- 3.0 Uninstallation
- 4.0 TNG map visualization

1.0 Components and System Requirements

This section explains the minimum system requirements for and describes functionality of the different components of the System. This is meant to help you understand the architecture and how to set up a proper working system.

Distributed State Machine (DSM) Component

The DSM component discovers the Director Agents. The DSM polls the agents and monitors the same.

World View (WV) component

The WV component creates a Business Process View for Director Agents. All the nodes monitored by the DSM in the network with the Director Agents are included in the Business Process view.

Asset Management Option Component

The Asset Management Option component integrates Director Agents with the AMO Agent of Unicenter NSM. If this option is installed, AMO agent detects Director Agents as an asset and will add the same in its AMO Agent database.

Following are minimum system requirements.

Unicenter NSM Distributed State Machine, WorldView Interface (2D & 3D Maps) & Event Management on Windows NT 4.0 or Windows 2000 Server running MS SQL 7.0/ 2000 as database.

2.0 How Can I Set Director Agent Upward Integration with TNG?

In order to launch the Setup program, you must have access to a CD-ROM drive, either locally installed or via the network. To install on a local hard disk or shared network drive, proceed as follows:

- 1. Start Windows, and close all open applications.
- 2. Insert the CD-ROM in the appropriate drive.
- 3. In the Windows Program Manager, choose Run from the Start menu.
- 4. In the Command Line box, type the letter of the drive containing the CD-ROM, a colon, a backslash, and the filename SETUP.EXE
- 5. Example: E:\setup.exe
- 6. Choose OK.

This will start the System Setup and open the main Setup screen, which is shown in the figure below.

Insert Director Agent Upward Integration with TNG CD, Click setup.exe and you'll be presented with screen shown above.
