

AT&T 3406

Overview:

The AT&T 3406 is a server product for medium-sized user environments and is positioned as a high performance desktop server. This product offers customers Extended Industry Standard Architecture (EISA) and the opportunity to choose from a variety of operating systems (Novell NetWare and UnixWare, MS Windows NTS and SCO UNIX).

The AT&T 3406 desktop server, with Intel's 60MHz or 90 MHz Pentium™ processor, provides increased flexibility and performance with its EISA I/O bus and upgradability to 90MHz Intel Pentium™ processors. The AT&T 3406 offers up to 256MB parity (through the Parity Expansion Board) or 256MB Error Checking and Correcting memory (ECC) and can have up to five(5) drive bays for expandability and upgradability.

The AT&T 3406 is positioned to compete against the Compaq DeskPro M5/60, Compaq DeskPro XL and the IBM PC Server.

Please refer to your area release letter or contact your account manager for additional information.

System Features/Available Models:

Generally released Configure To Order (CTO) models:

	3406-4000-8090	3406-4500-8090	3406-2000-80XX	3406-2500-80XX
Architecture	EISA, I/O bus at 33 MB/second	EISA, I/O bus at 33 MB/second	EISA, I/O bus at 33 MB/second	EISA, I/O bus at 33 MB/second
Processor	60MHz Pentium, upgradable to 90MHz	No processor with base model; feature must be ordered separately	60MHz Pentium, upgradable to 90MHz	No processor with base model; feature must be ordered separately
Cache	256KB	256KB	256KB	256KB
