Parts Catalog

Note

This Parts Catalog (PC) contains listings and illustrations of all replaceable assemblies, subassemblies, and detail parts released on or before January 17, 2003, for IBM TotalStorage 3494 Tape Library Parts Catalog.

Fourteenth Edition (January 2003)

This catalog may contain reference to, or information about, IBM products (machines and programs), programming, or services that are not announced in your country. Such references or information must not be construed to mean that IBM intends to announce such IBM products, programming, or services in your country.

Publications are not stocked at the address given below; requests for IBM publications should be made to your IBM representative or to the IBM branch office serving your locality.

A form is provided at the back of this manual for reader's comments. Either mail or fax it to (520) 799-6487. If this form has been removed, comments may be sent to the address below.

How to Use This Parts Catalog

- **SIMILAR ASSEMBLIES:** If two assemblies contain a majority of identical parts, they are broken down on the same list. Common parts are shown by one index number. Parts peculiar to one or the other of the assemblies are listed separately and identified by description.
- **AR:** (As Required) in the Units column indicates the quantity of the part is used as required.
- **NP:** (Non-Procurement) in the Units column indicates that the part is non-procurable and that the individual parts or the next higher assembly should be ordered.
- **NR:** (Not Recommended) in the Units column indicates that the part is procurable but not recommended for field replacement, and that the next higher assembly should be ordered.
- **R:** (Restricted) in the Units column indicates the part has a restricted availability.
- **INDENTURE:** The indenture is marked by a series of dots located before the parts description. The indenture indicates the relationship of a part to the next higher assembly. For example:

Indenture	Relationship of Parts
(No dots)	MAIN ASSEMBLY
(One dot)	• Detail parts of a main assembly
(One dot)	• Subassembly of the main assembly
(Two dots)	•• Detail part of a one-dot subassembly
(Two dots)	•• Subassembly of a one-dot subassembly
(Three dots)	••• Detail part of a two-dot subassembly
