

AMD-K6™ MMX Processor Compatibility Test Results

The AMD-K6™ MMX processor family undergoes extensive testing to ensure compatibility with today's most popular applications and hardware. Tests are performed in AMD's internal compatibility lab while Microsoft® and XXCAL conduct independent testing in their labs. The following applications and hardware have been tested and operate successfully on the AMD-K6™ MMX processor family.

The AMD-K6 compatibility is divided into the following categories:

Software
