XtAppReleaseCacheRefs – decrement reference counts for resources

void XtAppReleaseCacheRefs(*app_context***,** *refs***)**
    XtAppContext *app_context***;**
    XtCacheRef* *refs***;**

app_context   Specifies the application context.

refs   Specifies the list of cache references to be released.

XtAppReleaseCacheRefs decrements the reference count for the conversion entries identified by the *refs* argument. This argument is a pointer to a NULL-terminated list of **XtCacheRef** values. If any reference count reaches zero, the destructor, if any, will be called and the resource removed from the conversion cache.
