

AT&T Globalyst™ 525

Overview:

The AT&T Globalyst 525 is positioned as an affordable, entry-level, Intel 486 VESA/ISA minitower personal computer, designed to meet the customer requirements of incredible expansion capabilities and impressive system performance at an attractive price point. This value-optimized and versatile system is directed to fulfill base system customer requirements as a standalone or, even better, network PC. It can even be used as a small, departmental print or file server. And, with the available business audio and CD-ROM features, the uses for the AT&T Globalyst 525 extend to Multimedia. The primary target market is the *large company* - enterprise and departmental segments and secondarily in the *medium company* market segment. For all of these target markets, value and high expandability for future investment protection with the ability to easily communicate are the key purchasing criterion.

The affordable AT&T Globalyst 525 compliments the overall Business Systems strategy and direction by offering: communications focused design, environmentally friendly and ergonomic design, superior investment protection and high performance, all from a global, reliable PC partner.

AT&T Vistium™ Share Software, currently available in the English language, is prebundled on all U.S. and Canada Globalyst 525 Windows and Windows for Workgroups models to allow you to work collaboratively, share applications, and simultaneously modify files with other team members, associates, and business partners. It is also certified with AT&T Vistium Personal Video solutions. In addition, this system features Plug and Play BIOS, intelligent power management with superior network functionality, PCMCIA technology support, optional pre-installed network adapters, multiple operating systems certified, and seven available expansion slots to support your communication requirements. Further, the Globalyst 525 complies with stringent EPA Energy Star power regulations and the entire system, including the packaging was designed with recycling in mind. This way, we play a crucial role in protecting our environment.

The Globalyst 525 was designed to provide you optimal investment protection. To increase productivity, performance has been enhanced with 64-bit graphics, Enhanced local bus IDE, optional 256 KB write-back cache option, and DX4 technology. You can configure this system to meet your needs as well as fulfill the power and expansion requirements of the future to prolong the life of your PC. Whether you choose to upgrade the processor, storage, memory, and/or video memory, you will appreciate knowing that the Globalyst 525 will conform to your complex configuration requirements. Finally, with AT&T, you can feel confident in knowing that you are dealing with a company that is easy to do business with, that combines agility, strength, and continuity around the world -- today and tomorrow.
