter described in this document. The furnishing of this document does not give you any license to these patents. You can send license inquiries, in writing, to:

Lenovo (United States), Inc.
1009 Think Place - Building One
Morrisville, NC 27560
U.S.A.
Attention: Lenovo Director of Licensing

LENOVO PROVIDES THIS PUBLICATION “AS IS” WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESS OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF NON-INFRINGEMENT, MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE. Some jurisdictions do not allow disclaimer of express or implied warranties in certain transactions, therefore, this statement may not apply to you.

This information could include technical inaccuracies or typographical errors. Changes are periodically made to the information herein; these changes will be incorporated in new editions of the publication. Lenovo may make improvements and/or changes in the product(s) and/or the program(s) described in this publication at any time without notice.

The products described in this document are not intended for use in implantation or other life support applications where malfunction may result in injury or death to persons. The information contained in this document does not affect or change Lenovo product specifications or warranties. Nothing in this document shall operate as an express or implied license or indemnity under the intellectual property rights of Lenovo or third parties. All
information contained in this document was obtained in specific environments and is presented as an illustration. The result obtained in other operating environments may vary.

Lenovo may use or distribute any of the information you supply in any way it believes appropriate without incurring any obligation to you.

Any references in this publication to non-Lenovo Web sites are provided for convenience only and do not in any manner serve as an endorsement of those Web sites. The materials at those Web sites are not part of the materials for this Lenovo product, and use of those Web sites is at your own risk.

Any performance data contained herein was determined in a controlled environment. Therefore, the result obtained in other operating environments may vary significantly. Some measurements may have been made on development-level systems and there is no guarantee that these measurements will be the same on generally available systems. Furthermore, some measurements may have been estimated through extrapolation. Actual results may vary. Users of this document should verify the applicable data for their specific environment.

**Television output notice**

The following notice applies to models that have the factory-installed television-output feature.

This product incorporates copyright protection technology that is protected by U.S. patents and other intellectual property rights. Use of this copyright protection technology must be authorized by Macrovision, and is intended for home and other limited viewing uses only unless otherwise authorized by Macrovision. Reverse engineering or disassembly is prohibited.

**Electronic emissions notices**

The following information refers to Lenovo 3000 N200, machine type 0687 and 0769.

**Federal Communications Commission (FCC) Statement**

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee the interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or
television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult an authorized dealer or service representative for help.

Properly shielded and grounded cables and connectors must be used in order to meet FCC emission limits. Proper cables and connectors are available from Lenovo authorized dealers. Lenovo is not responsible for any radio or television interference caused by using other than recommended cables or connectors or by unauthorized changes or modifications to this equipment. Unauthorized changes or modifications could void the user’s authority to operate the equipment.

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Responsible party:
Lenovo (United States) Incorporated
1009 Think Place - Building One
Morrisville, NC 27650
U.S.A.
Telephone: (919) 294-5900

Industry Canada Class B emission compliance statement
This Class B digital apparatus complies with Canadian ICES-003.

Avis de conformité à la réglementation d’Industrie Canada
Cet appareil numérique de la classe B est conforme à la norme NMB-003 du Canada.

European Union EMC Directive conformance statement
This product is in conformity with the protection requirements of EU Council Directive 89/336/EEC on the approximation of the laws of the Member States relating to electromagnetic compatibility. Lenovo cannot accept responsibility
for any failure to satisfy the protection requirements resulting from a nonrecommended modification of the product, including the fitting of non-Lenovo option cards.

This product has been tested and found to comply with the limits for Class B Information Technology Equipment according to CISPR 22/European Standard EN 55022. The limits for Class B equipment were derived for typical residential environments to provide reasonable protection against interference with licensed communication devices.

Properly shielded and grounded cables and connectors must be used in order to reduce the potential for causing interference to radio and TV communications and to other electrical or electronic equipment. Such cables and connectors are available from Lenovo authorized dealers. Lenovo cannot accept responsibility for any interference caused by using other than recommended cables and connectors.

**Japanese VCCI Class B statement**

この装置は、情報処理装置等電波障害自主規制協議会（V C C I）の基準に基づくクラスB情報技術装置です。この装置は、家庭環境で使用することを目的としていますが、この装置がラジオやテレビジョン受信機に近接して使用されると、受信障害を引き起こすことがあります。

取扱説明書に従って、正しい取扱いをして下さい。

**EU WEEE Statements**

The Waste Electrical and Electronic Equipment (WEEE) mark applies only to countries within the European Union (EU) and Norway. Appliances are labeled in accordance with European Directive 2002/96/EC concerning waste electrical and electronic equipment (WEEE). The Directive determines the framework for the return and recycling of used appliances as applicable throughout the European Union. This label is applied to various products to indicate that the product is not to be thrown away, but rather reclaimed upon end of life per this Directive.

Users of electrical and electronic equipment (EEE) with the WEEE marking per Annex IV of the WEEE Directive must not dispose of end of life EEE as unsorted municipal waste, but use the collection framework available to them for the return, recycle, recovery of WEEE and minimize any potential effects of EEE on the environment and human health due to the presence of
hazardous substances. For additional WEEE information go to: http://www.lenovo.com/lenovo/environment

Notice for users in the U.S.A.

California Perchlorate Information:

Products containing CR (manganese dioxide) lithium coin cell batteries may contain perchlorate.

Perchlorate Material — special handling may apply.

IBM Lotus Software Offer

About the offer: As a qualifying purchaser of a Lenovo notebook computer, you are receiving a single, limited license for the Lotus Notes® “standalone” client. This license entitles you to install and use this software on your new Lenovo notebook computer using one of the following options:

• Media for this software is not included in this offer. If you do not already have the appropriate Lotus Notes Client software media, you can order a CD and install the software onto your computer. For more information, see “To order a CD” on page 54.

• If you already have a licensed copy of the software, you are entitled to make and use one additional copy of the software you have.

About IBM Lotus Notes: With your standalone, limited use Notes client, you can integrate your most valuable messaging, collaborative and personal information management (PIM) resources —like e-mail, calendar, to-do list — allowing you to access them while connected to or disconnected from your network. The standalone license does not include the right to access any IBM® Lotus Domino® servers; however this stand-alone license may be upgraded to a full Notes license at a reduced price. For more information visit http://www.lotus.com/notes

Customer Support: For support information and phone numbers to help with initial installation of software, visit [http://www.lenovo.com/support]. To purchase technical support beyond this initial installation support, visit [http://www.lotus.com/passport].

International Program License Agreement: The software licensed to you under this offer does not include software upgrades or technical support, and is subject to the terms and conditions of the IBM International Program License Agreement (IPLA) that accompanies the software. Your use of the Lotus Notes program described in this offer constitutes acceptance of the
terms of this Offer and the IPLA. For further information regarding the IBM IPLA, visit [http://www.ibm.com/software/sla/sladb.nsf]. These programs are not for resale.

**Proof of Entitlement:** The proof of purchase for your qualifying Lenovo notebook computer, as well as this Offer document, should be retained as your proof of entitlement.

**Purchasing Upgrades, Additional Licenses and Technical Support**
Software upgrades and technical support are available for a fee through IBM’s Passport Advantage® Program. For information about purchasing additional licenses for Notes or other Lotus products, visit [http://www.ibm.com] or [http://www.lotus.com/passport].

**To order a CD:**

**Important:** Pursuant to this Offer, you may order one CD media per license. You will need to provide the 7 digit serial number of the new Lenovo notebook computer that you purchased. The CD is provided at no charge; however, applicable shipping, duties and taxes may be imposed by local jurisdictions. Please allow 10 to 20 business days from receipt of your request for delivery.
